PHONE

The candidate getting a witness assessment form signed off

London Waterloo Academy

London Waterloo Academy

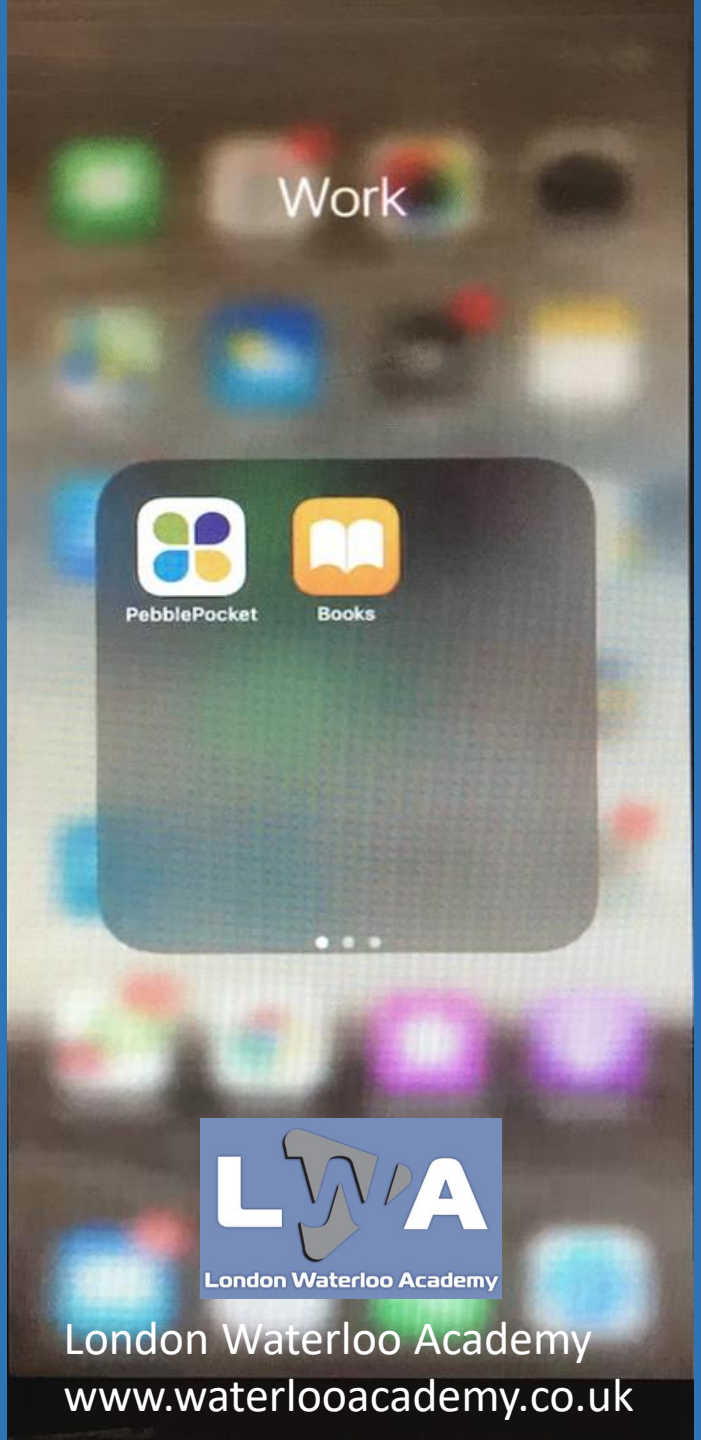
www.waterlooacademy.co.uk

The Pebblepocket – the side that the student uses to get a form signed off by the witness in the workplace

Pebblepocket is the app

The candidates can download this from the App store or from google play for free

When they use it for the first time and open it up, it is a generic app that anybody can use



The customize content that the candidates need will be available once they log in

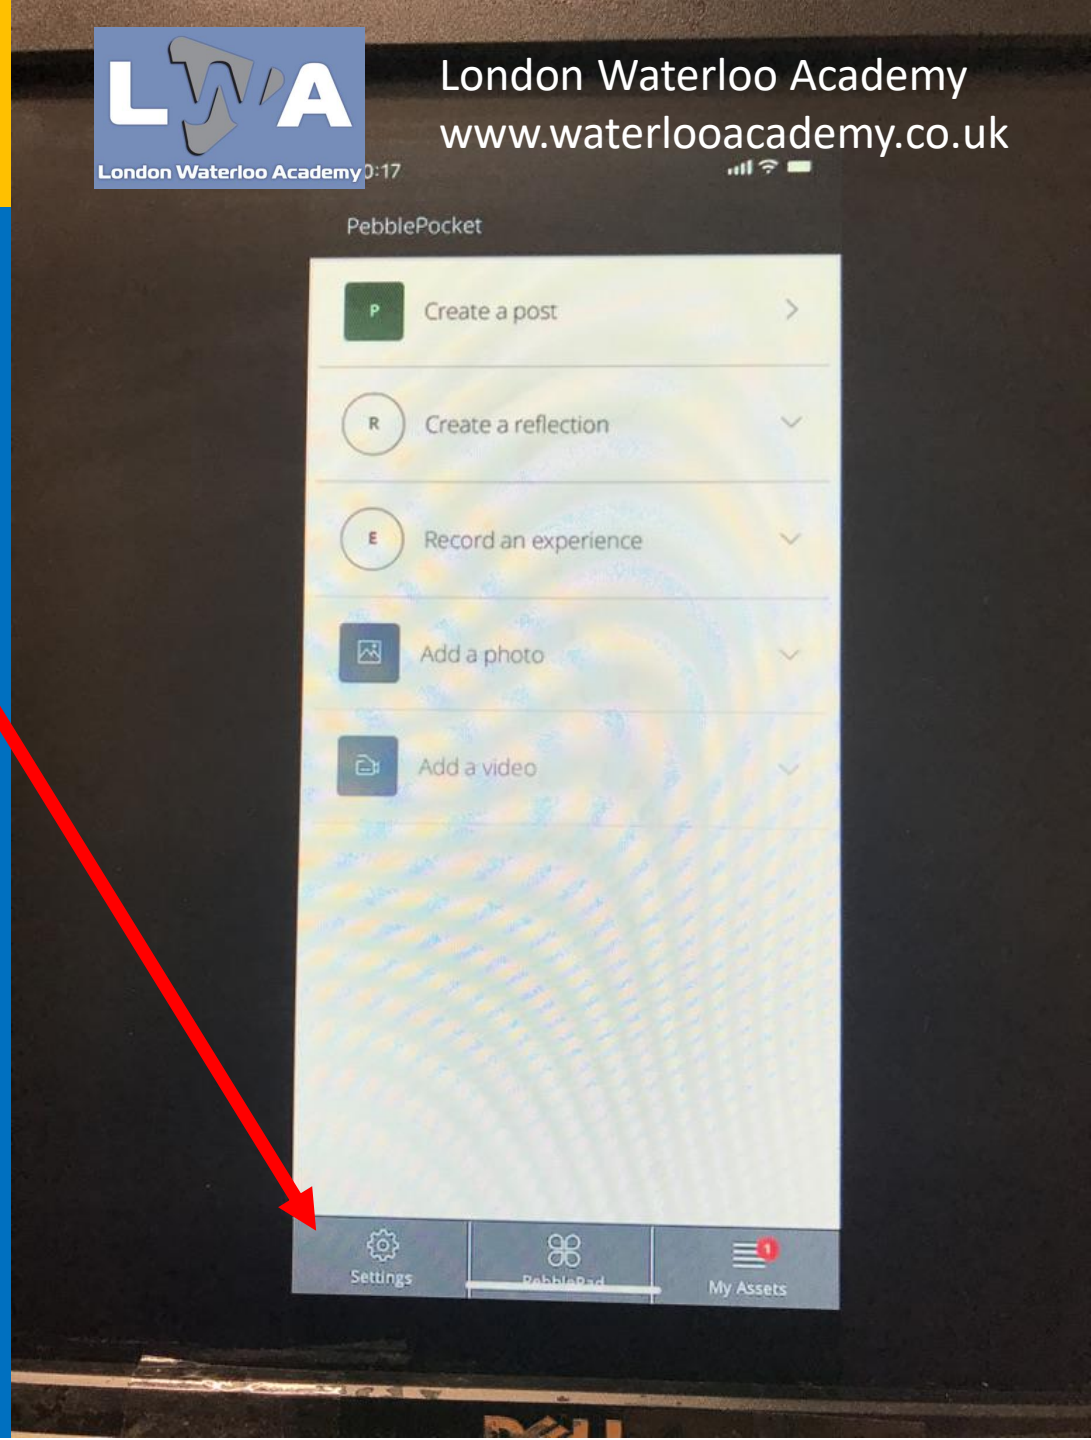
London Waterloo Academy

www.waterlooacademy.co.uk

HOW TO LOG IN

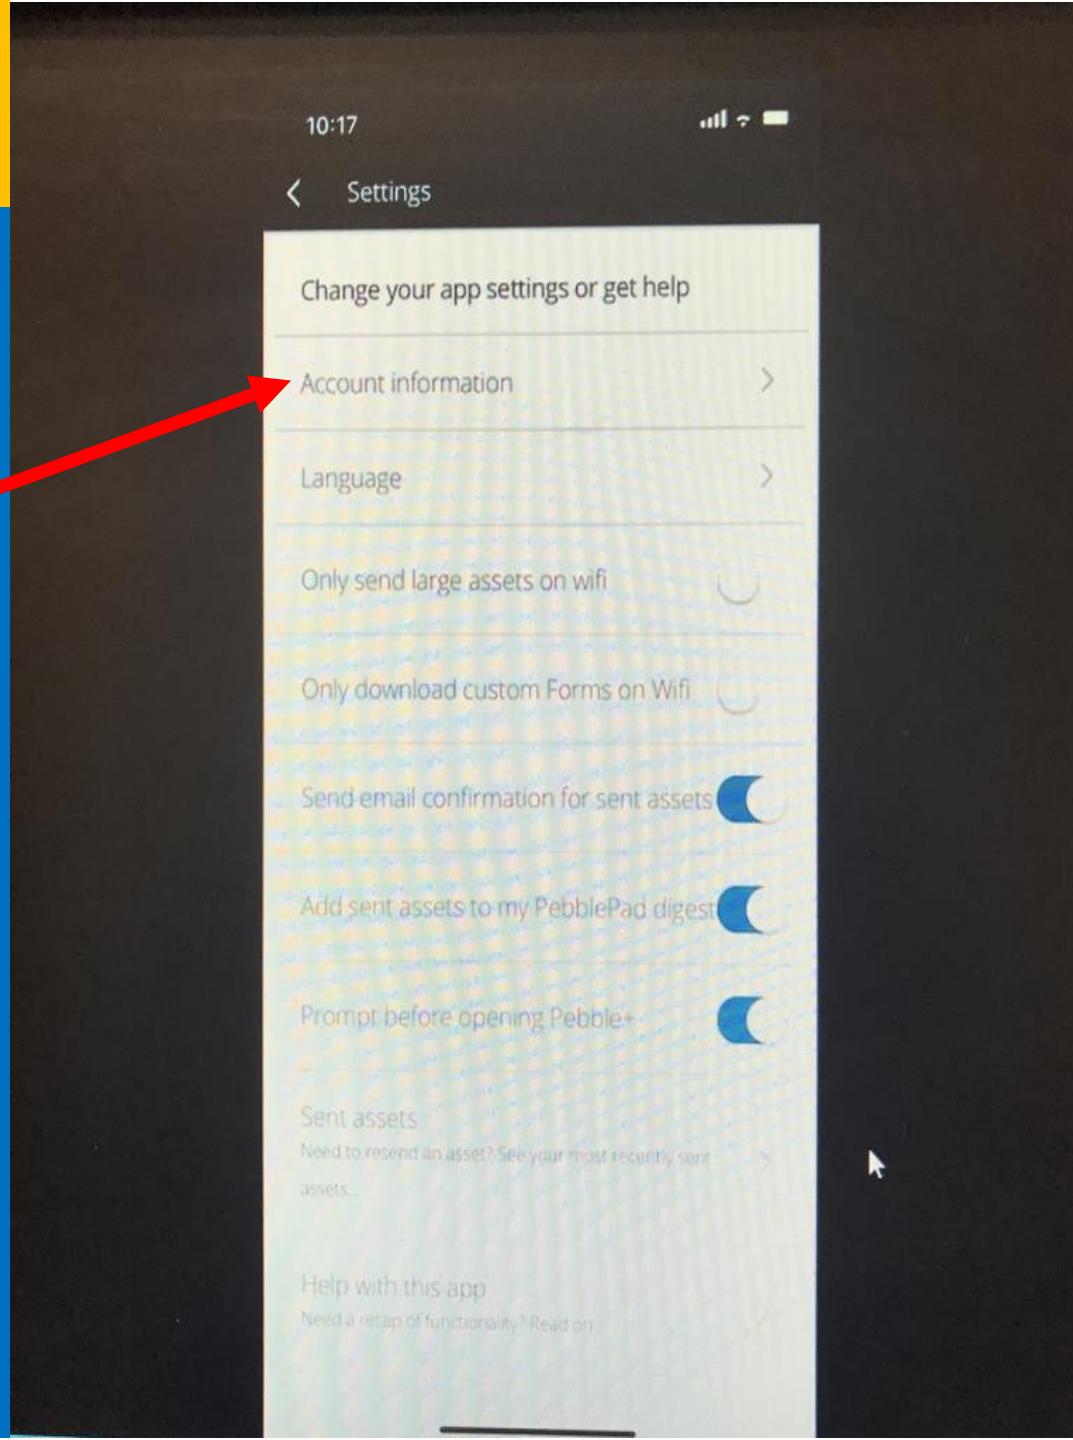
To login once they've opened the app, go to the settings screen in the bottom left-hand corner

There are a lot of options to change settings if they want to, to get a customize settings; to change how the app works on their phones; defaults works as well



HOW TO LOG IN

Go to accounts information



London Waterloo Academy

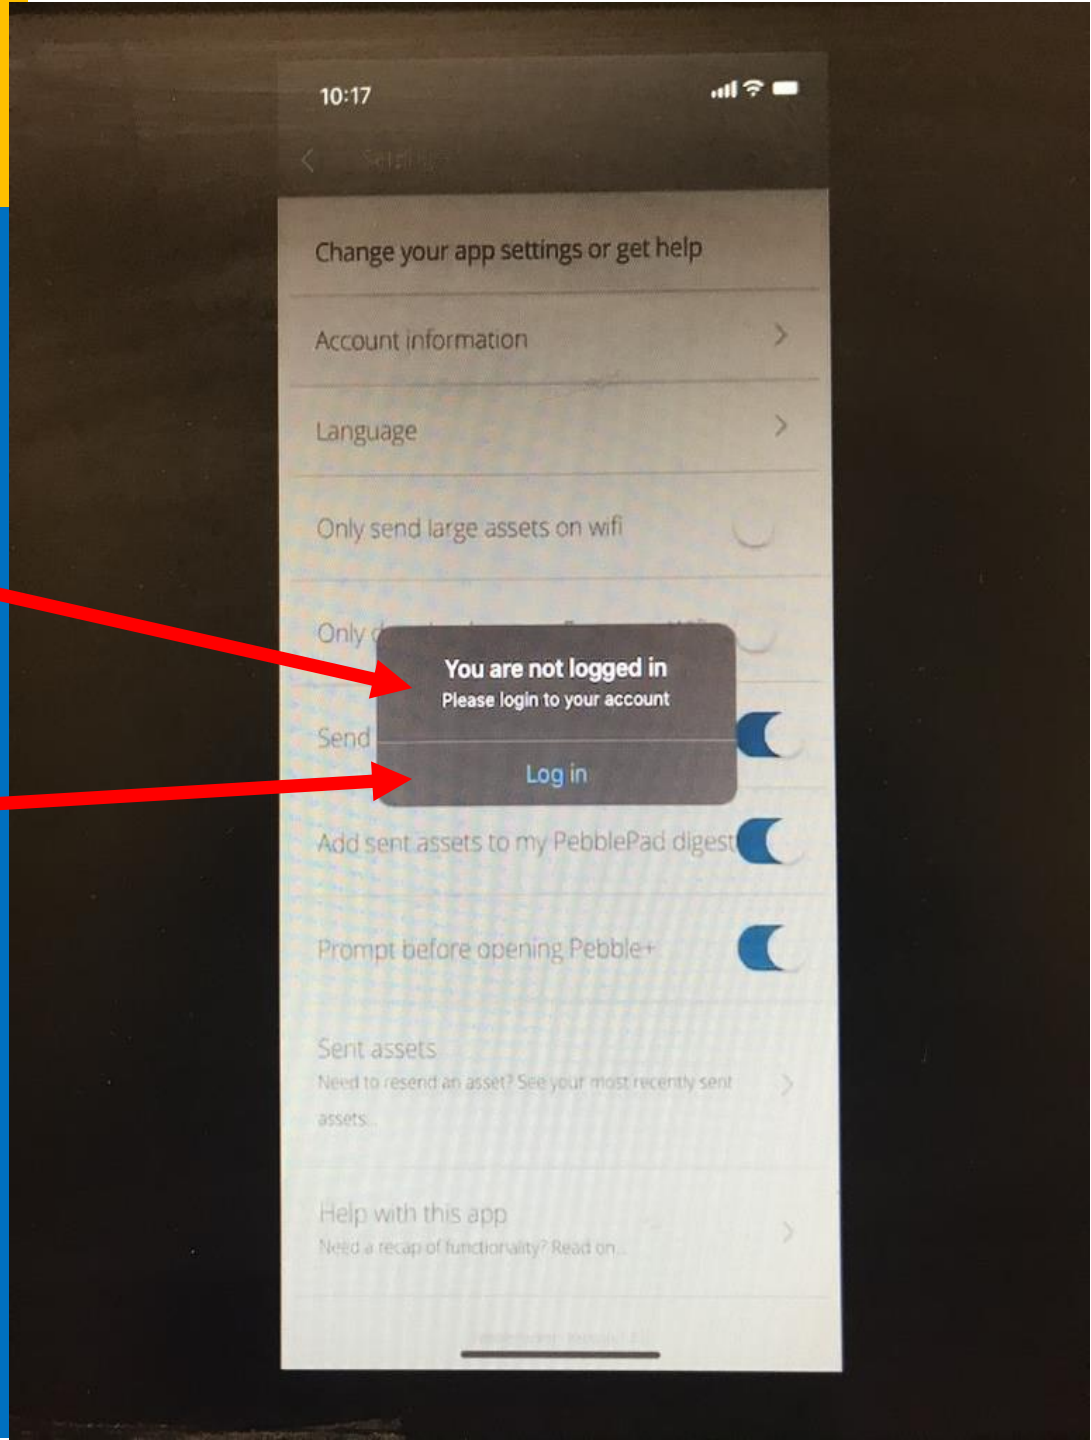
www.waterlooacademy.co.uk

HOW TO LOG IN

London Waterloo Academy

It shows you are not logged in.

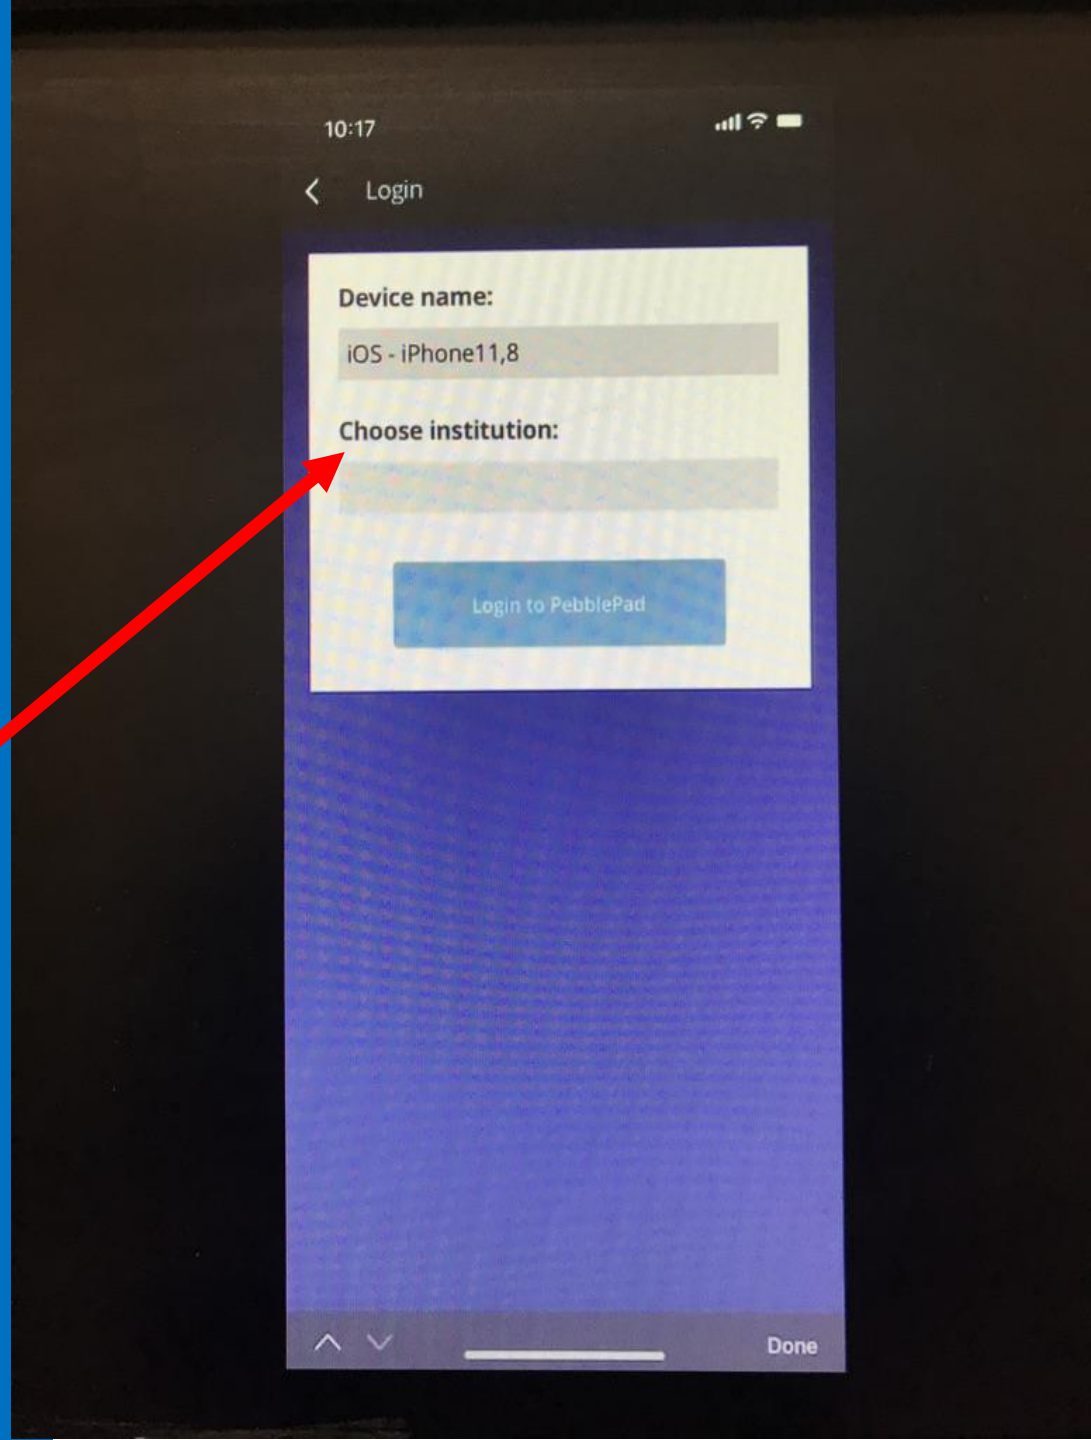
You need to click on log in, and you need some type of signal to do this



So you log in at first and you need a 3G and upwards signal

As soon as you log in, the whole thing works offline from then on so there's no signal after that

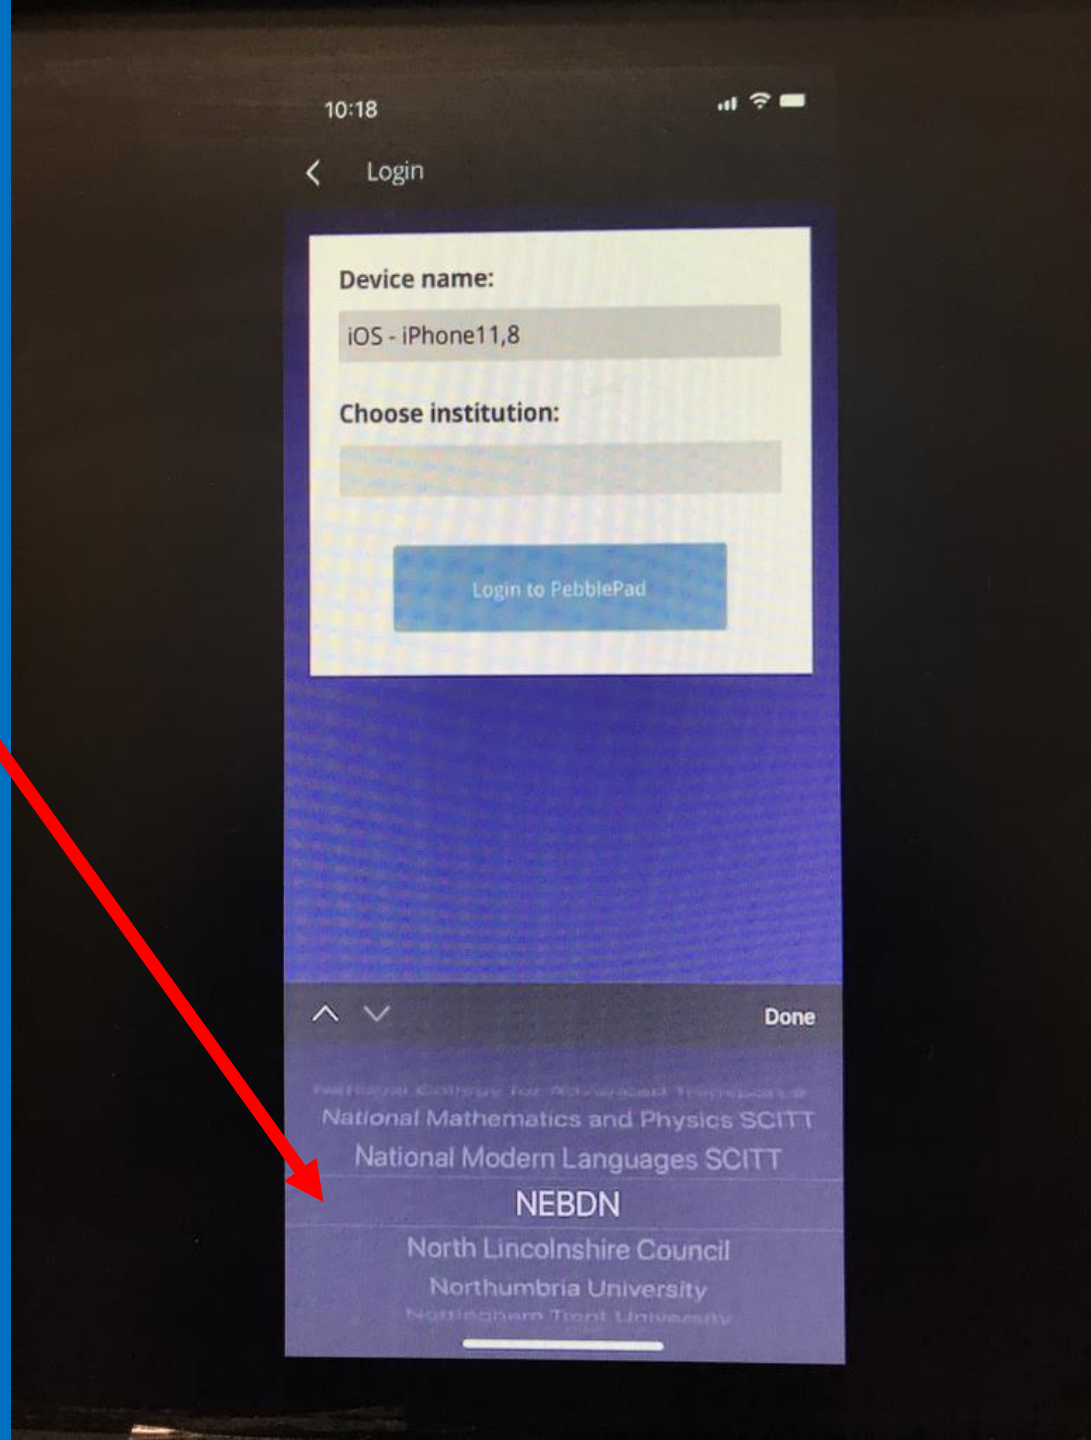
Choose institution



London Waterloo Academy

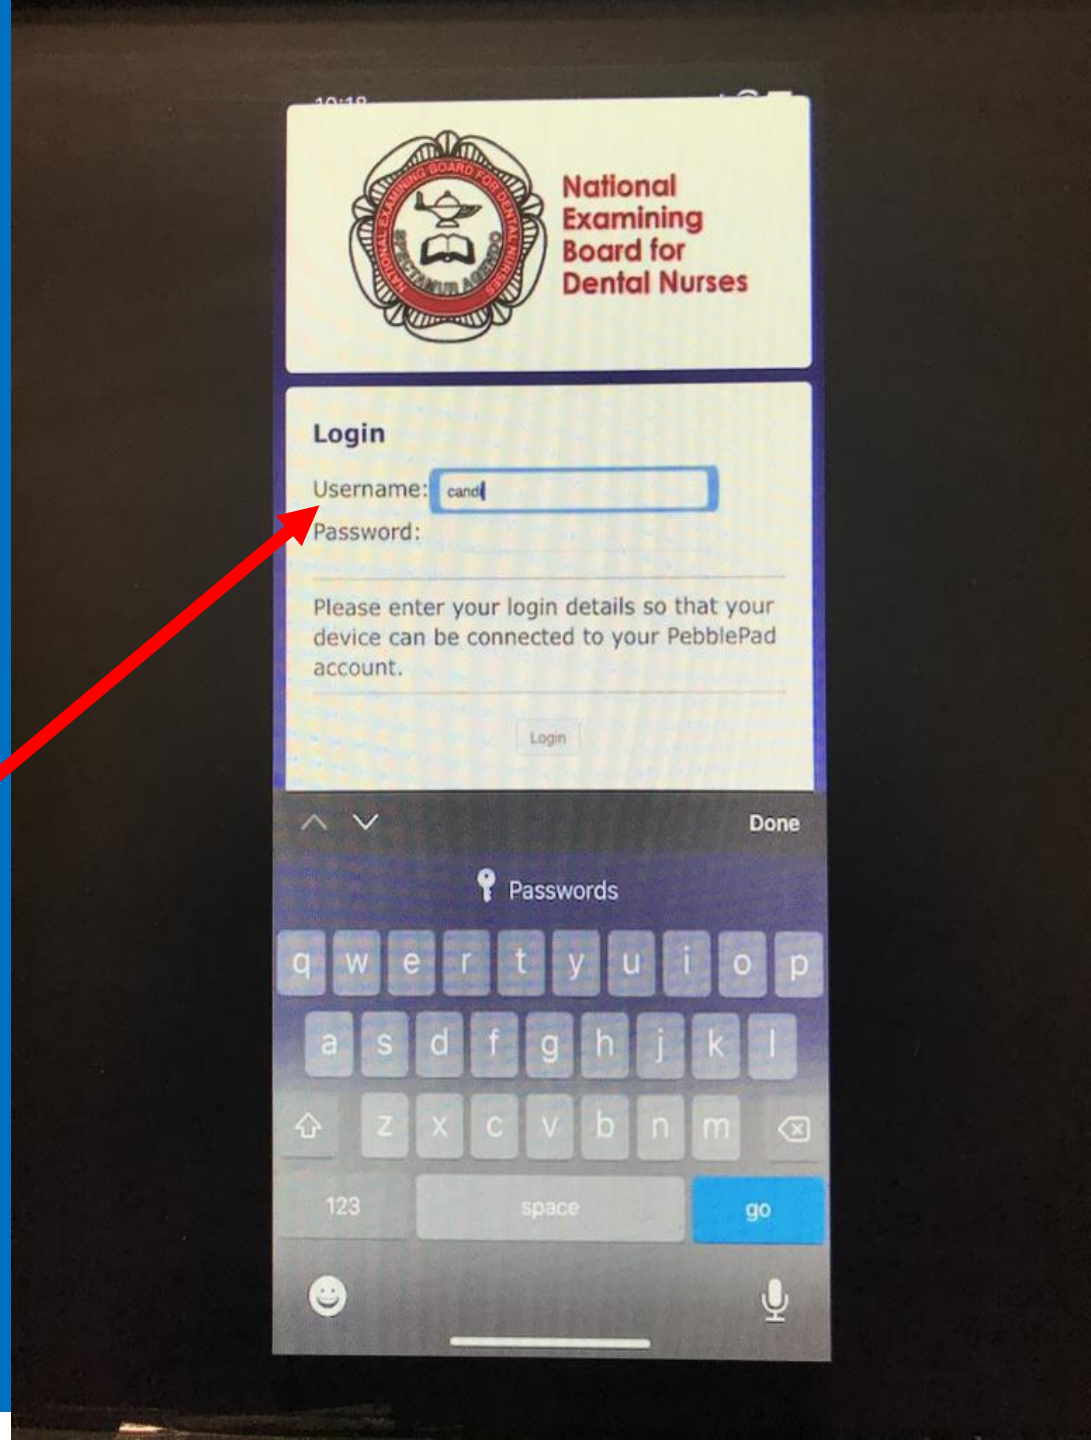
Select NEBDN from the dropdown options

Click login to Pebblepad



London Waterloo Academy

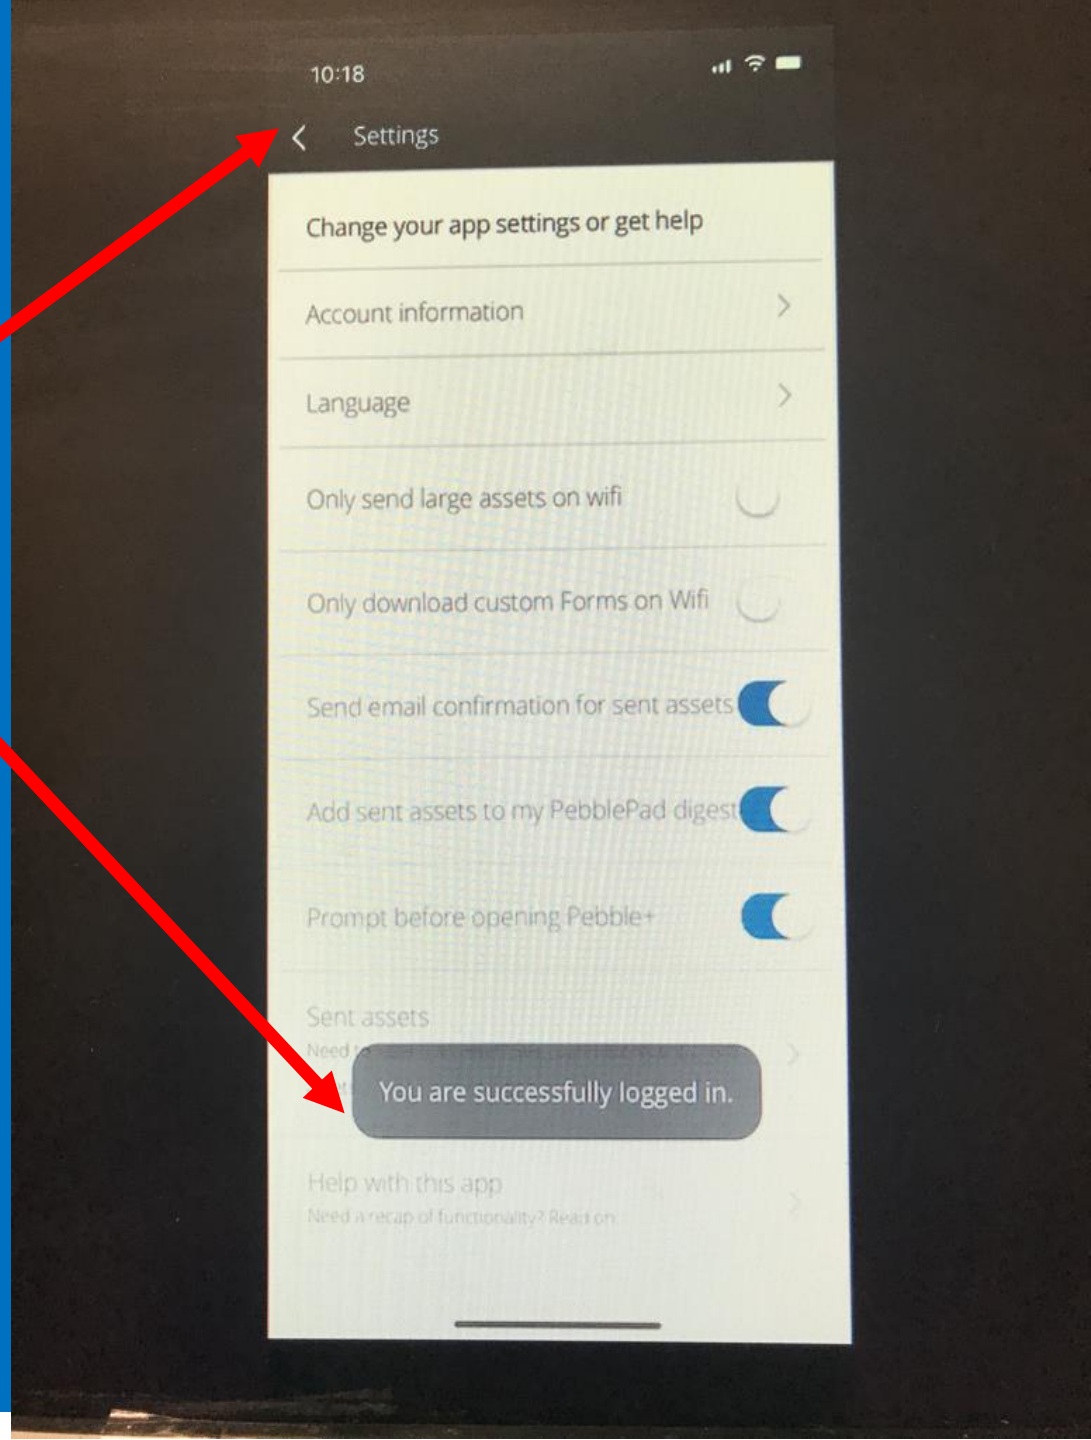
Once you've done your username and password



London Waterloo Academy

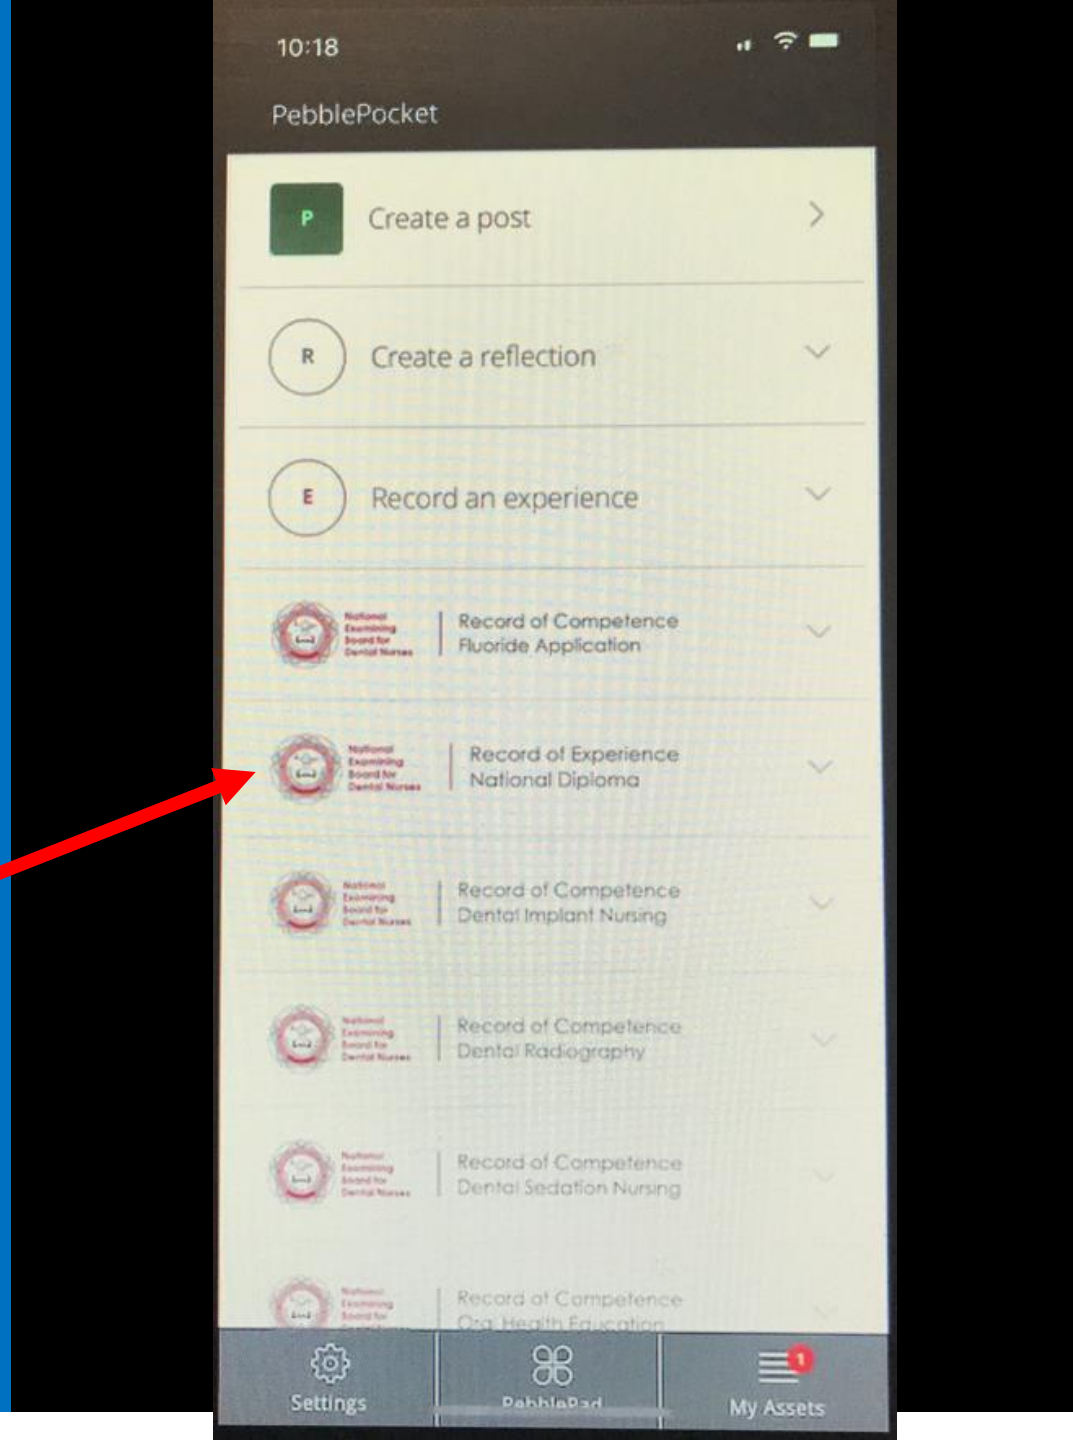
It should come back with a message saying you are successfully logged in

Then you can go back a step using the arrow in the top left-hand corner at settings



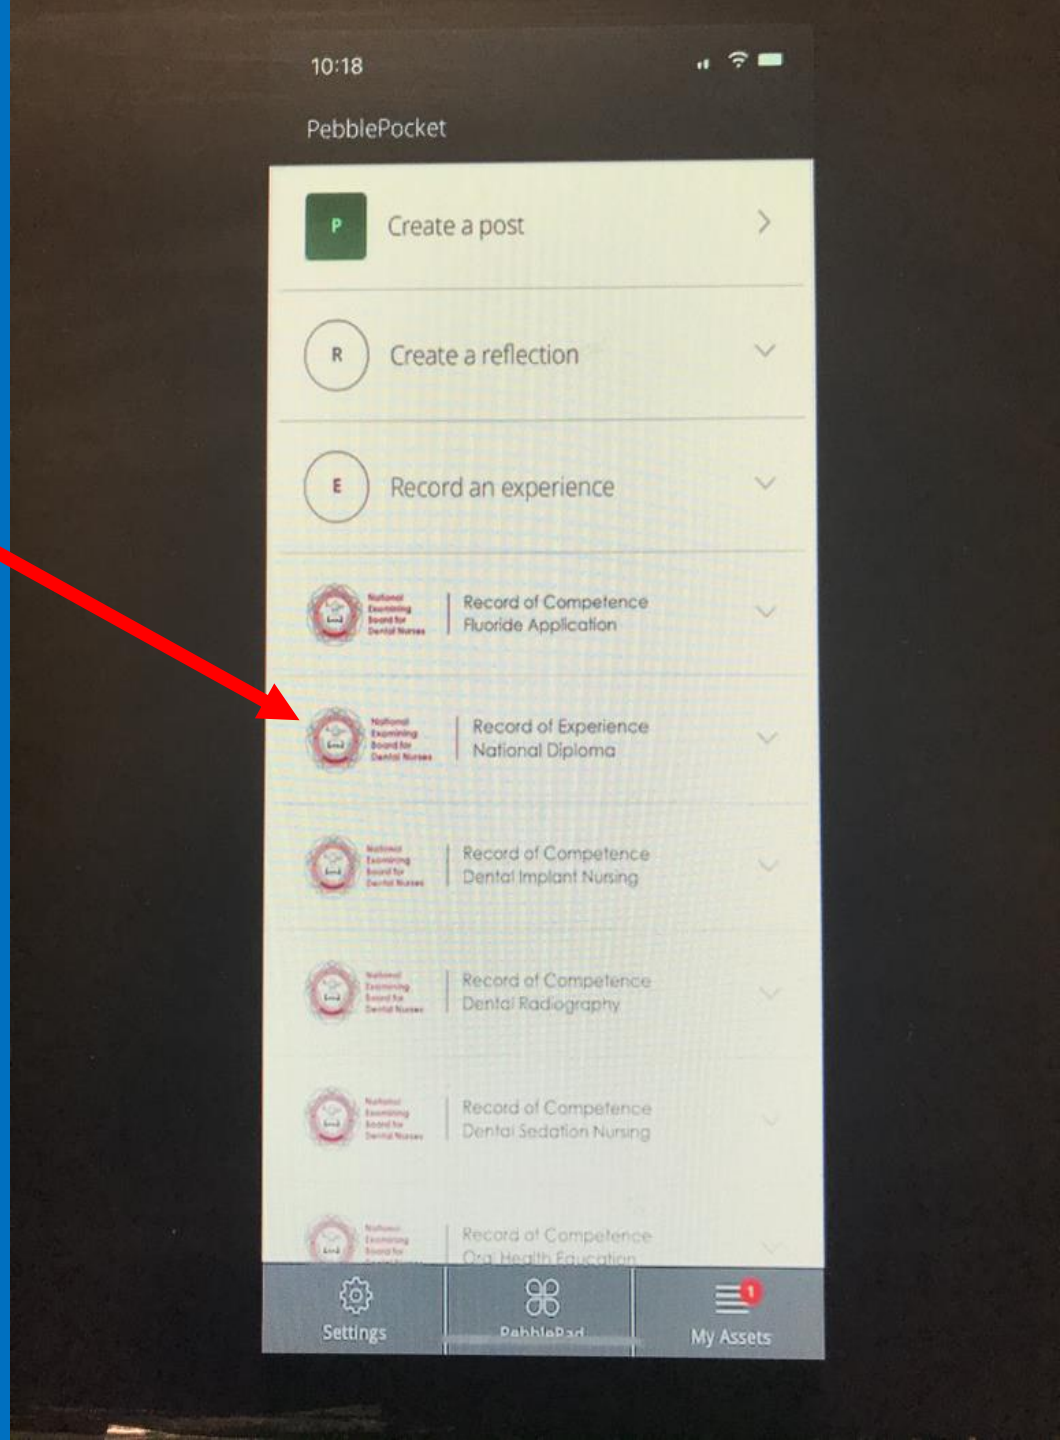
London Waterloo Academy

As soon as you are logged in as the candidate, you then have all the forms related to the qualifications from the NEBDN



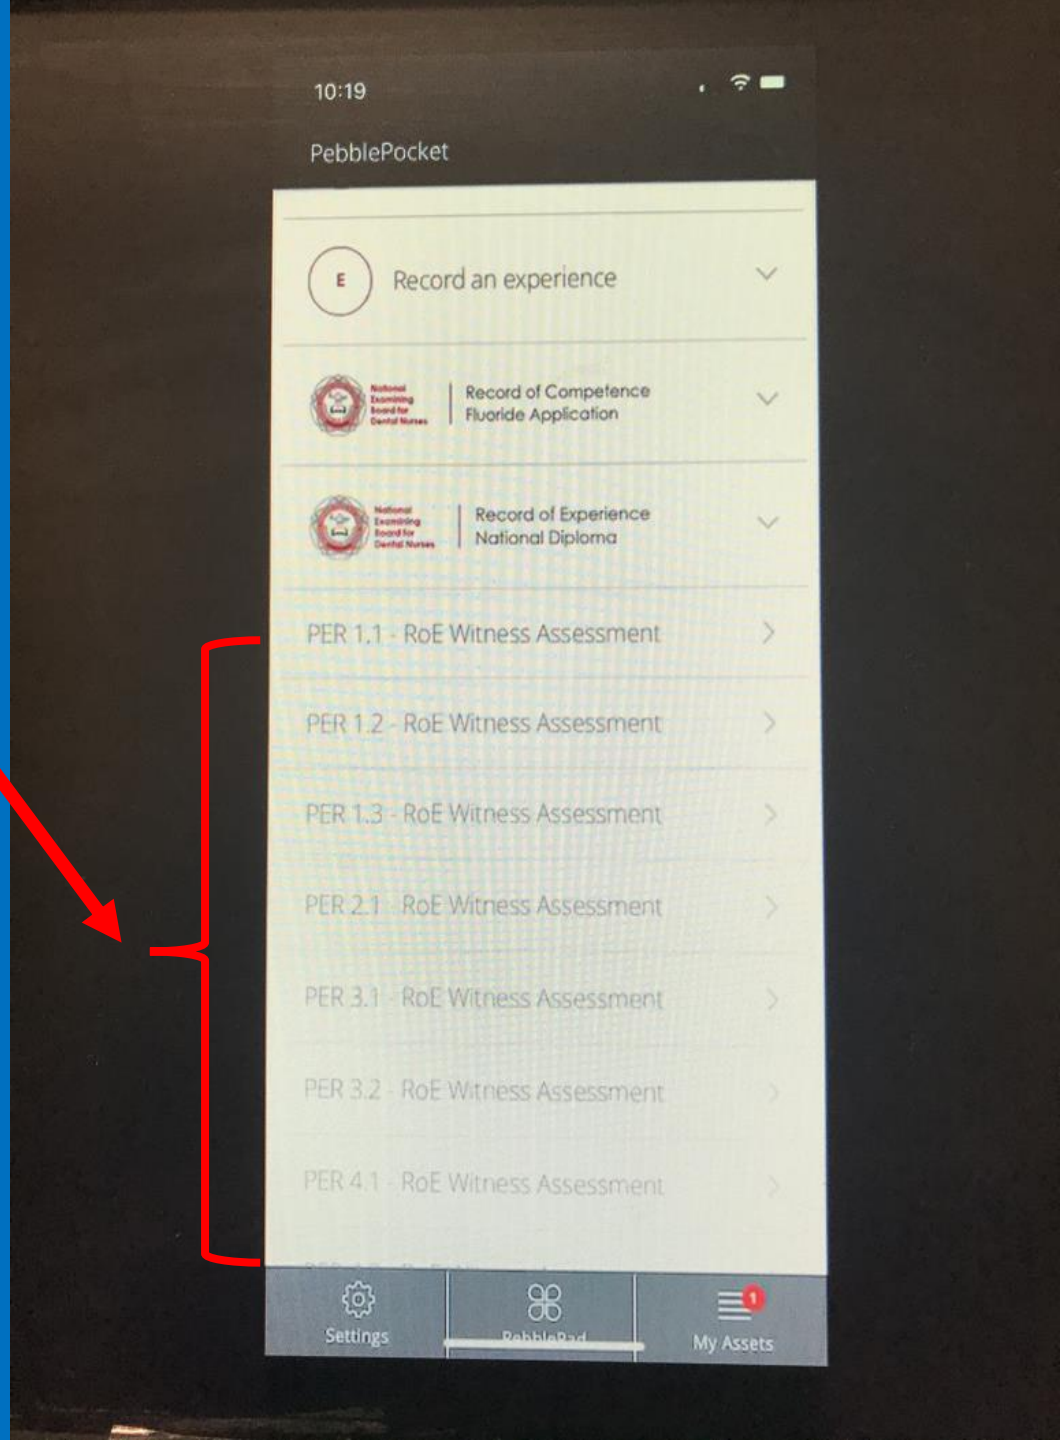
London Waterloo Academy

Record of Experience as the second one down, when you press on the logo it drops down a menu



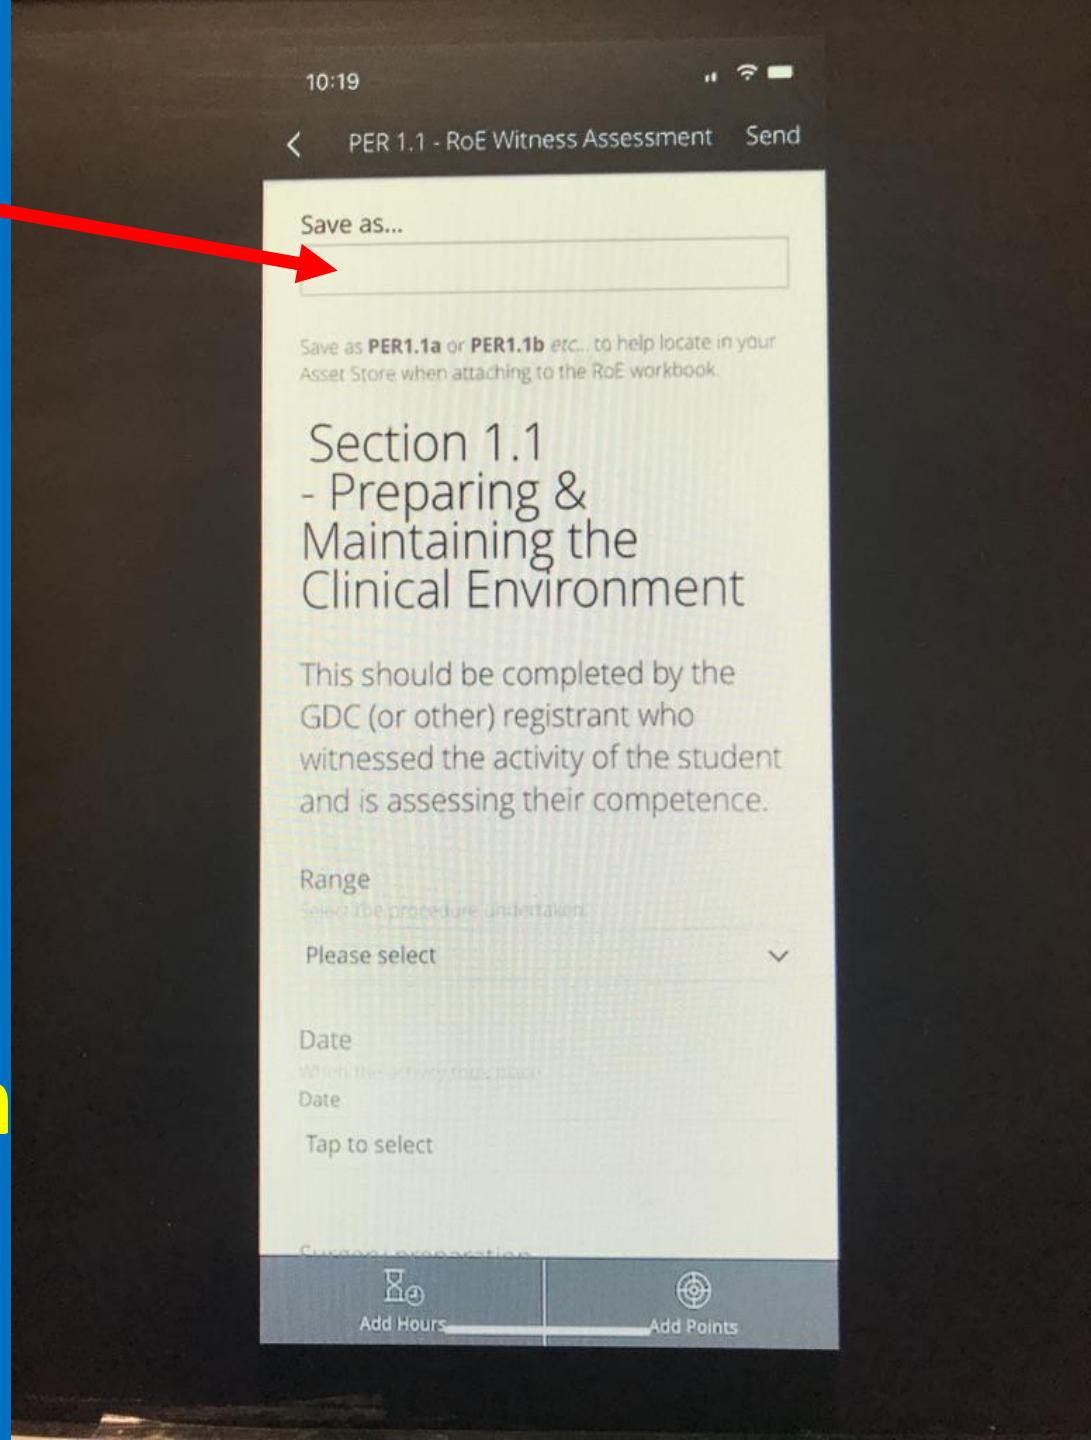
London Waterloo Academy

For the ROE, it gives you a Witness assessment form for each of the separate section of the PERS within the content



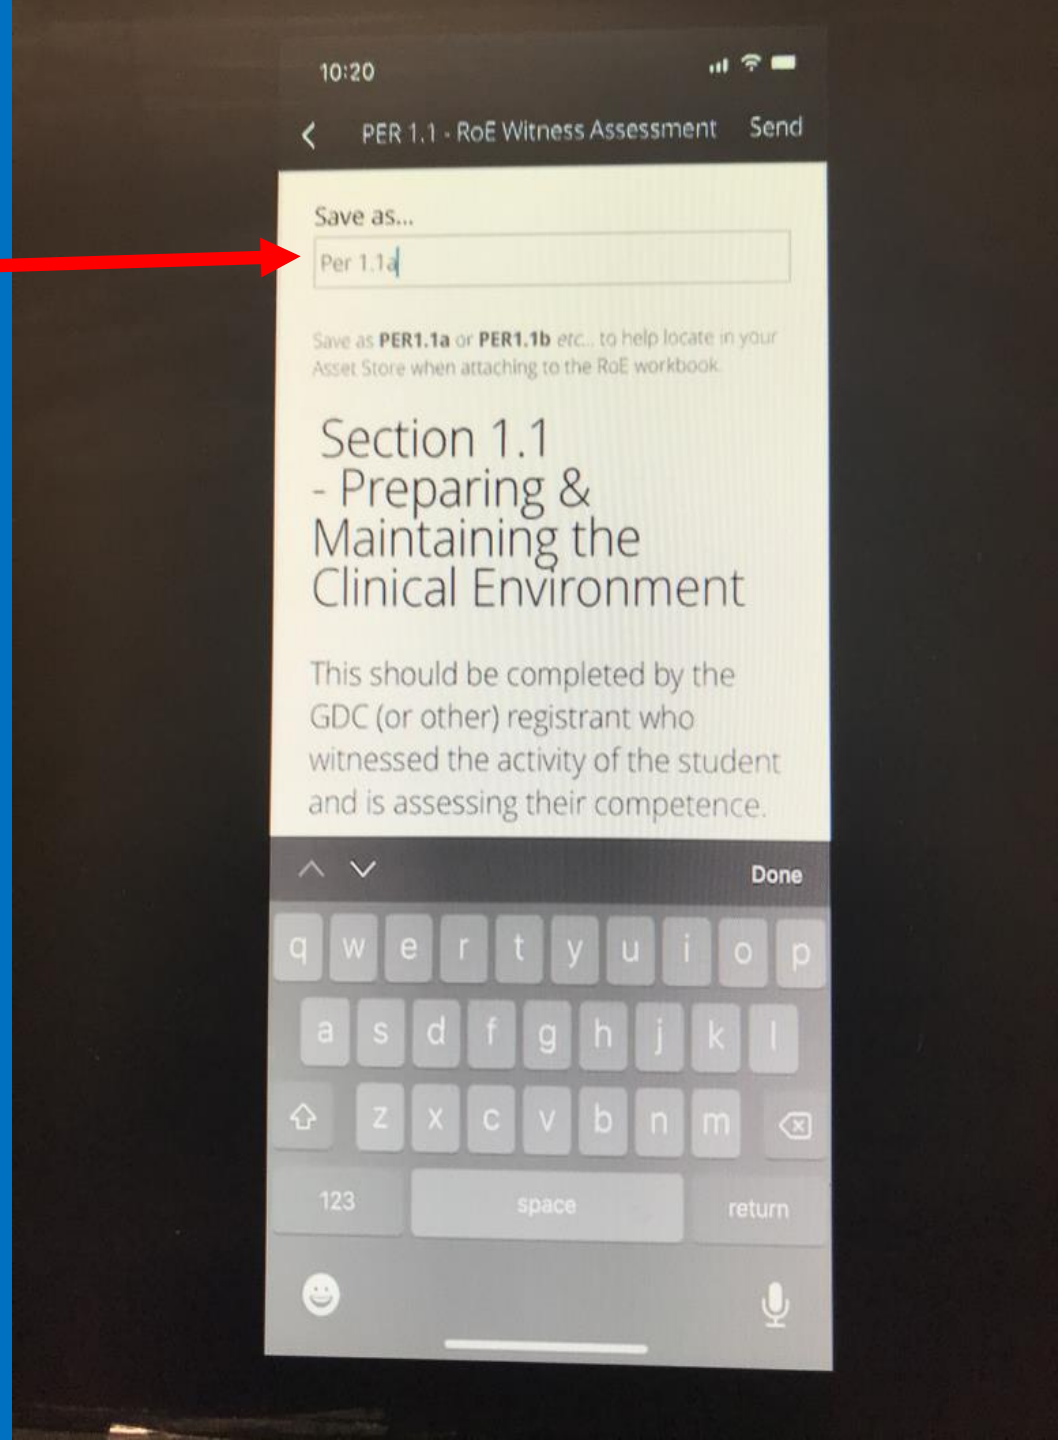
London Waterloo Academy

For example, select PER1.1, and at the very top it gives you a box to save this completed form, it gives a suggestion, basically the candidate should save it as a recognizable name so when they get this piece of evidence signed off, they send it back to their accounts and they can then look for it and understand which form this is



London Waterloo Academy

If this was PER 1.1.a, they can write PER1.1.a so that you can see when you look at the content later on that this was the actually the file that was used

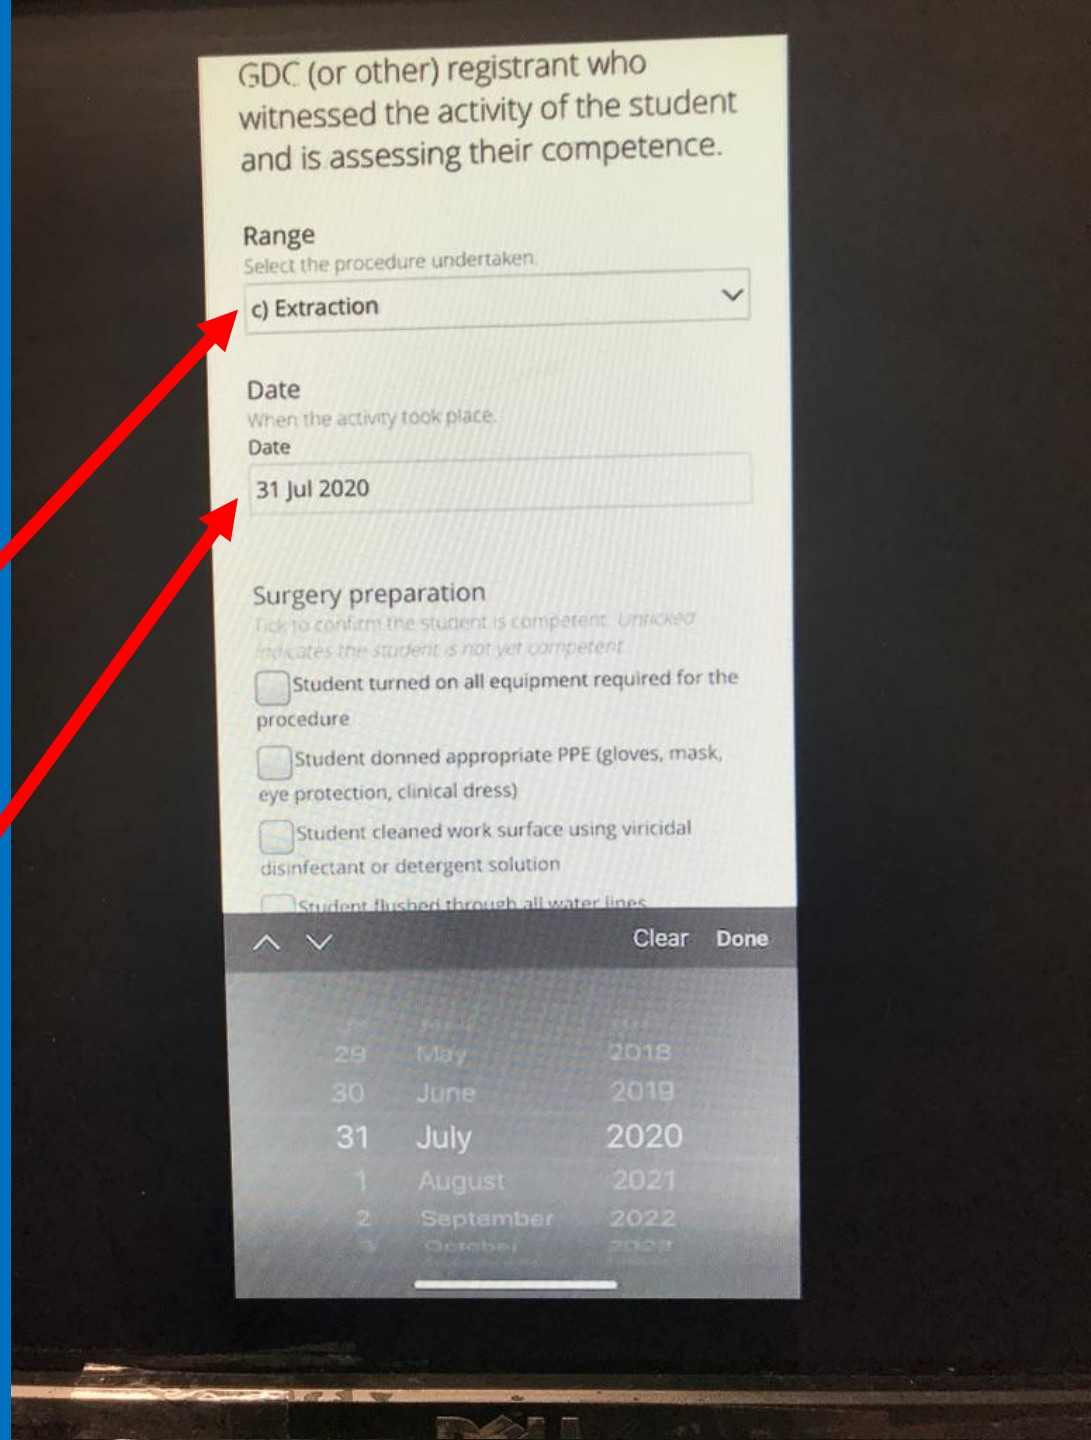


London Waterloo Academy

All of the content is based on the original documentation so a lot of it should be very familiar

Range – extraction

Dates – when it took place

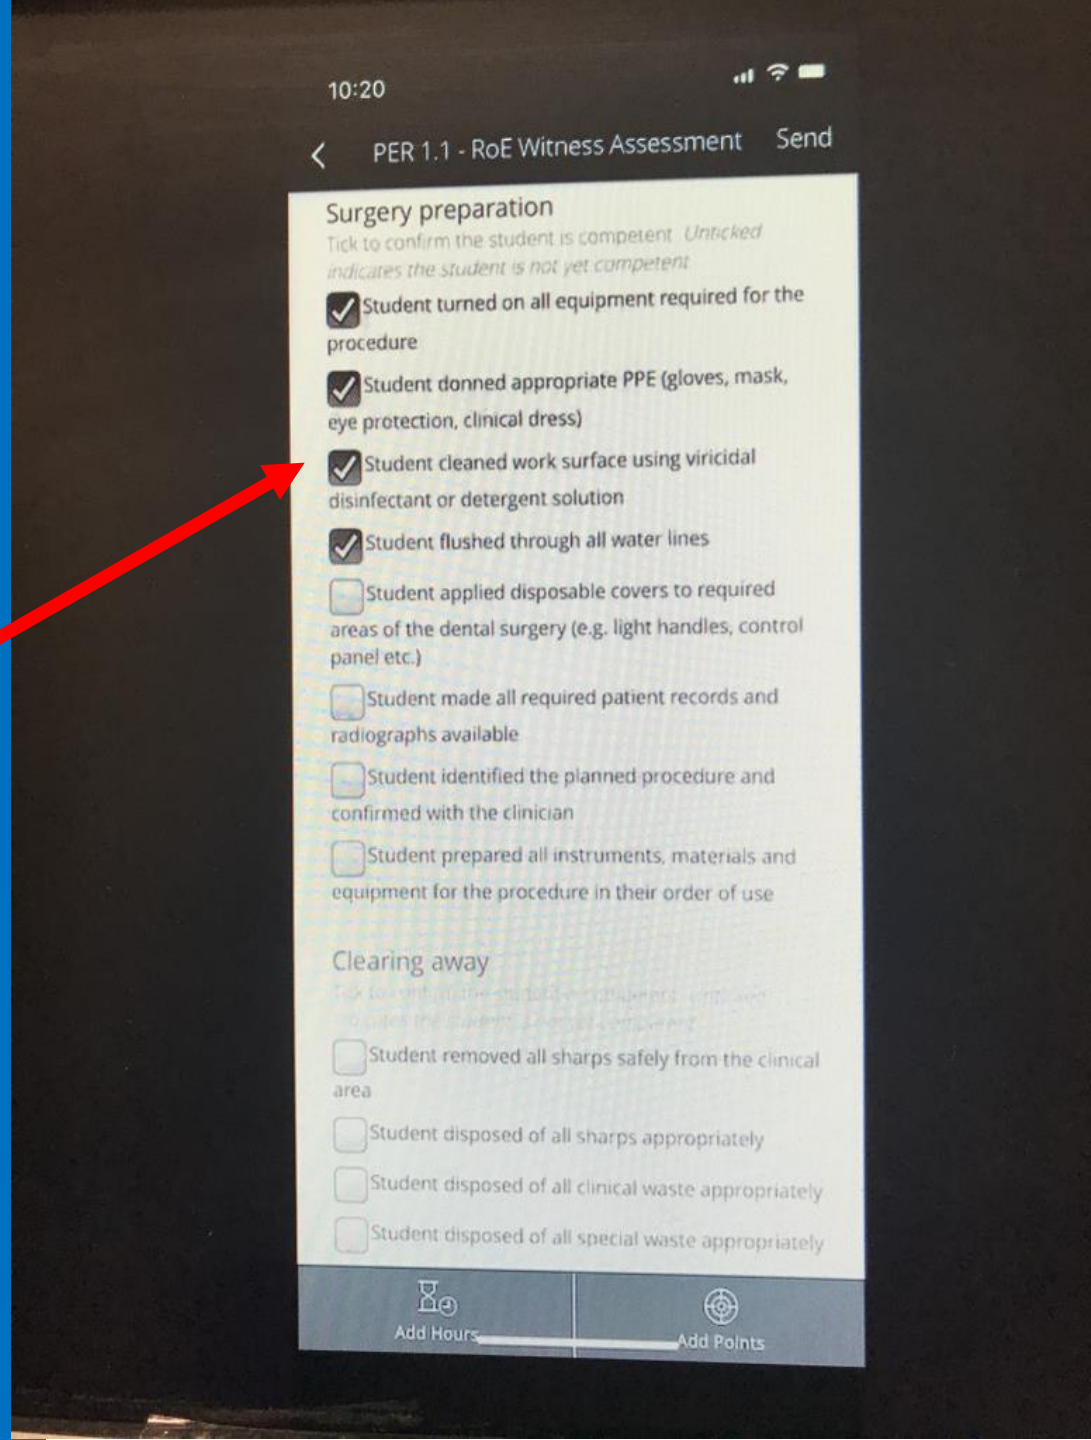


London Waterloo Academy

WITNESS ASSESSMENT FORM

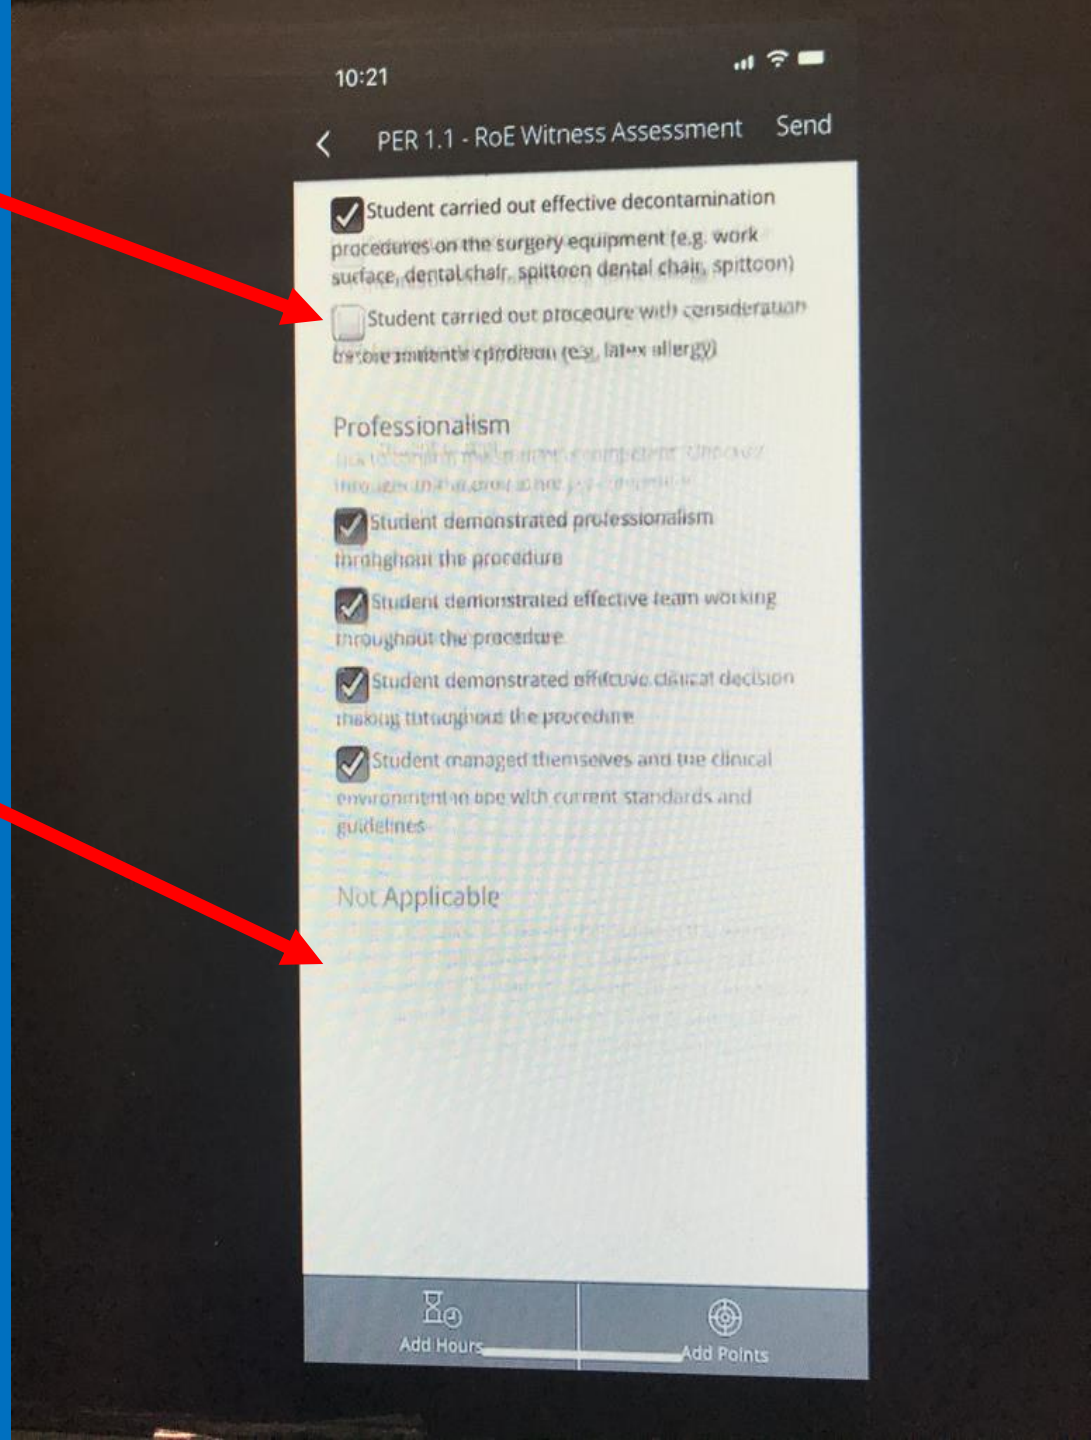
the witness should actually fill this in or the very least in the presence of the witness

Witness can tick off the boxes



London Waterloo Academy

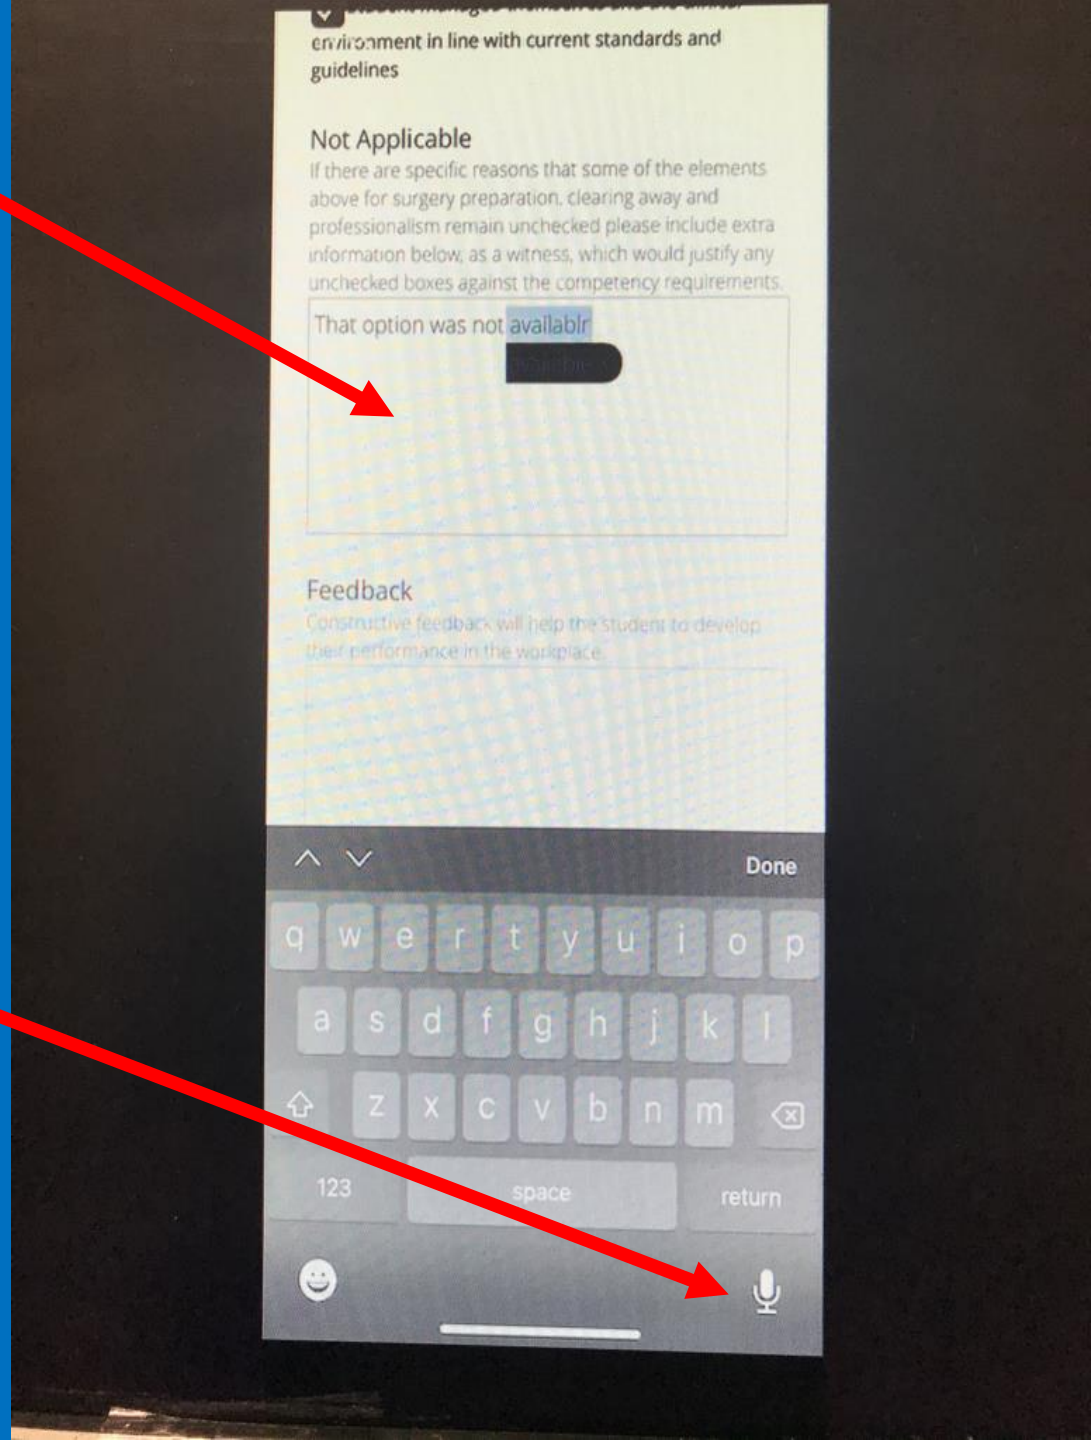
It was left unticked on some occasions, there may be some sections that shouldn't be filled in or can't be filled in, so there's a not-applicable field. So if there is a reason, then the witness can say why that's okay not to sign off.



London Waterloo Academy

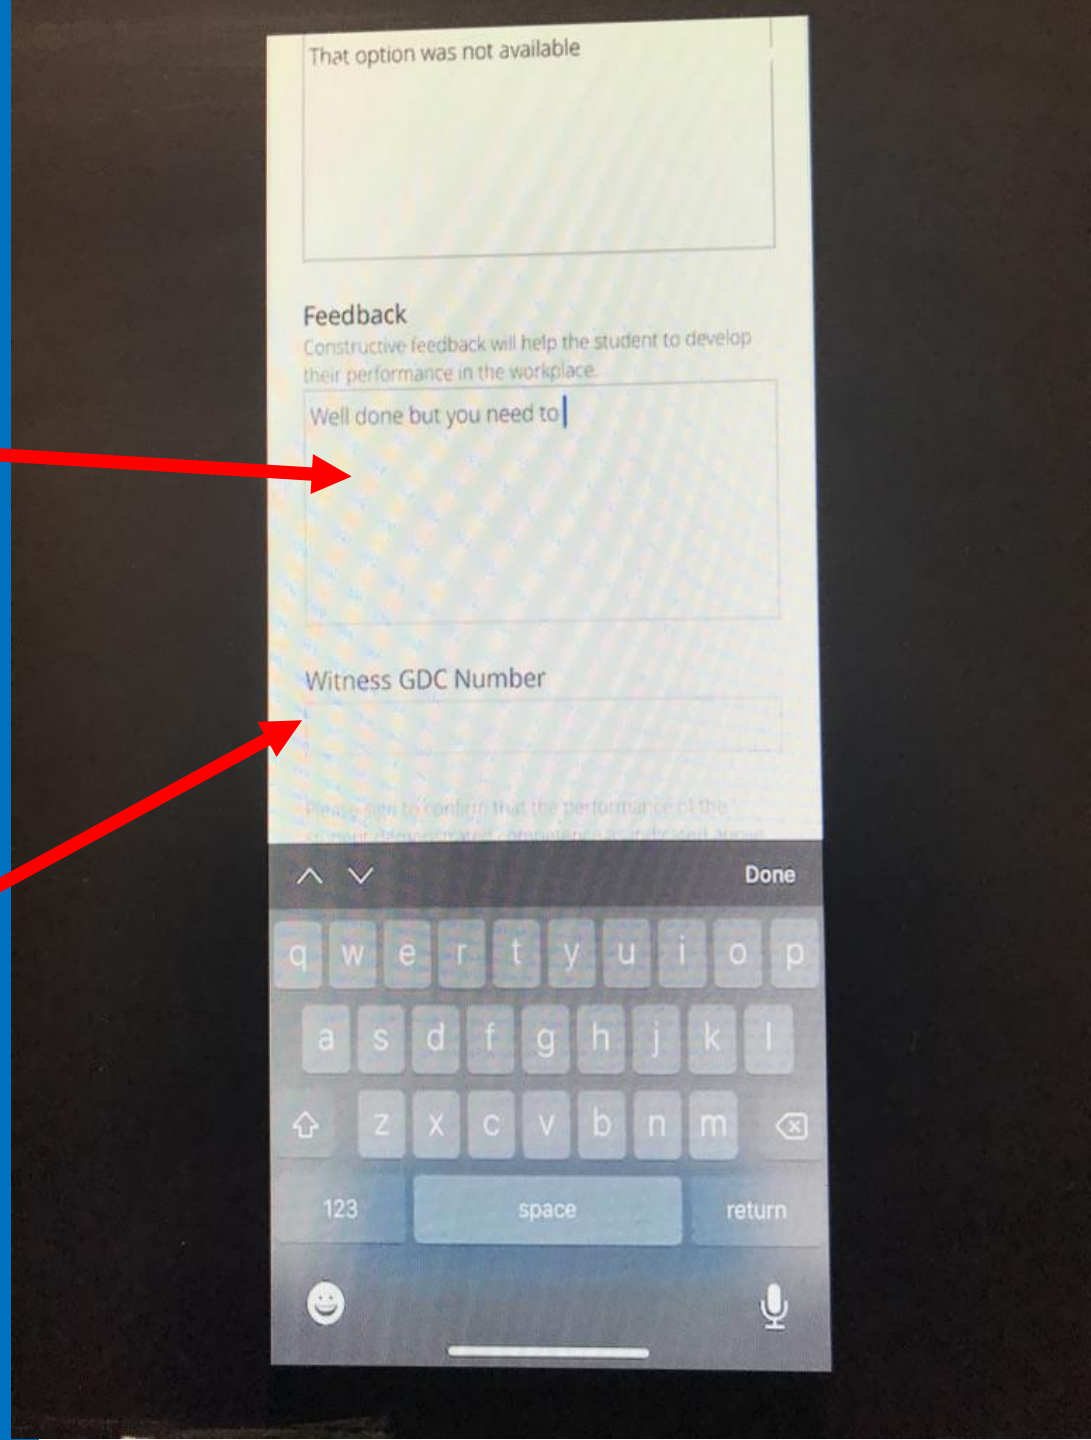
When you actually press in on the box, you can actually type in the feedback.

Most of the phones have a dictation option, the bottom right hand corner, there's a little microphone. So if you press and speak your feedback, it will then turn into text.



Feedback by witness

Witness GDC number

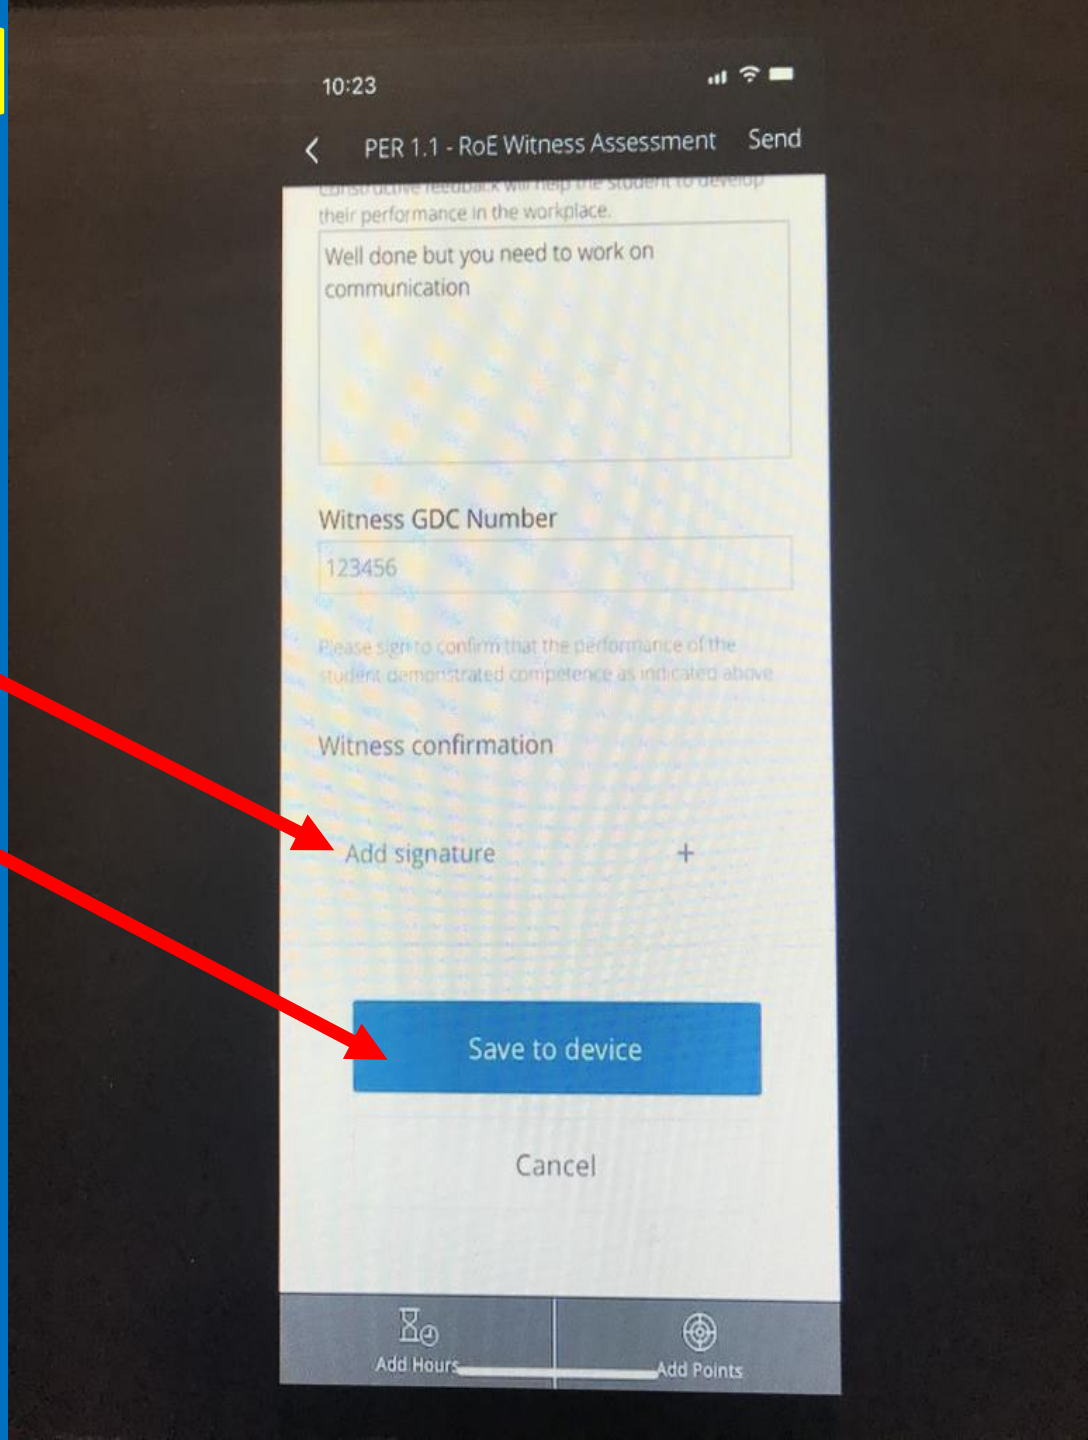


London Waterloo Academy

Witness confirmation – add signature

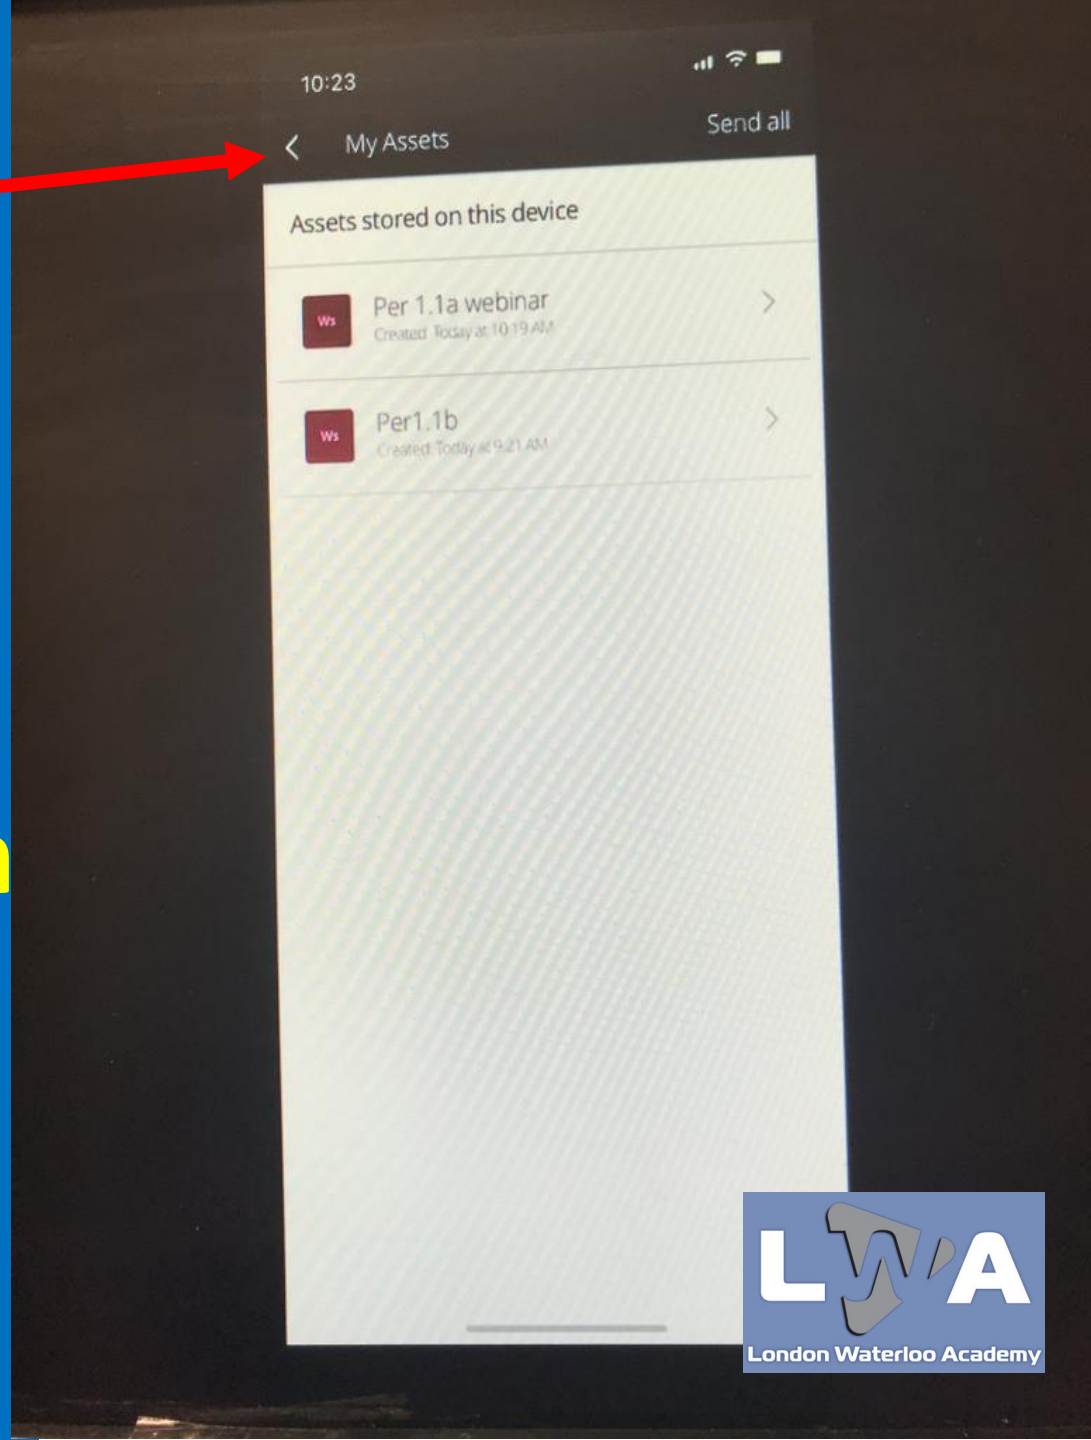
If the candidate can't get a signature in the moment, they can save it on their device and get the signature later.

They can just Save to Device.

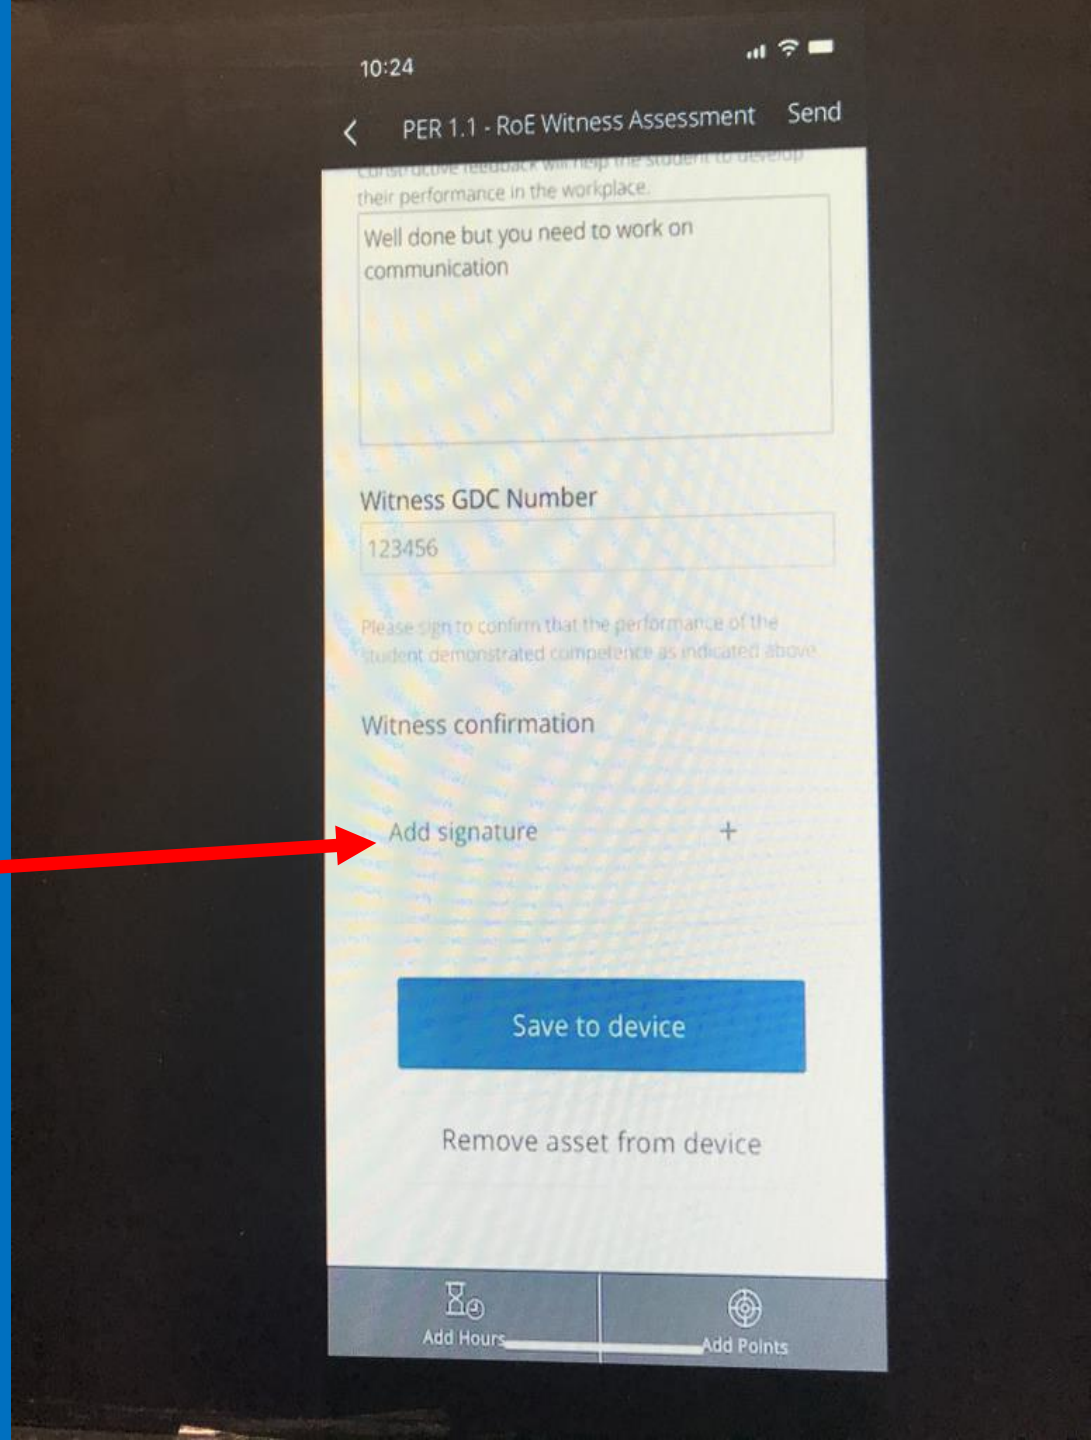


What happens it sends it into the “MY ASSETS SECTION” of the App so you can go back into that

A candidate can get lots filled in and ready to go and then signed off all the same time in a break or end of the day or whenever its convenient for the Witness and the candidate to get the others



The witness can now add their signature

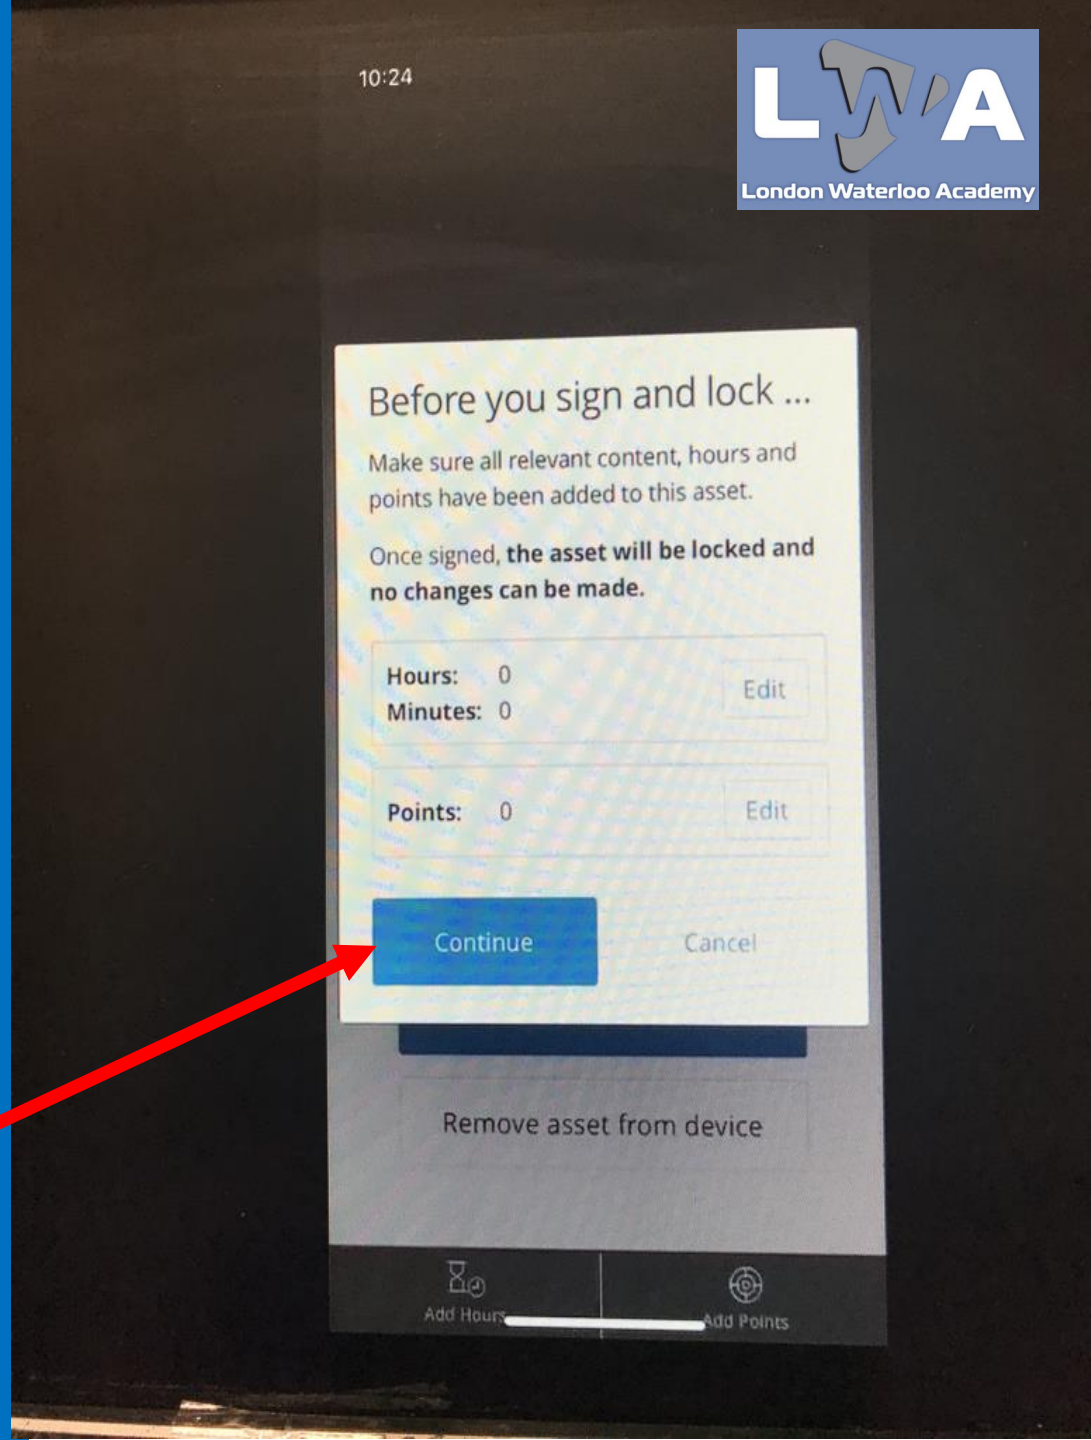


London Waterloo Academy

When you press add signature, it comes ups saying make sure all relevant content, hours and points have been added to this asset.

The hours and points is not applicable to NEBDN

Press continue

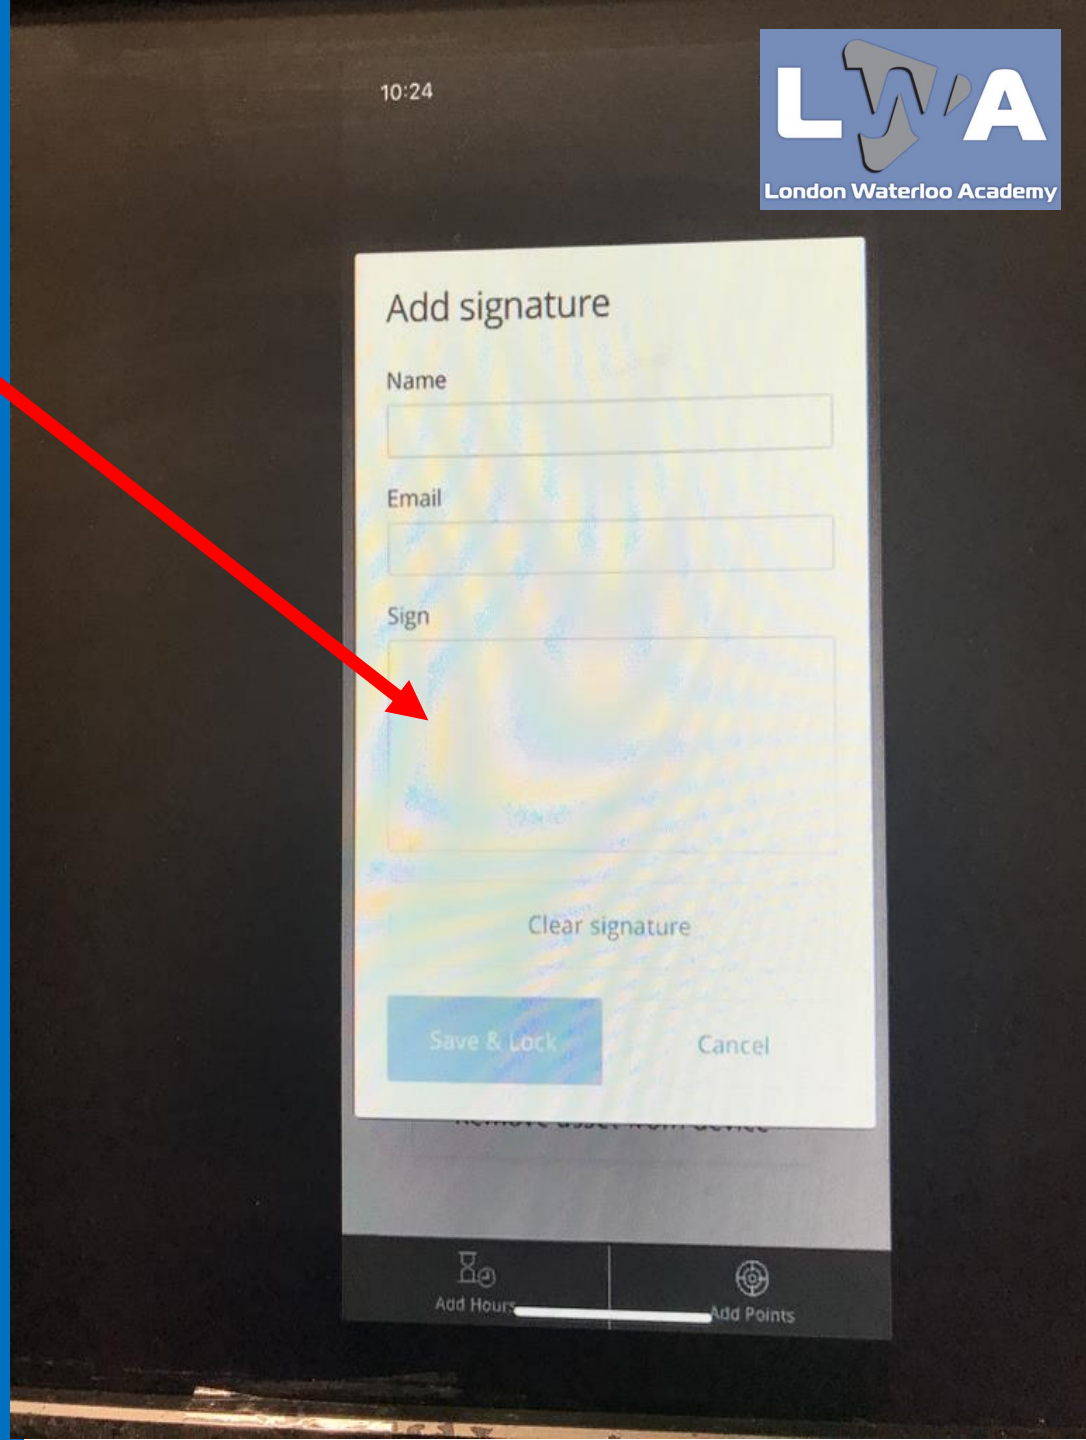


Add name , e-mail, then sign

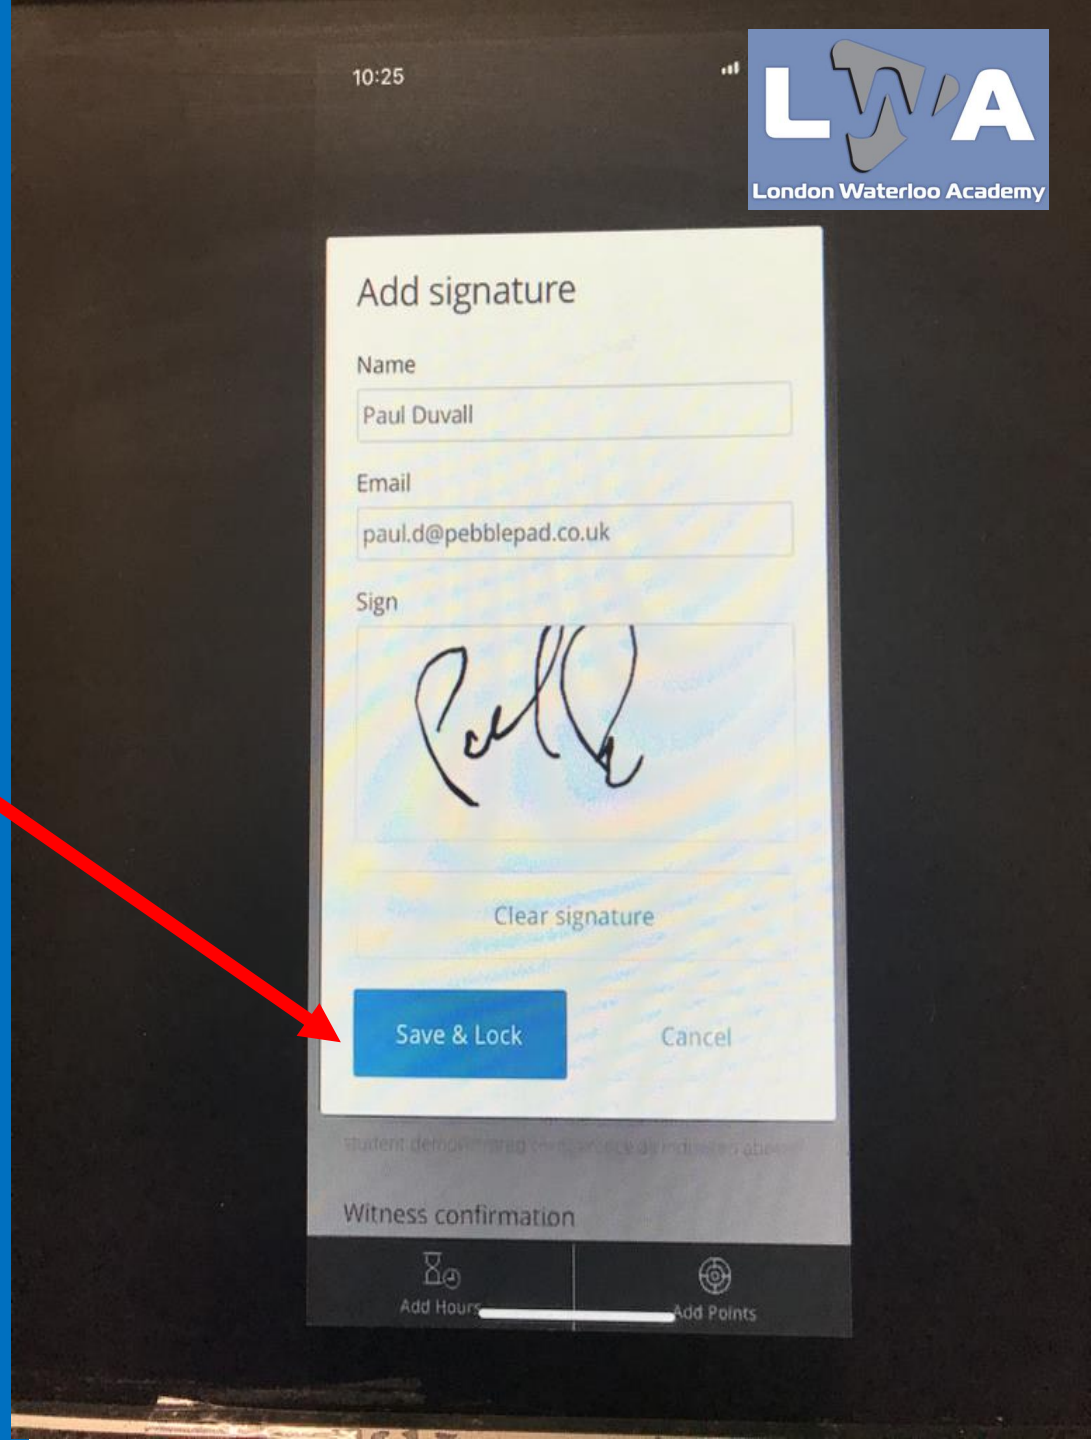
The Witness when they add their e-mail will receive a digest e-mail at the end of the day to show the forms that you have signed off so it can be a useful way of having that audit trail and check things between you and the candidate.

The witness doesn’t have an account with Pebblepad and all they must do is interact with the student in this situation

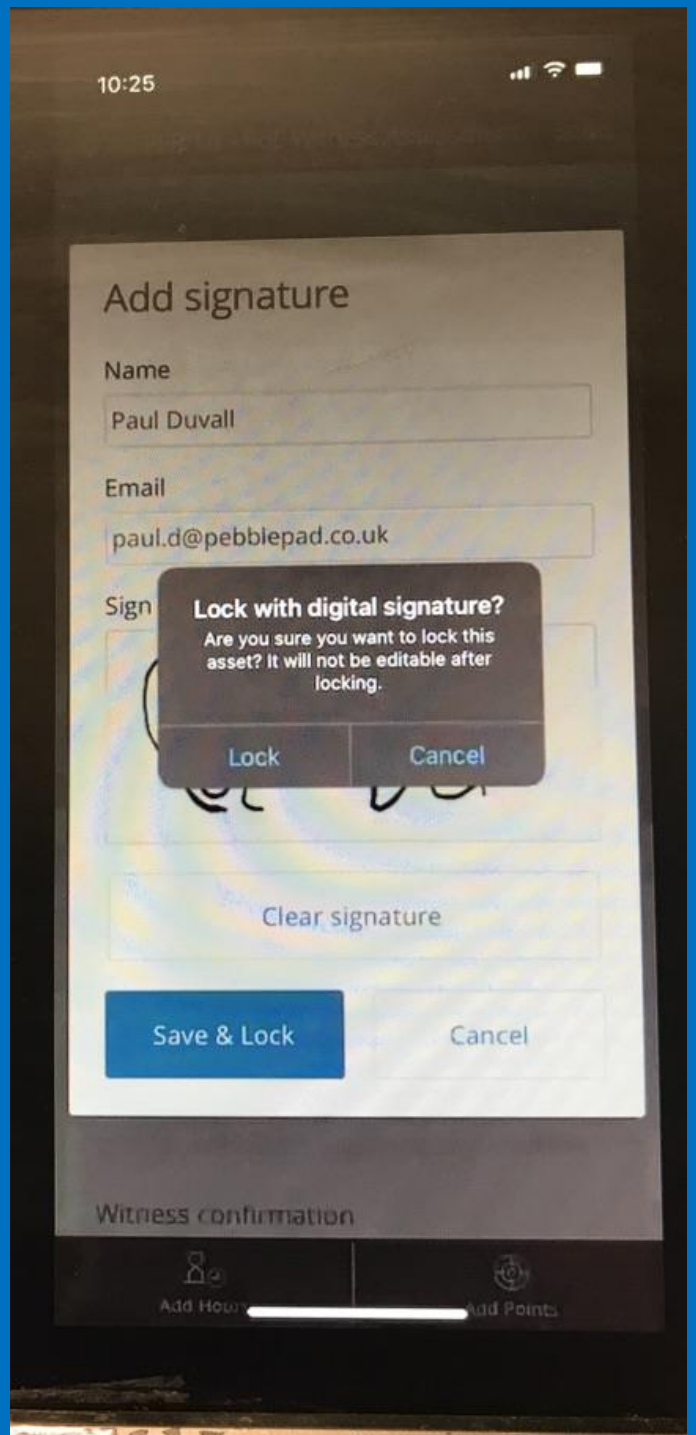
After signing, save and lock. Then it comes up with a message that it’s been locked down because it’s been signed so it prevents further editing at that point.

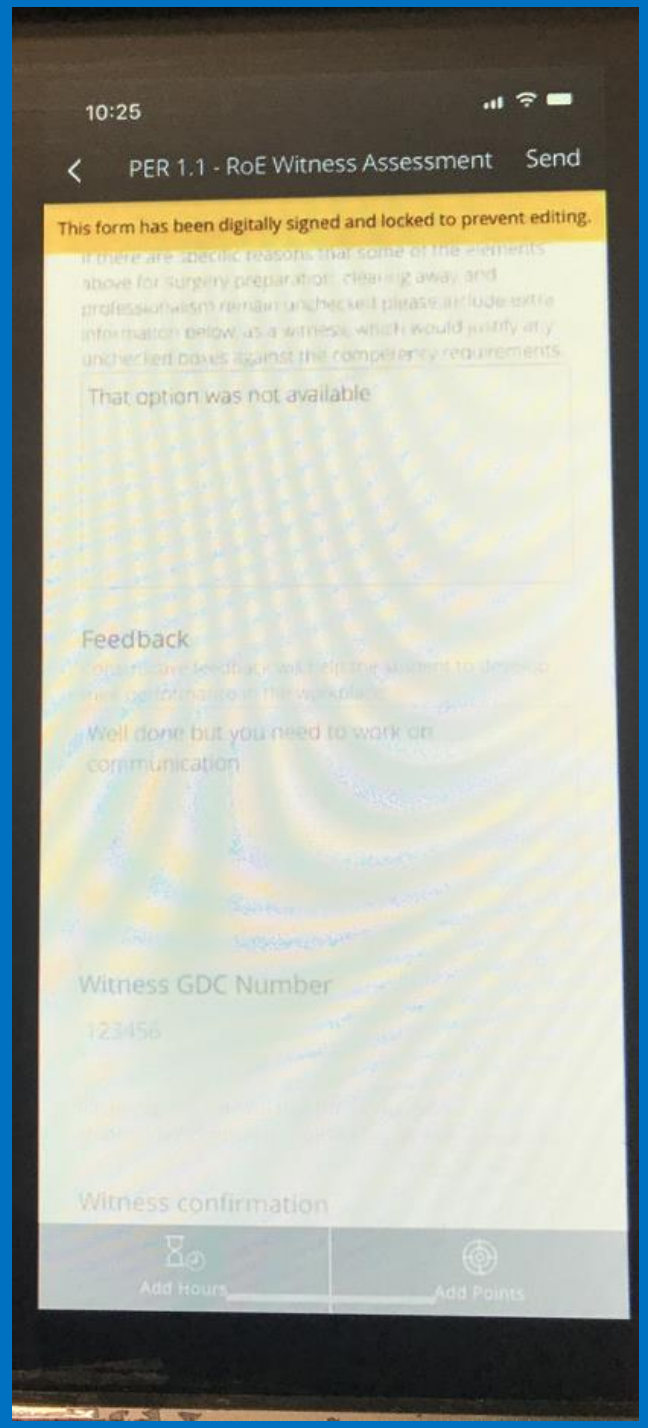


After signing, save and lock. Then it comes up with a message that it's been locked down because it's been signed so it prevents further editing at that point.

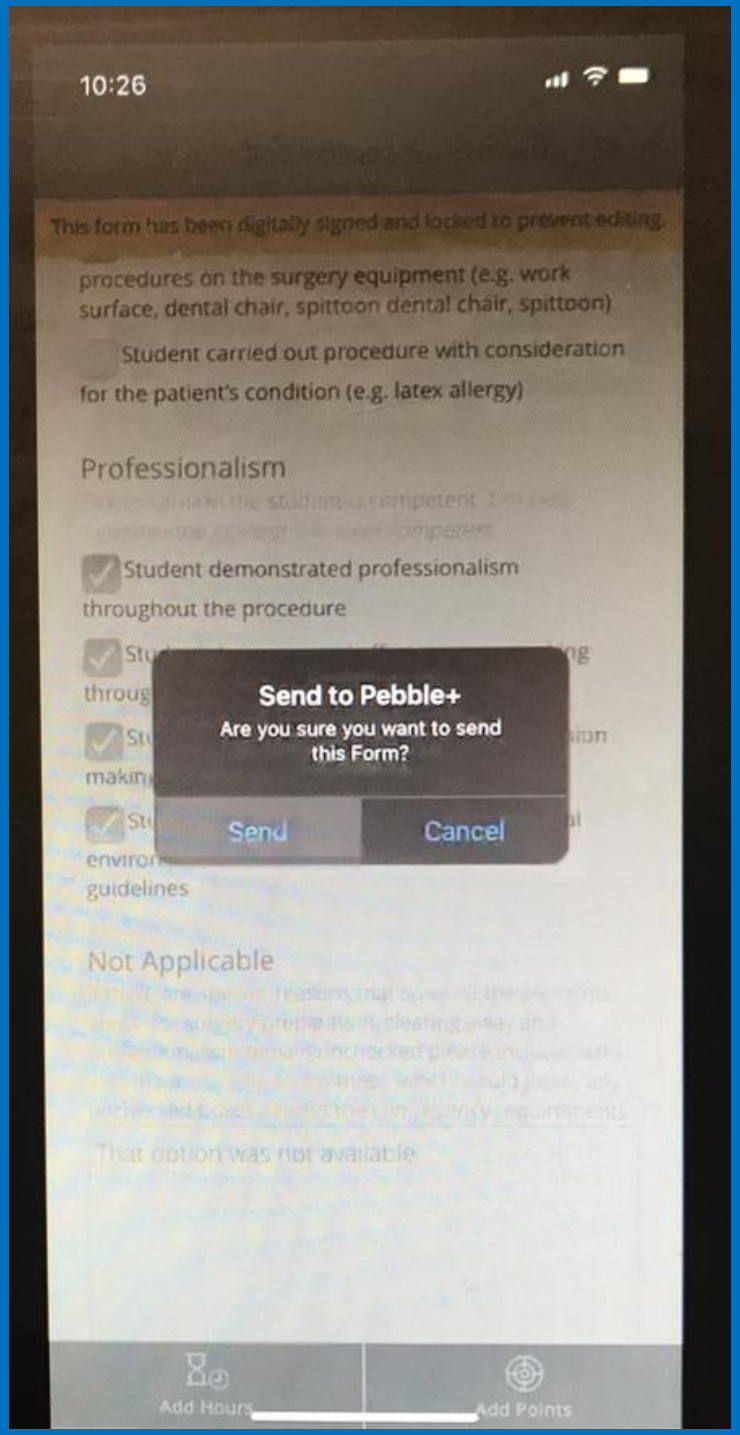


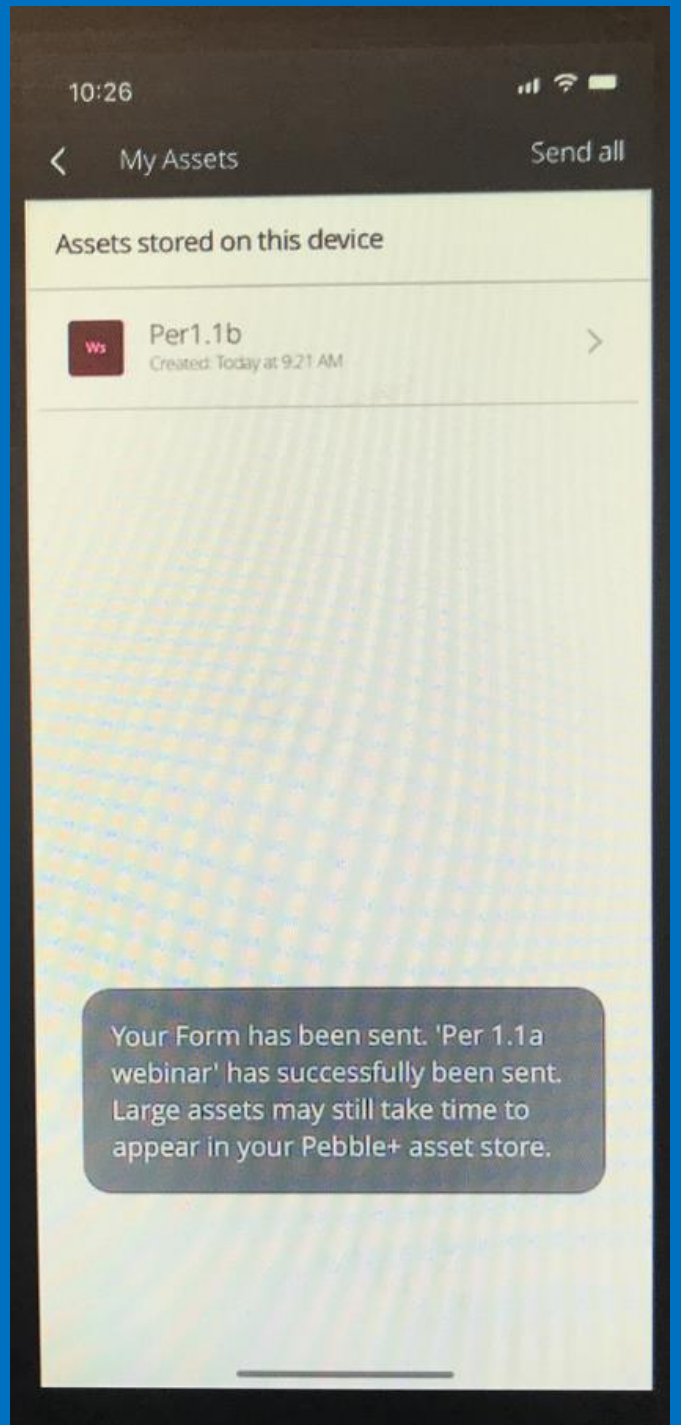
London Waterloo Academy





London Waterloo Academy





At that point, if the student has signal on their phone, they can send it to their online accounts.

If no signal, they can save it and send it when there is a signal later

COMPUTER

A candidate can also complete one of the PERS Witness Assessment forms on the computer

If the dental practice has internet access, they can come into this section and login as candidate and go to resources section on the left hand side.

Then It shows the record of experience and also the different forms that you have in the phone app but can also be accessed in the computer.

London Waterloo Academy

If you go the list and choose 1.1, click on that

Type PER1.1c webinar (give it a title)

Pick the range as normal

Select the date as normal

It's the same thing that they have just done on the phone but its going to be on the computer instead

Tick the boxes

Done in the presence of the witness so the witness does it themselves when the student is logged in

Write feedback

GDC number

Add signature and instead of signing on the phone, you sign on the actual computer

Print name

Enter e-mail address

Sign

Confirm signature

Confirm and lock it down

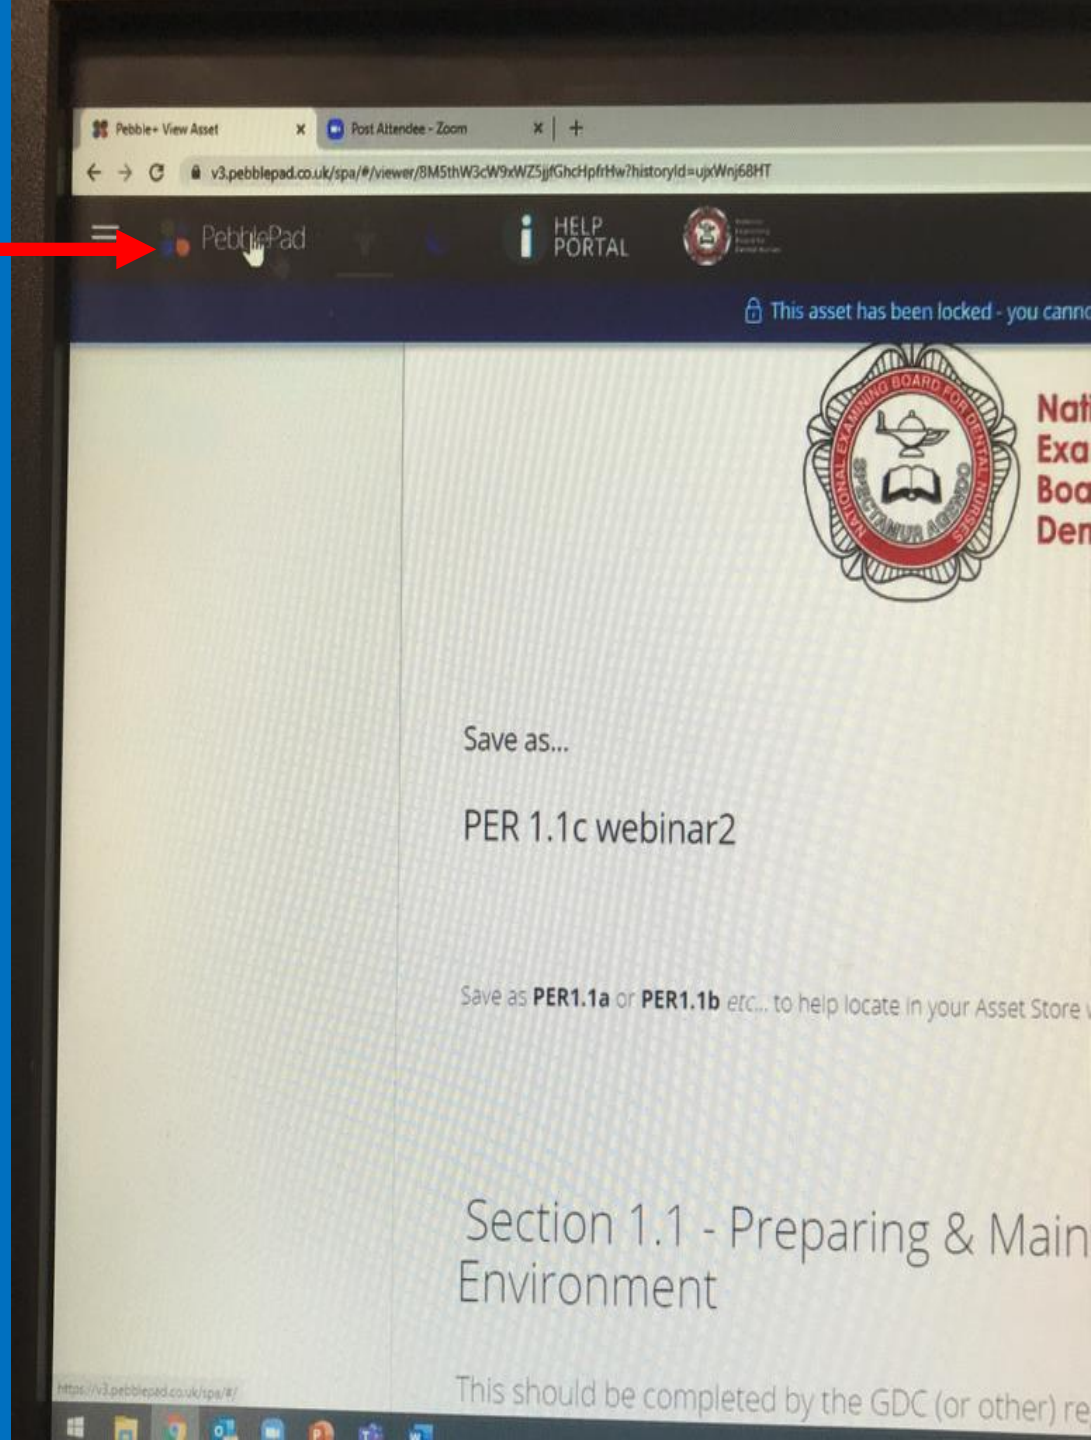
And then its saved

And it shows it's been locked (the asset) - and you cannot make further edits

London Waterloo Academy

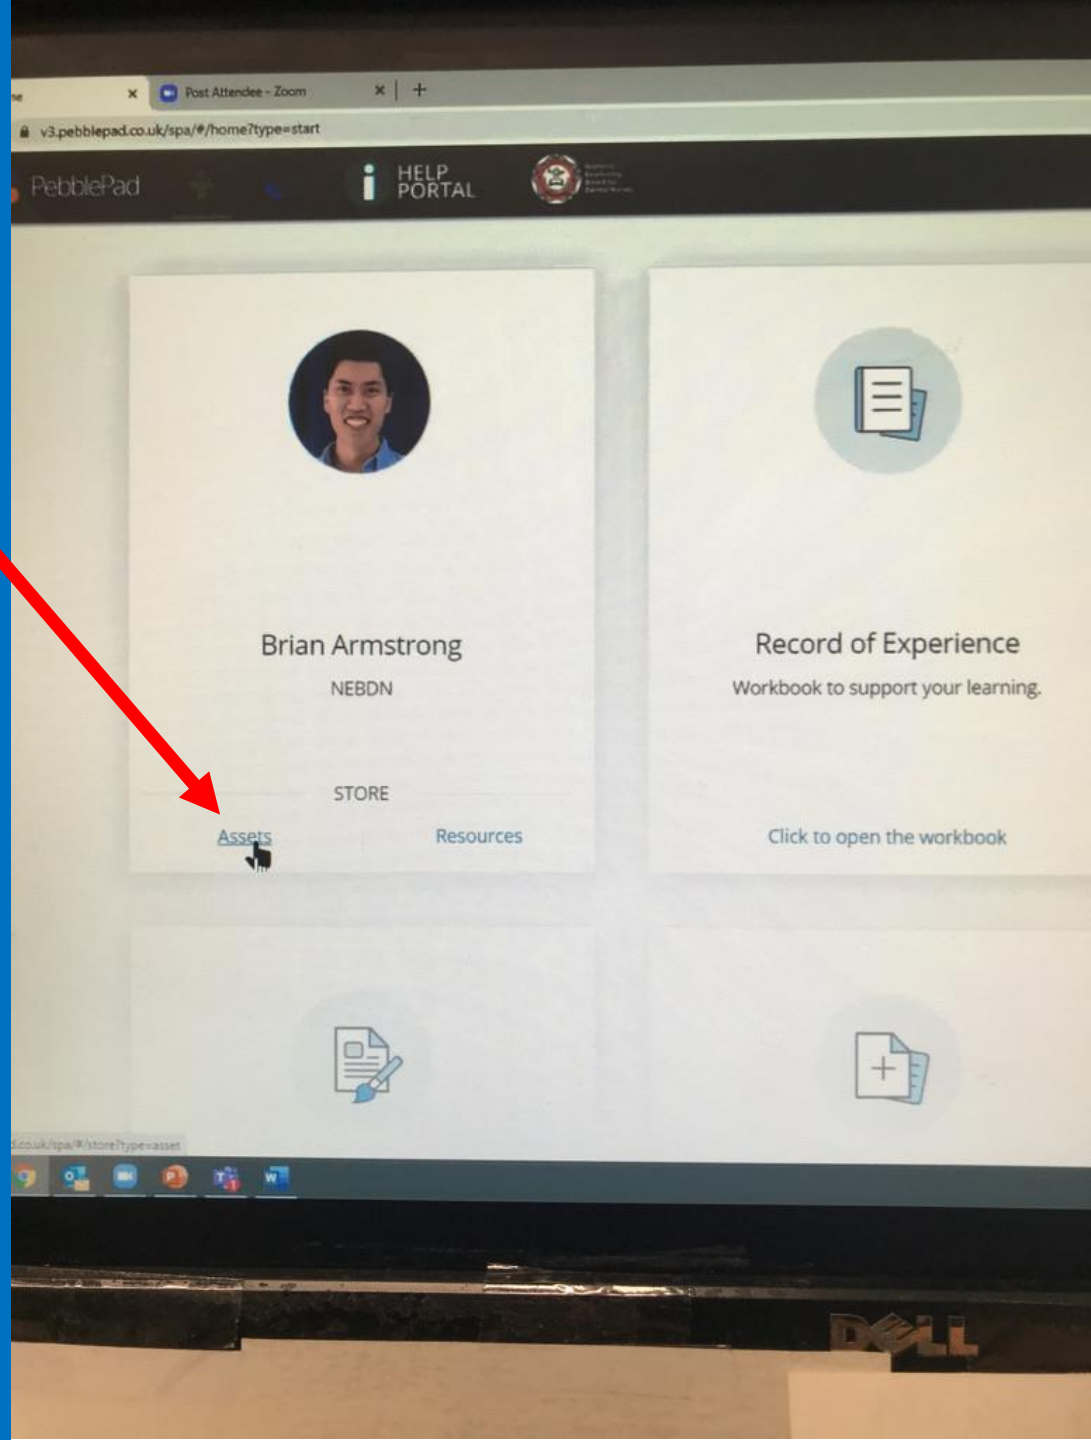
Go to Pebblepad logo

You get back to the home screen that you see when you log in



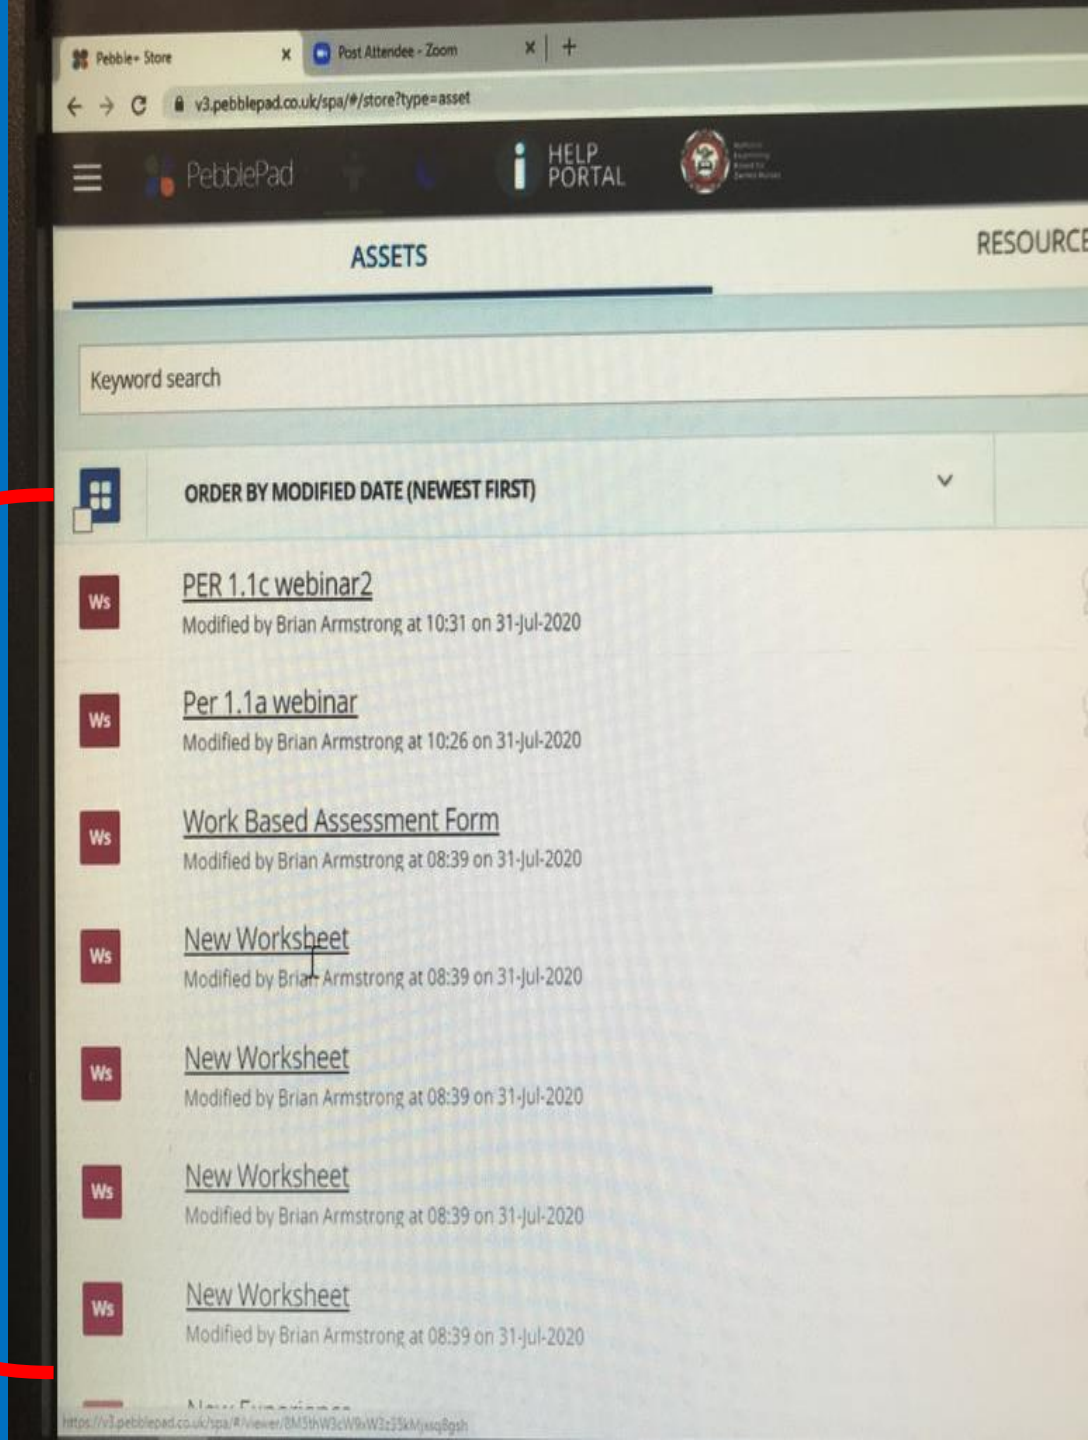
London Waterloo Academy

Then go to assets section, you will see are any of the forms that have been sent through



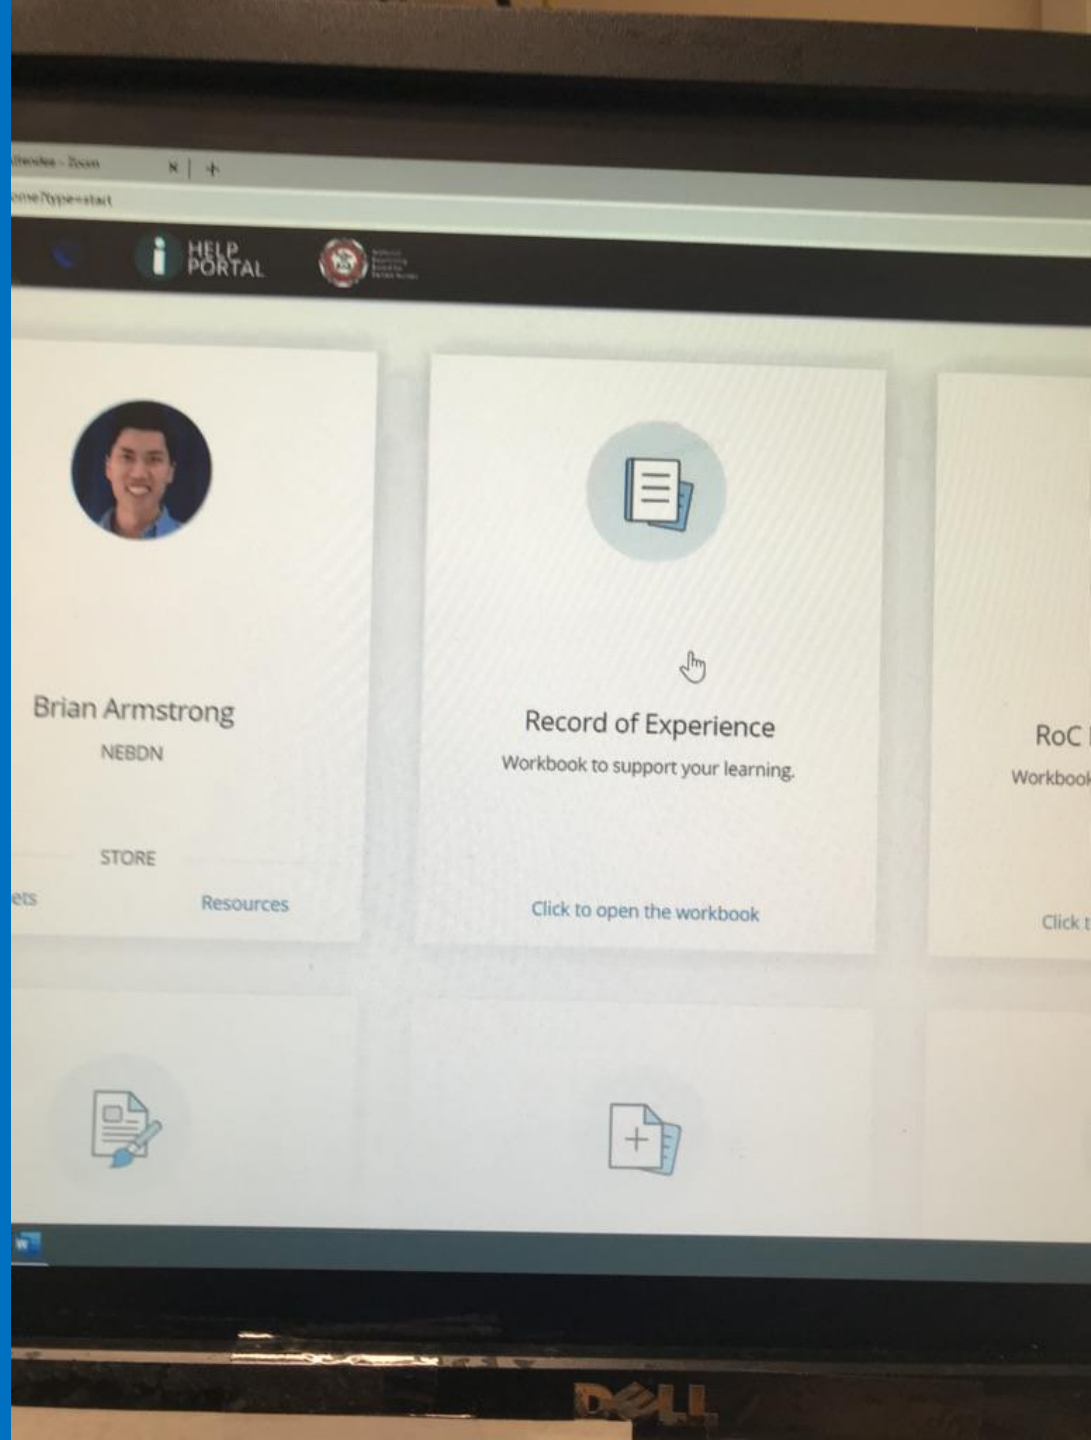
London Waterloo Academy

Forms has come through as signed off evidence that you can use



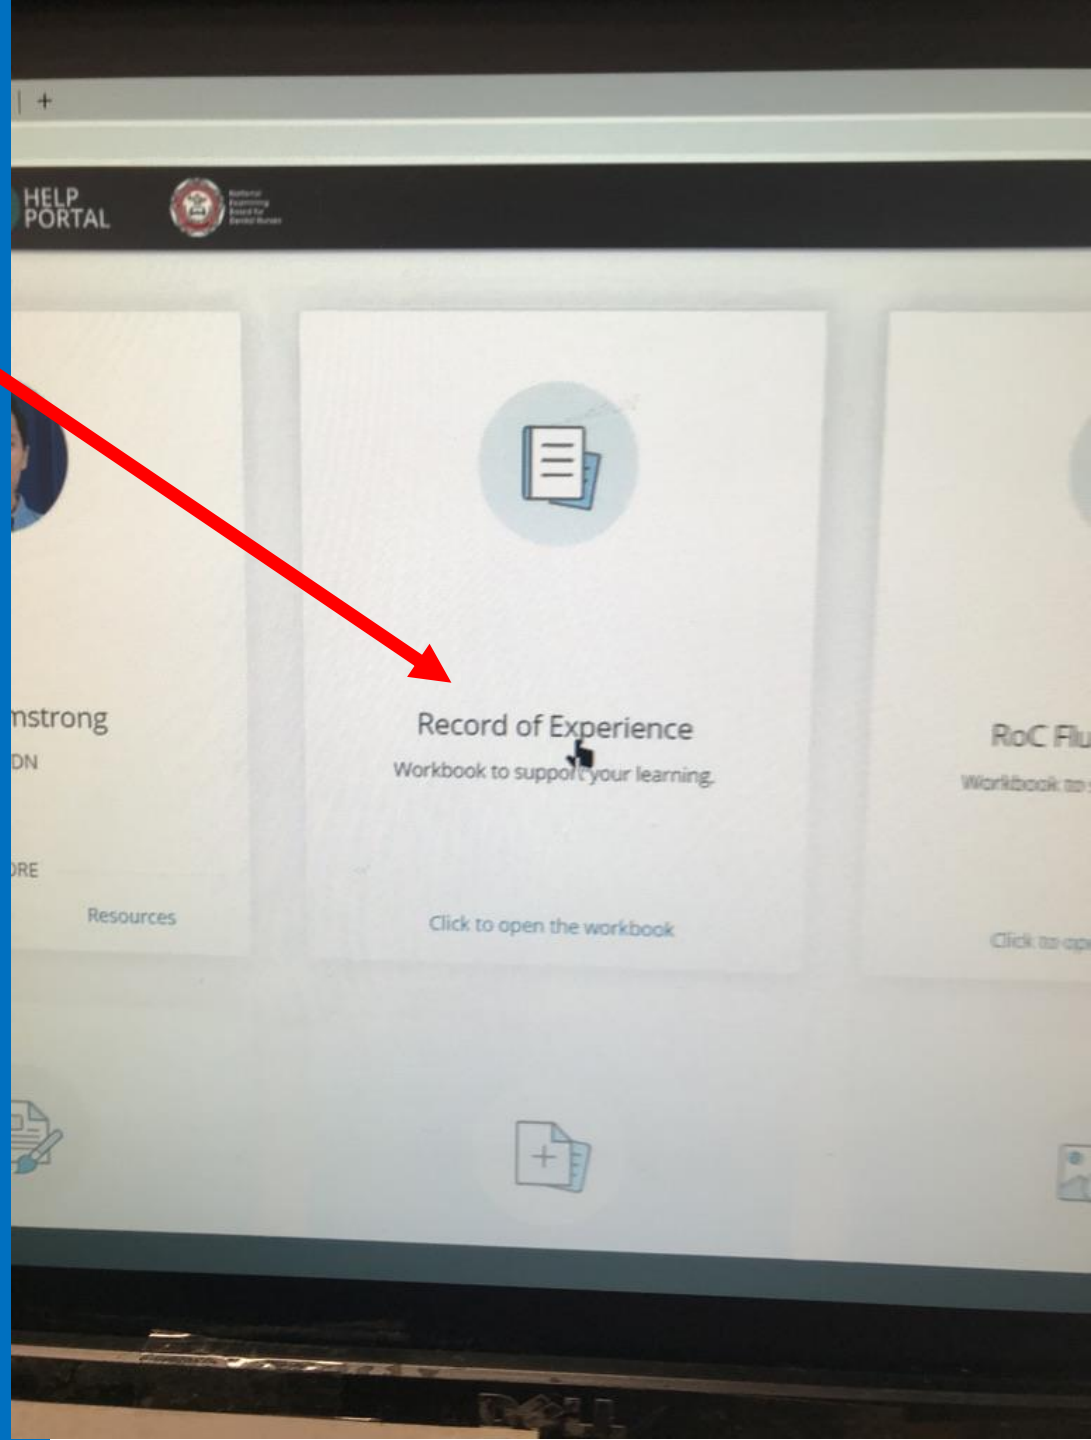
London Waterloo Academy

Go back to home screen



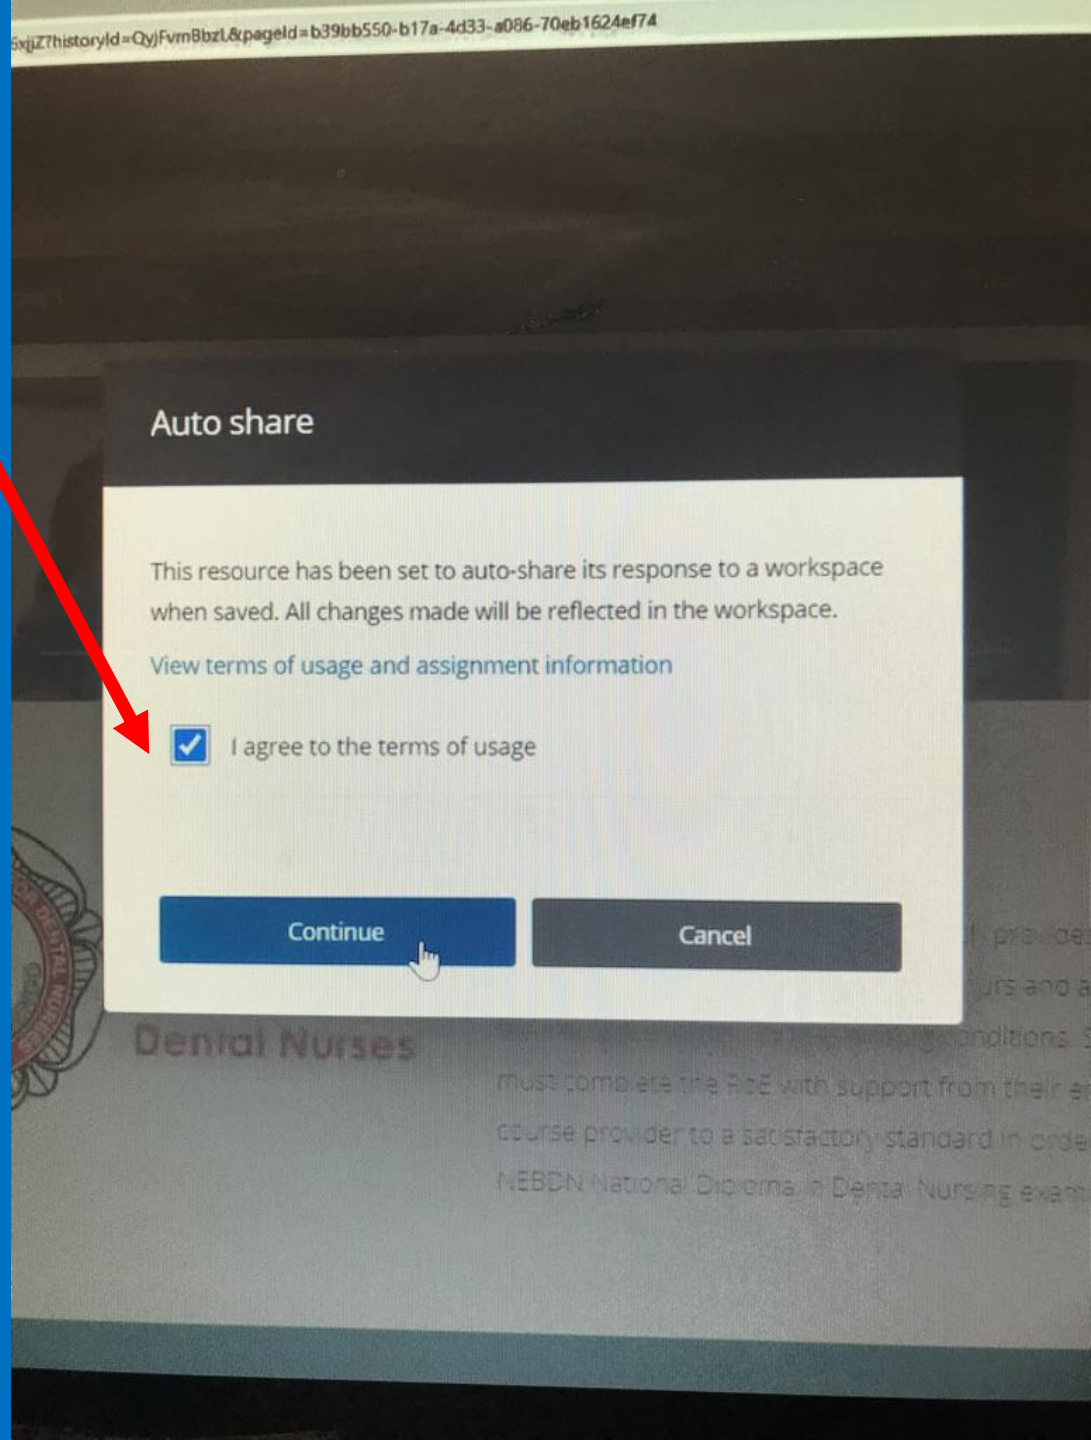
Open the record of experience tile

Click on it and it opens up the workbook



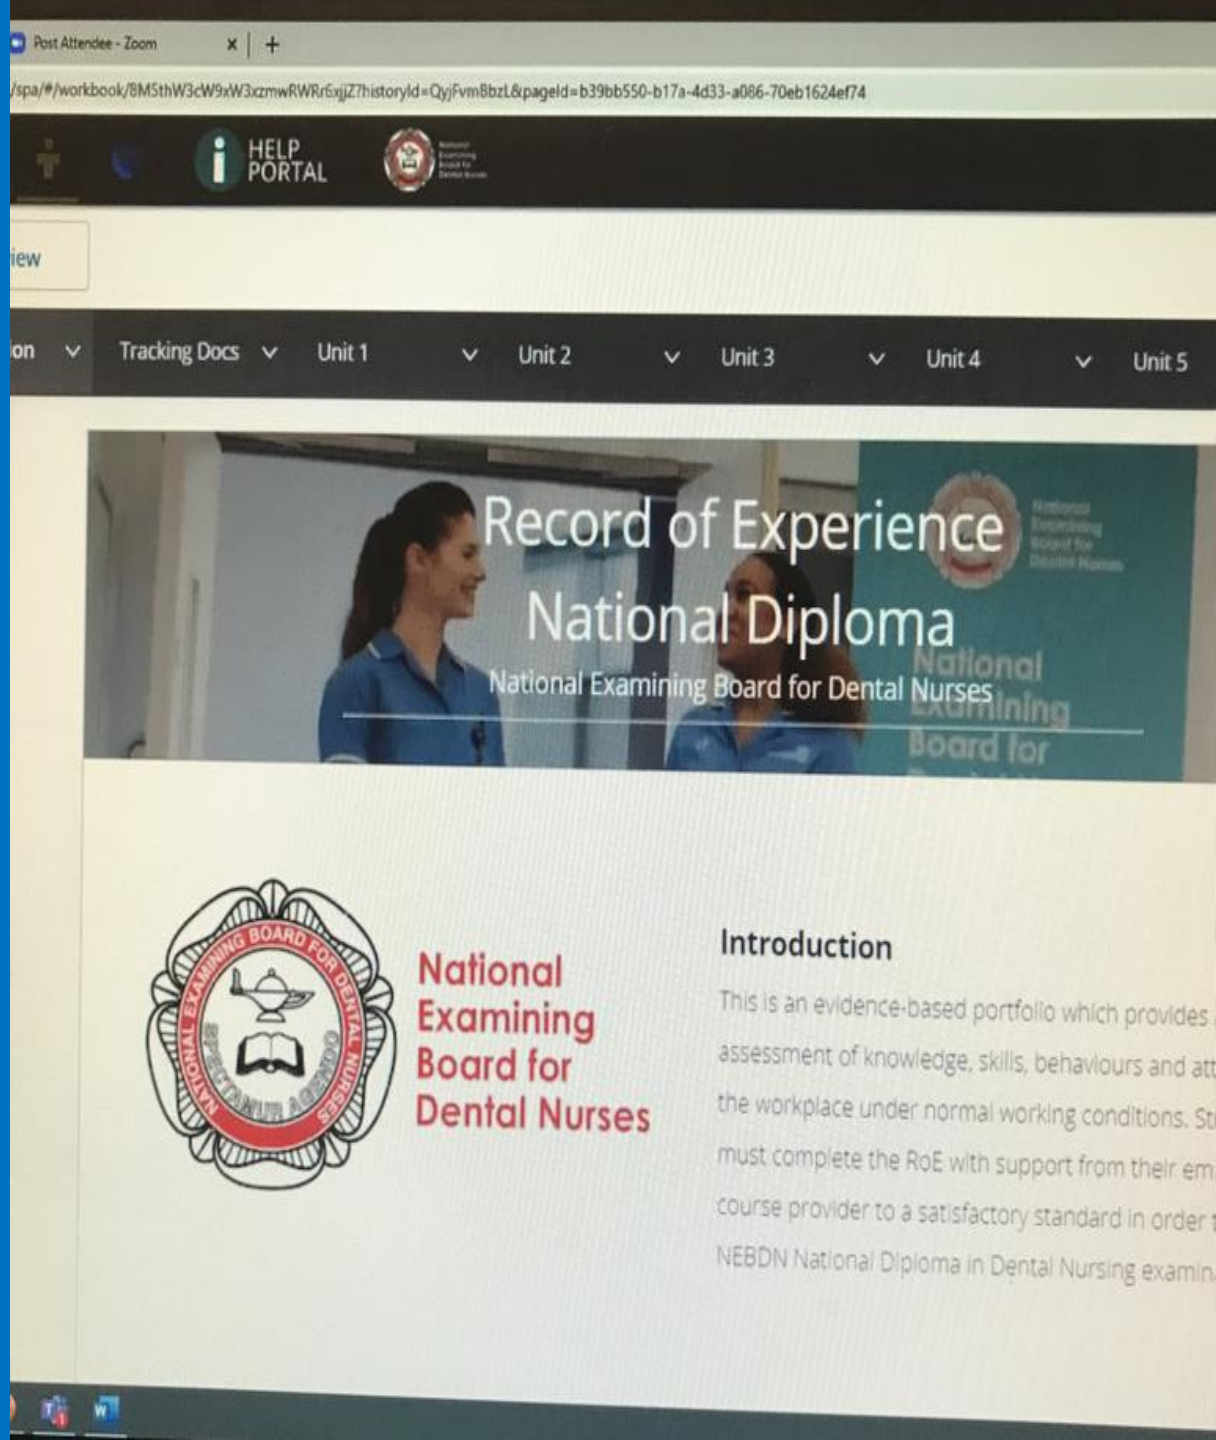
London Waterloo Academy

Tick “I agree” to the terms of usage



London Waterloo Academy

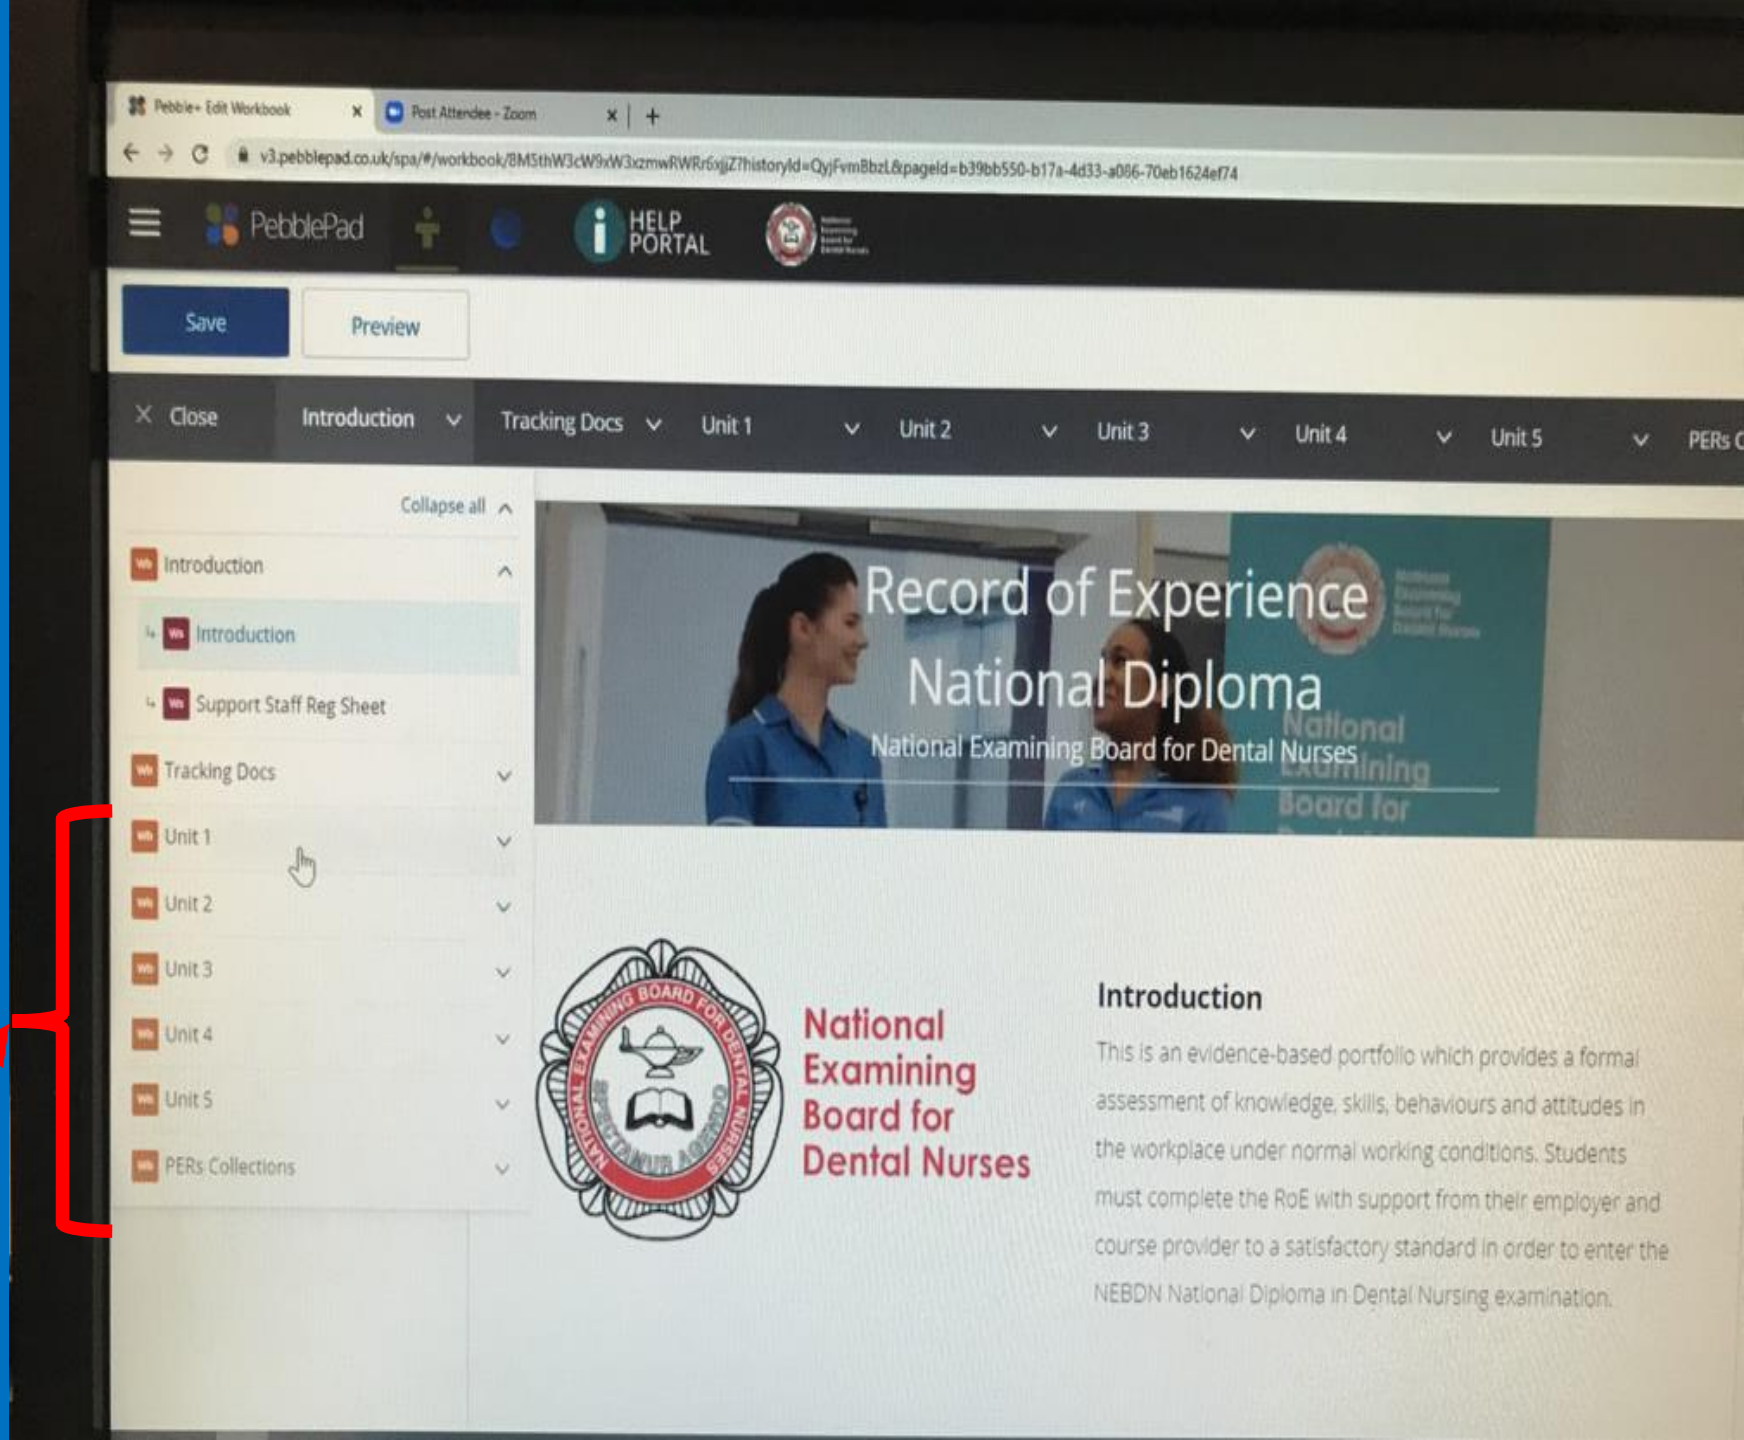
And then the whole workbook is available for the student



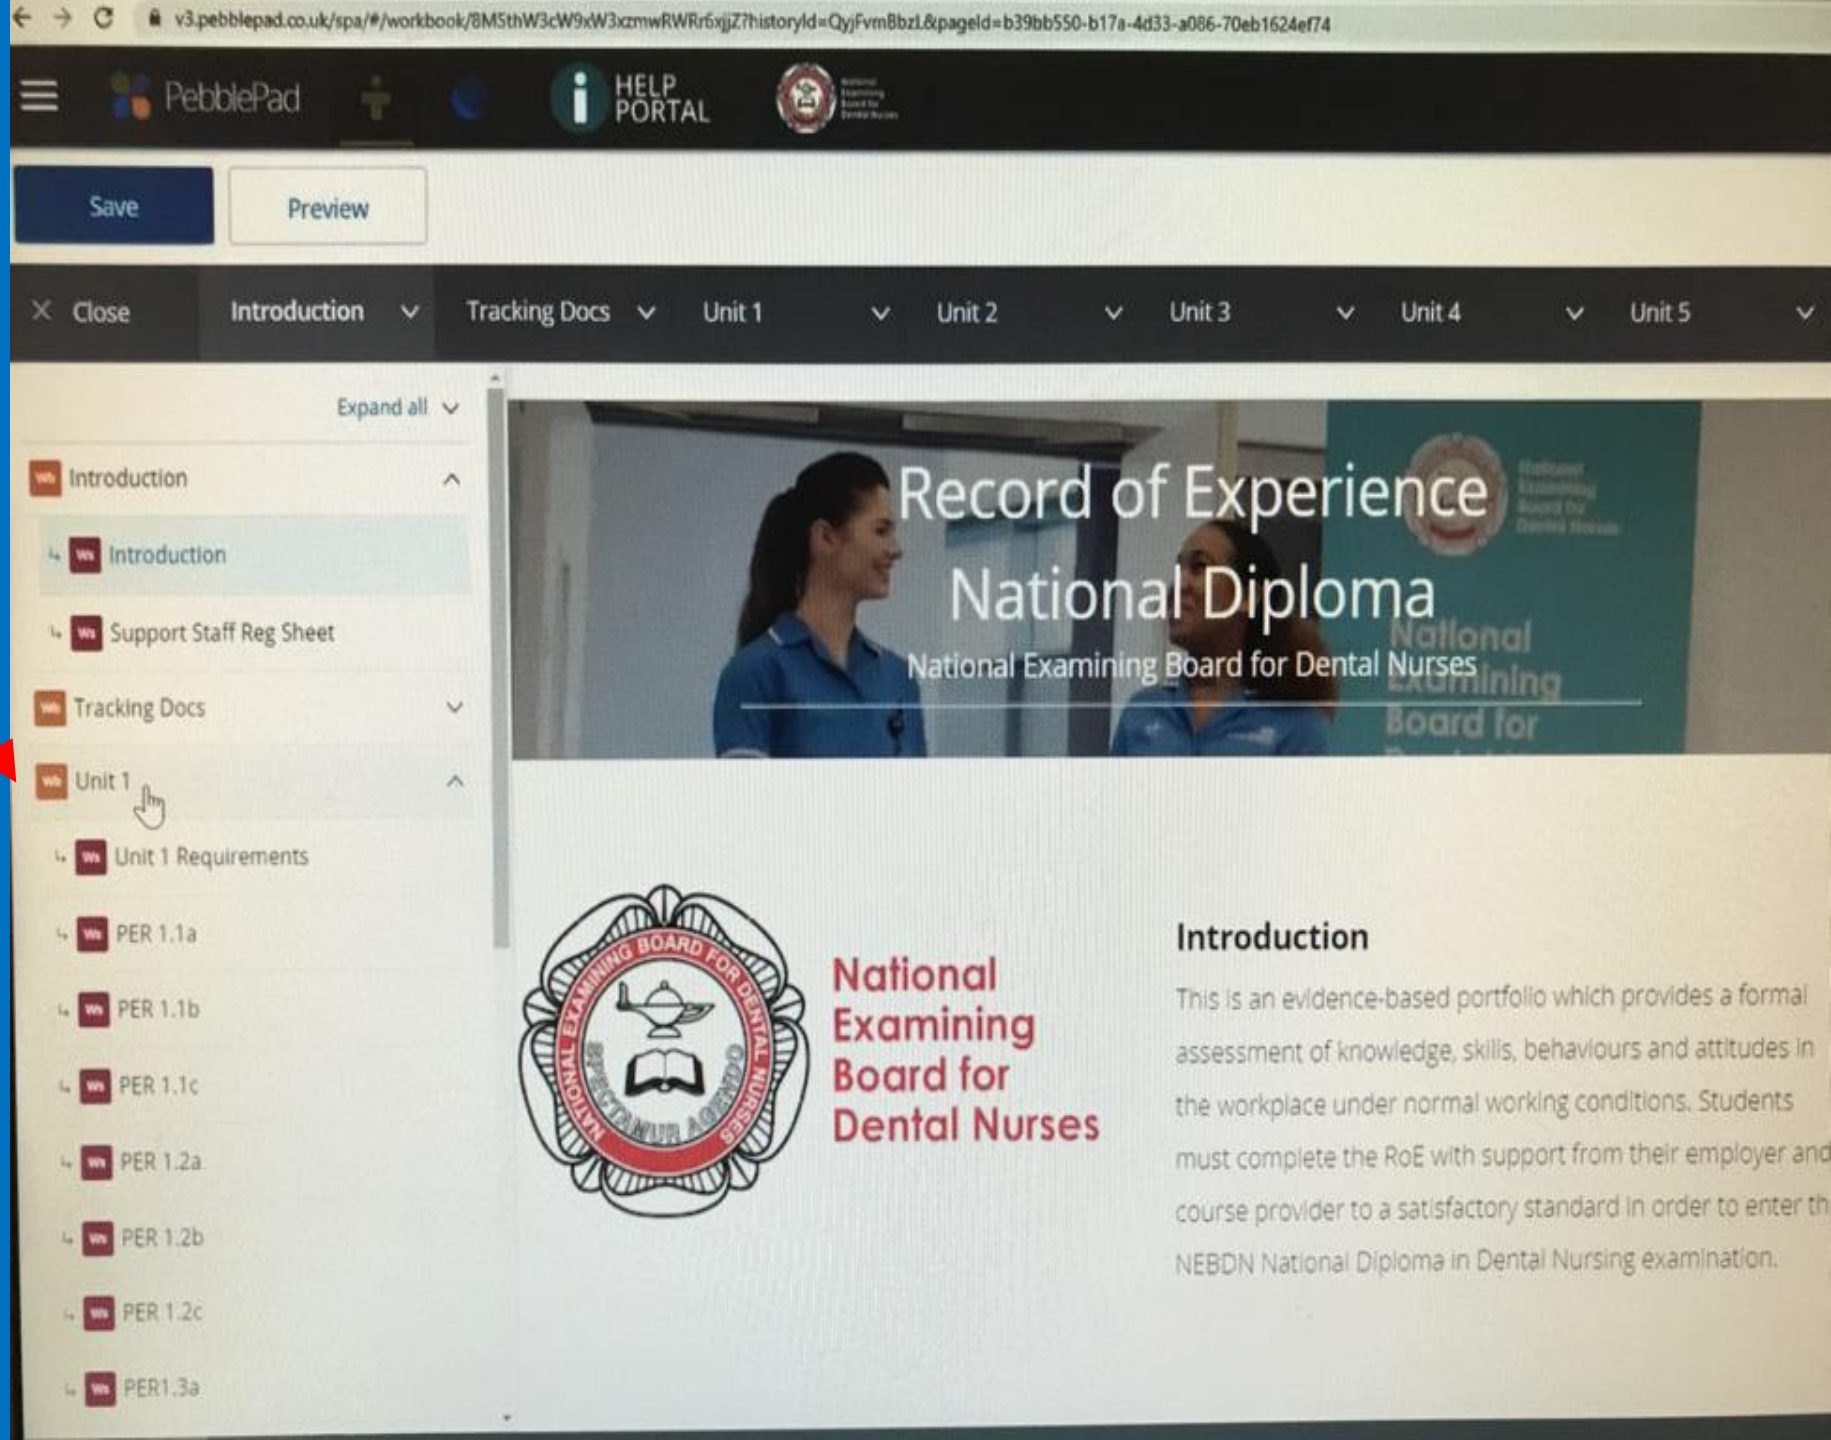
London Waterloo Academy

London Waterloo Academy

The content looks very much like website broken by the different units



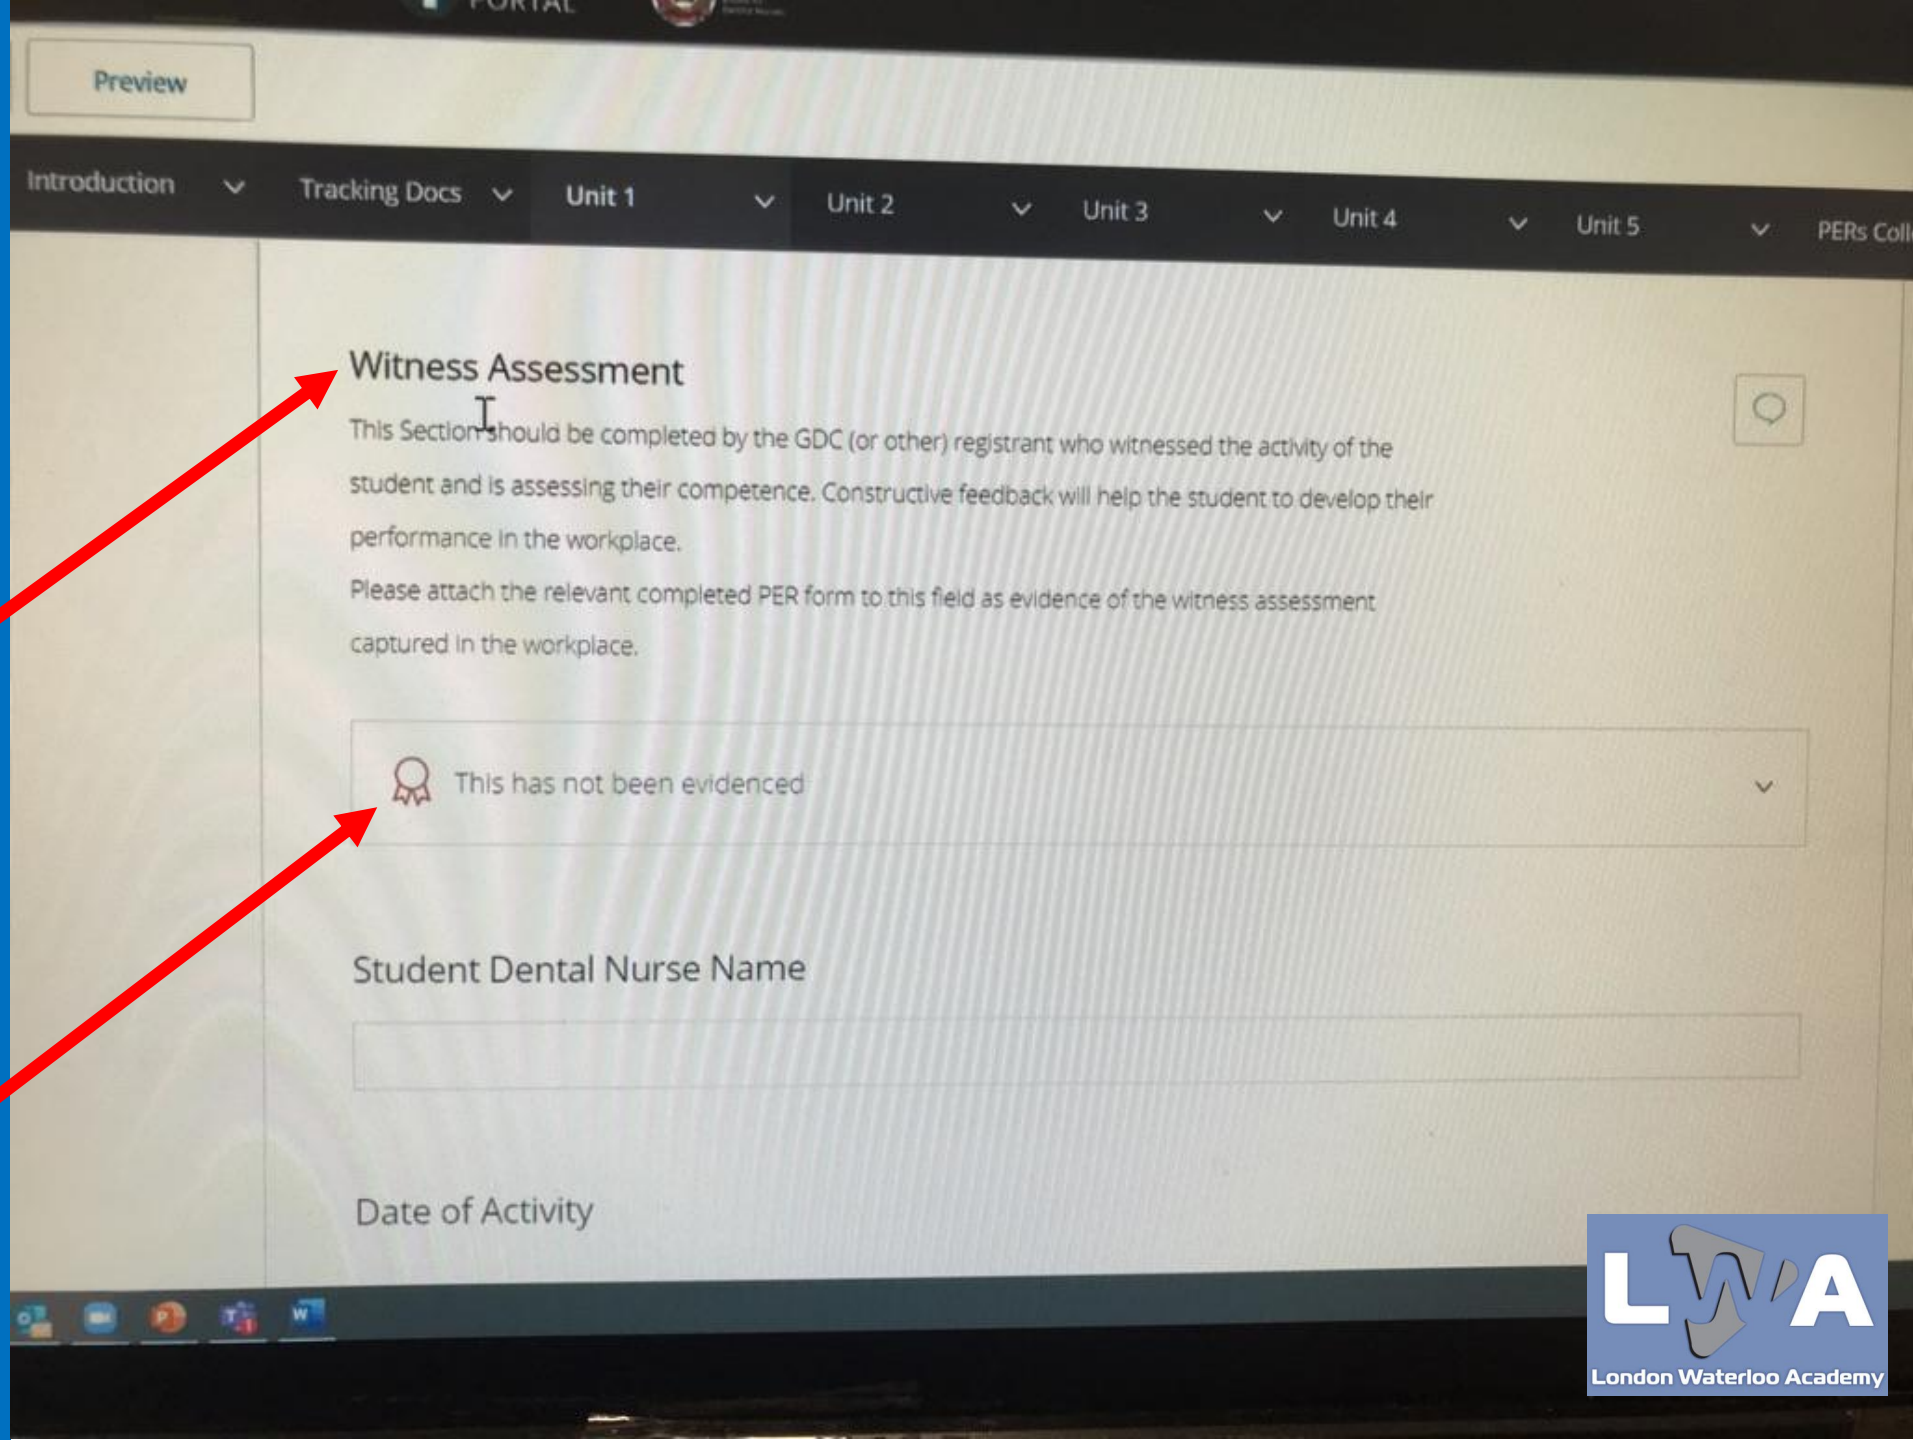
In unit 1 there is a requirements page outlining what you need to do as candidate for each of the units mapped out clearly



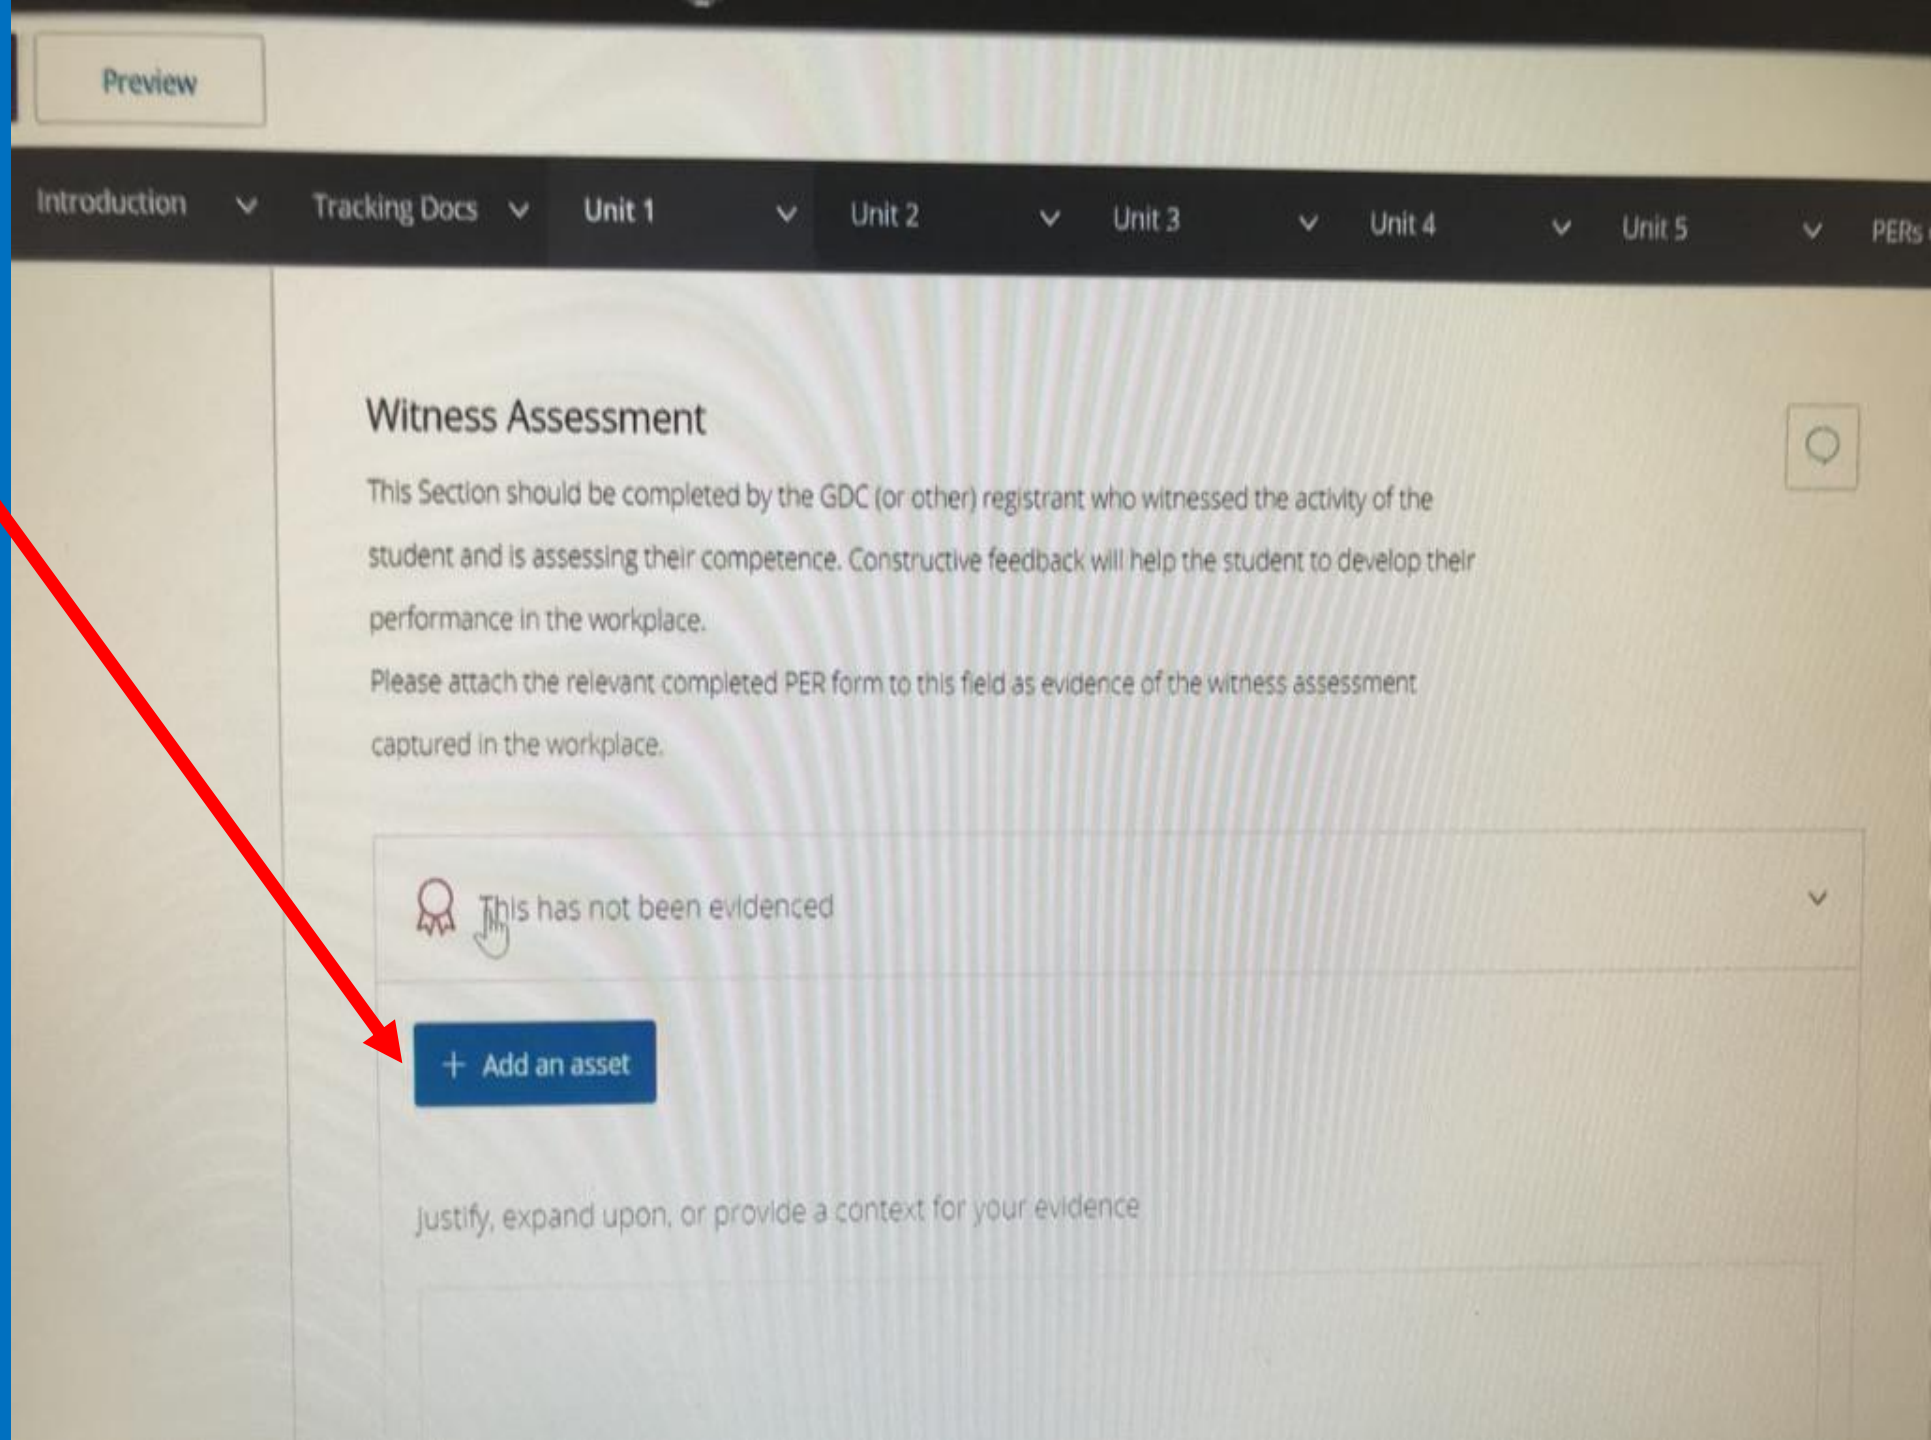
London Waterloo Academy

Per1.1.a for instance, now they've got the evidence signed off and locked down, the top section of the page is the witness assessment section

It basically says that you have to attach evidence in this space

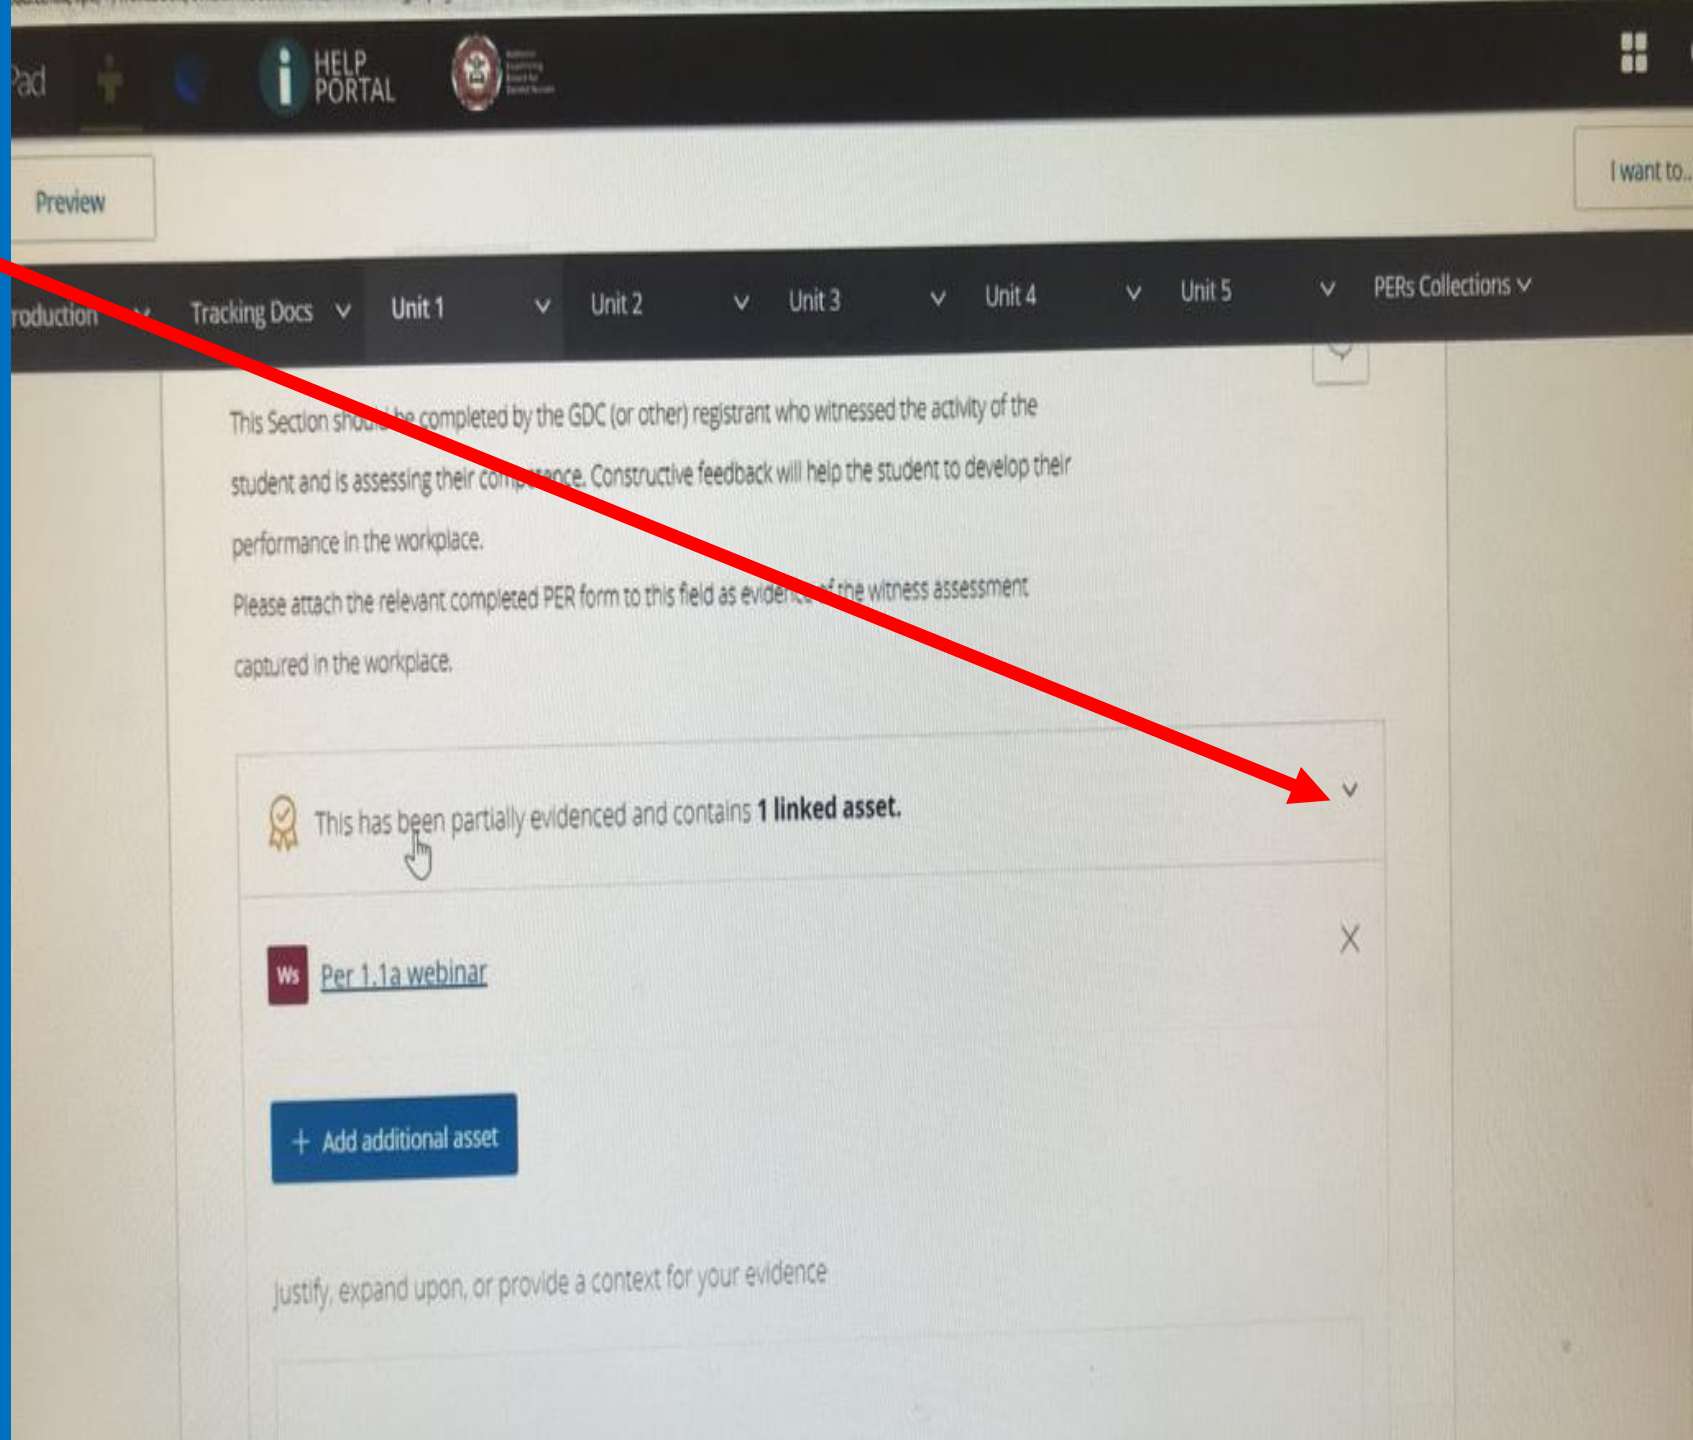


Add an asset



London Waterloo Academy

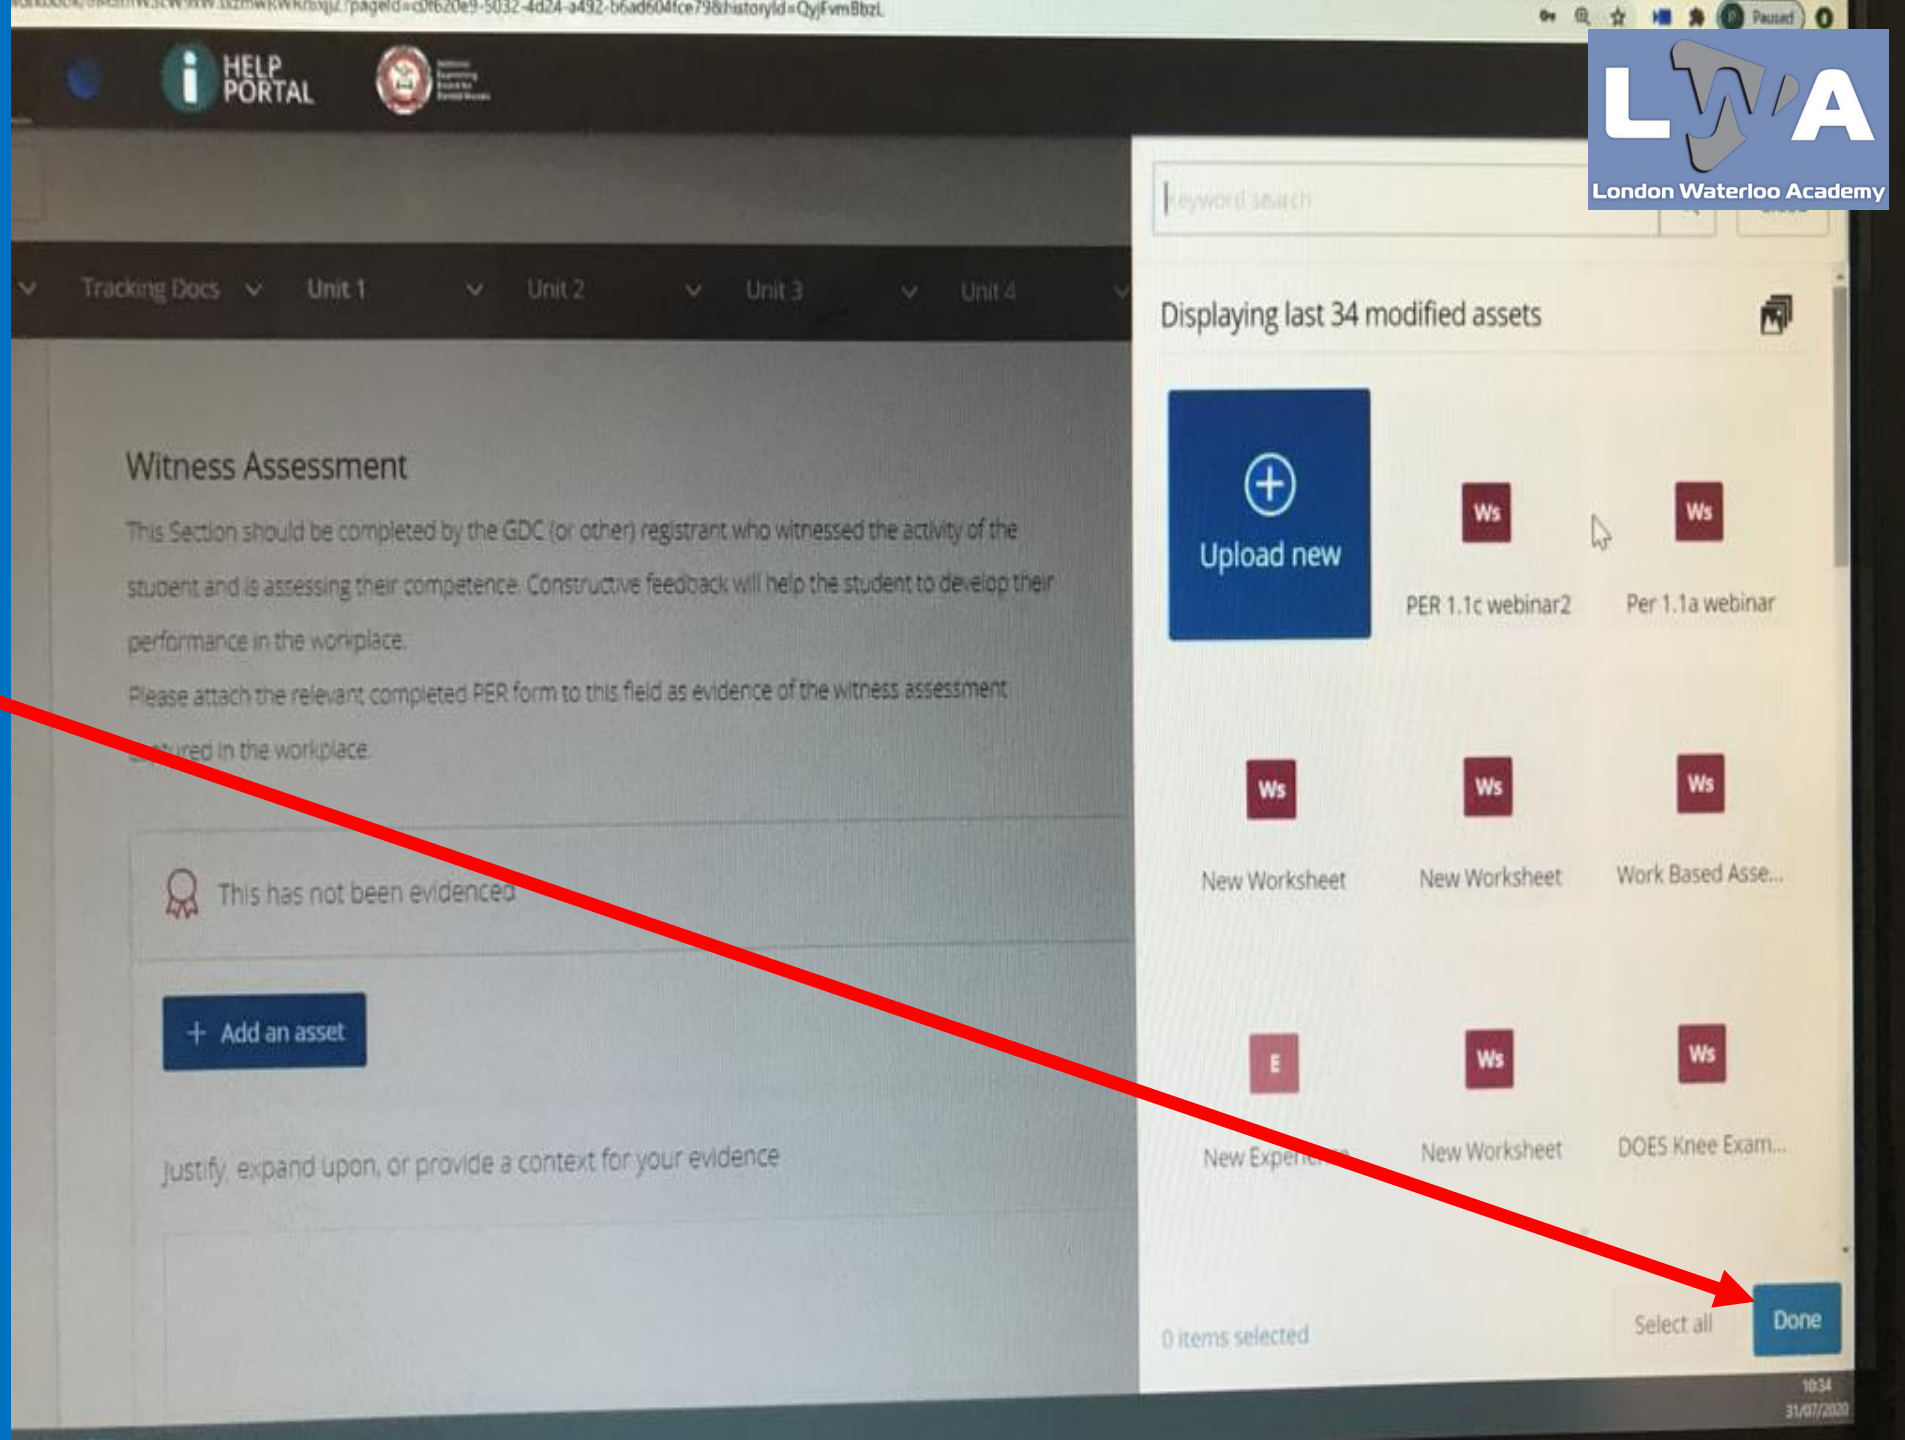
Whatever is in the asset stored, per1.1.web



London Waterloo Academy

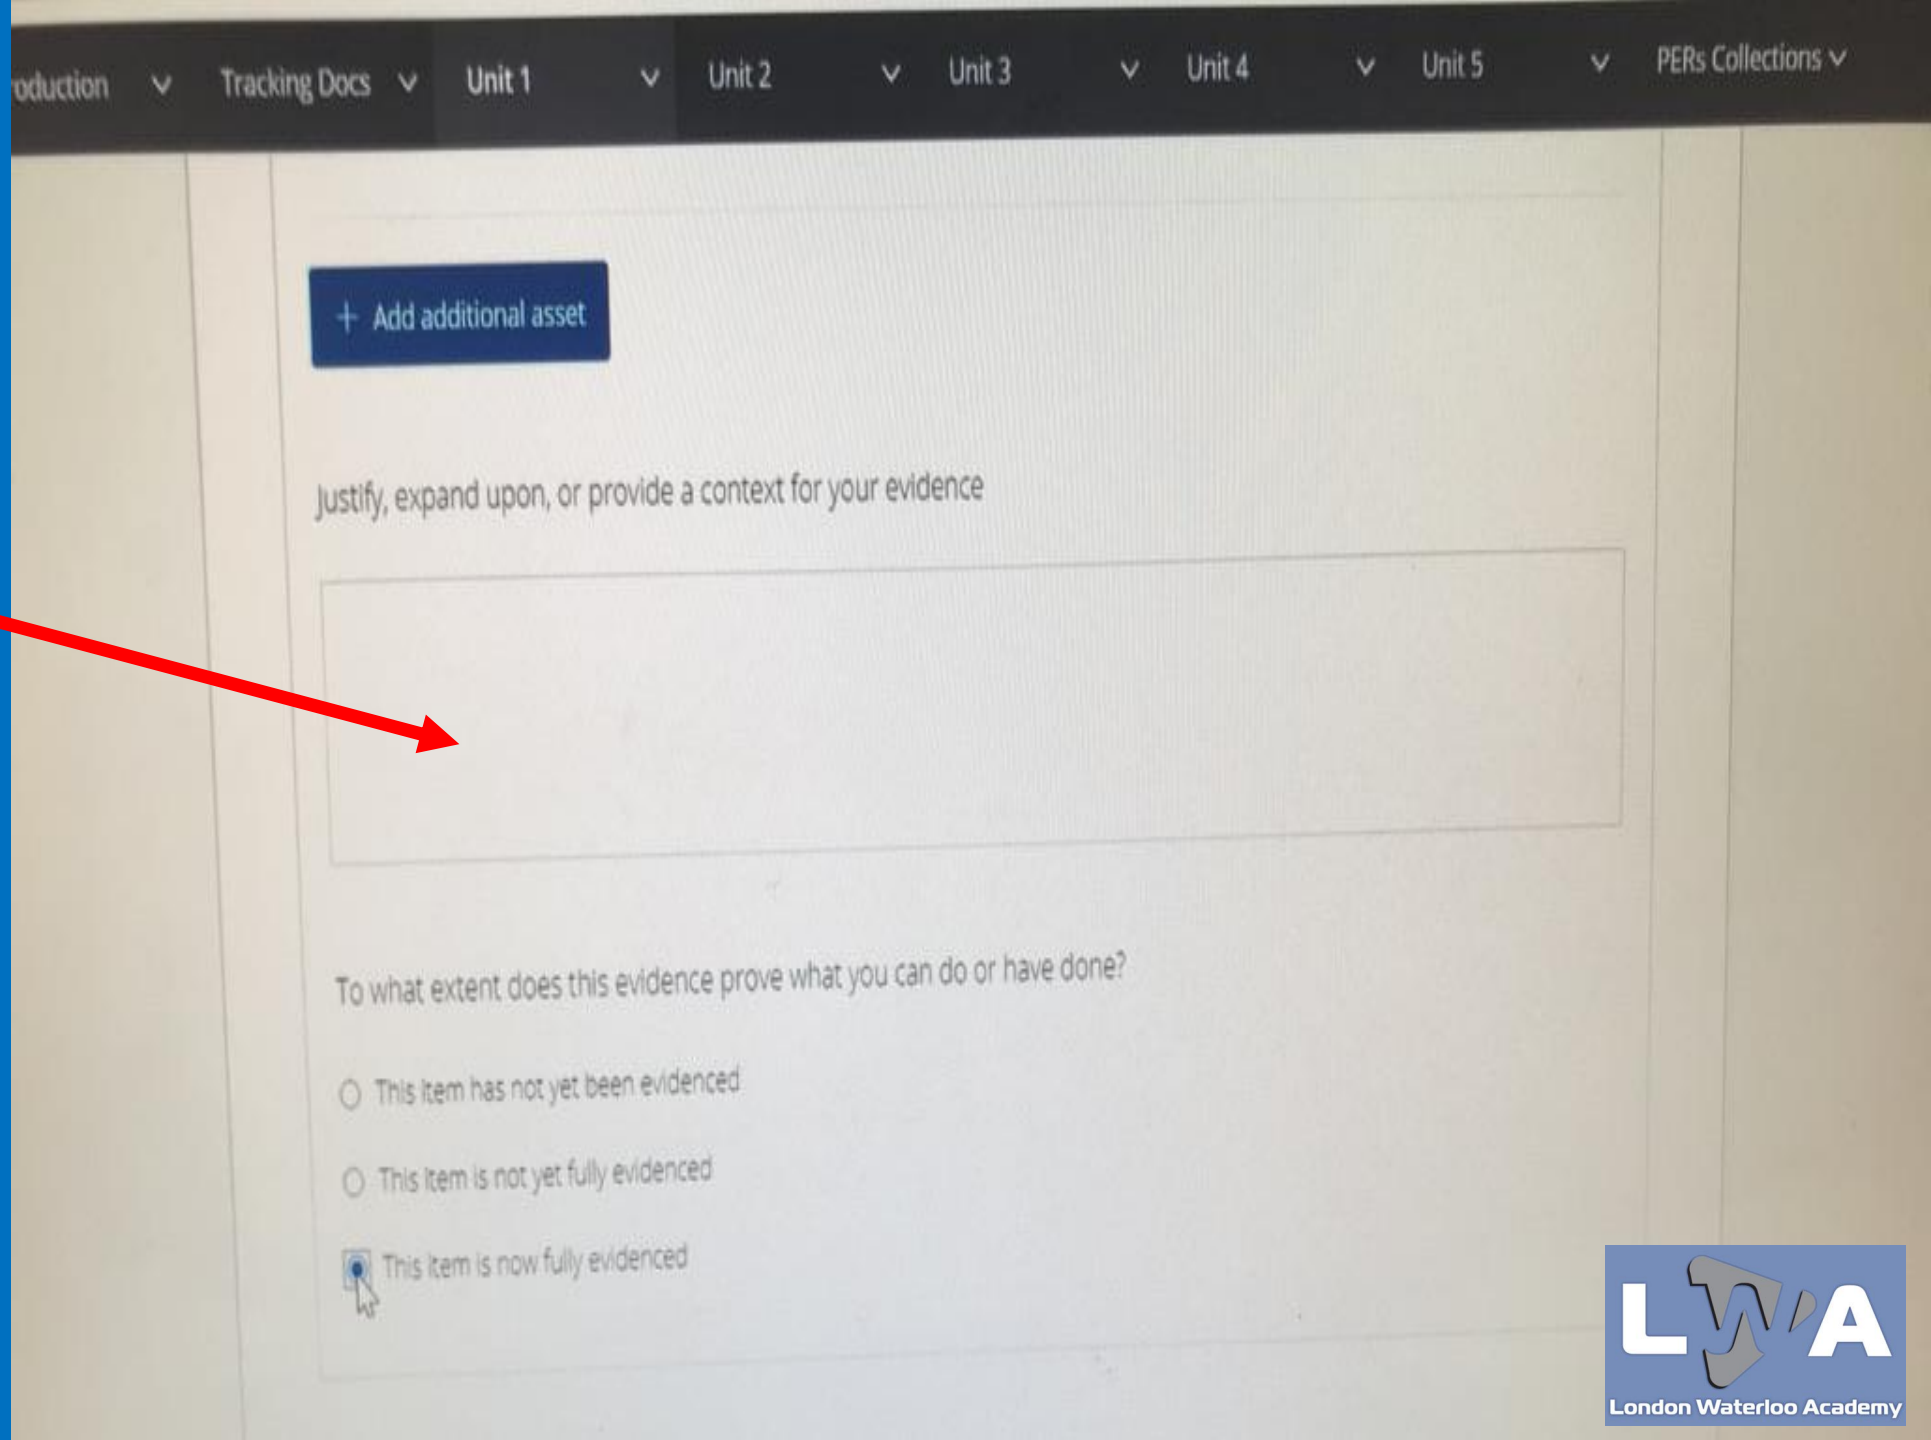
Select then click done

And it drops into this section



The student can write a note about it if they want to

They can then say it is fully evidenced at that point

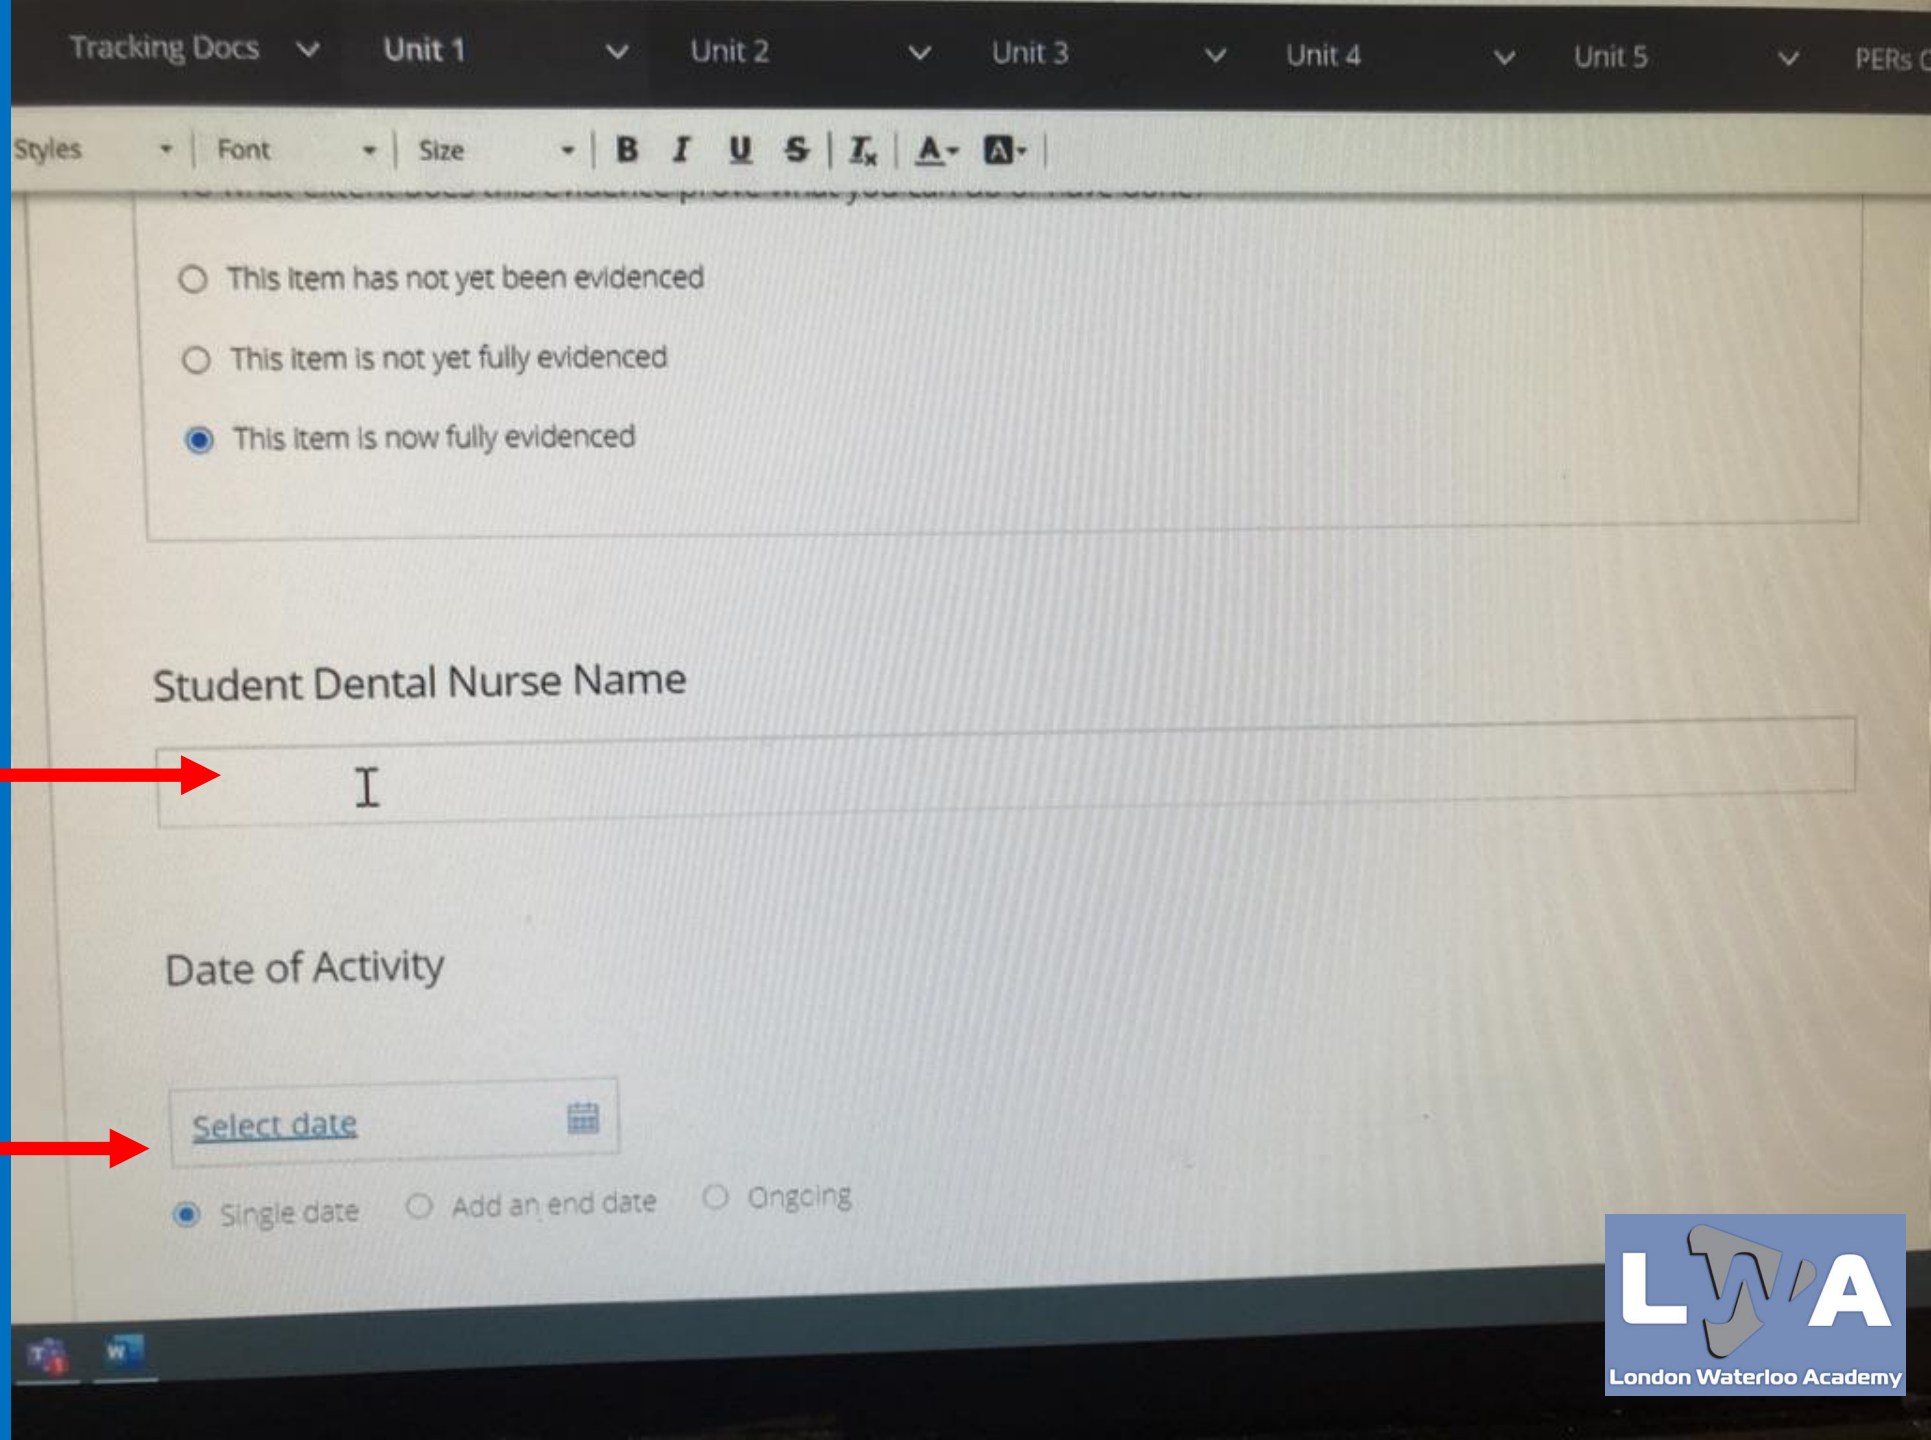


London Waterloo Academy

The candidate fills the

Student name

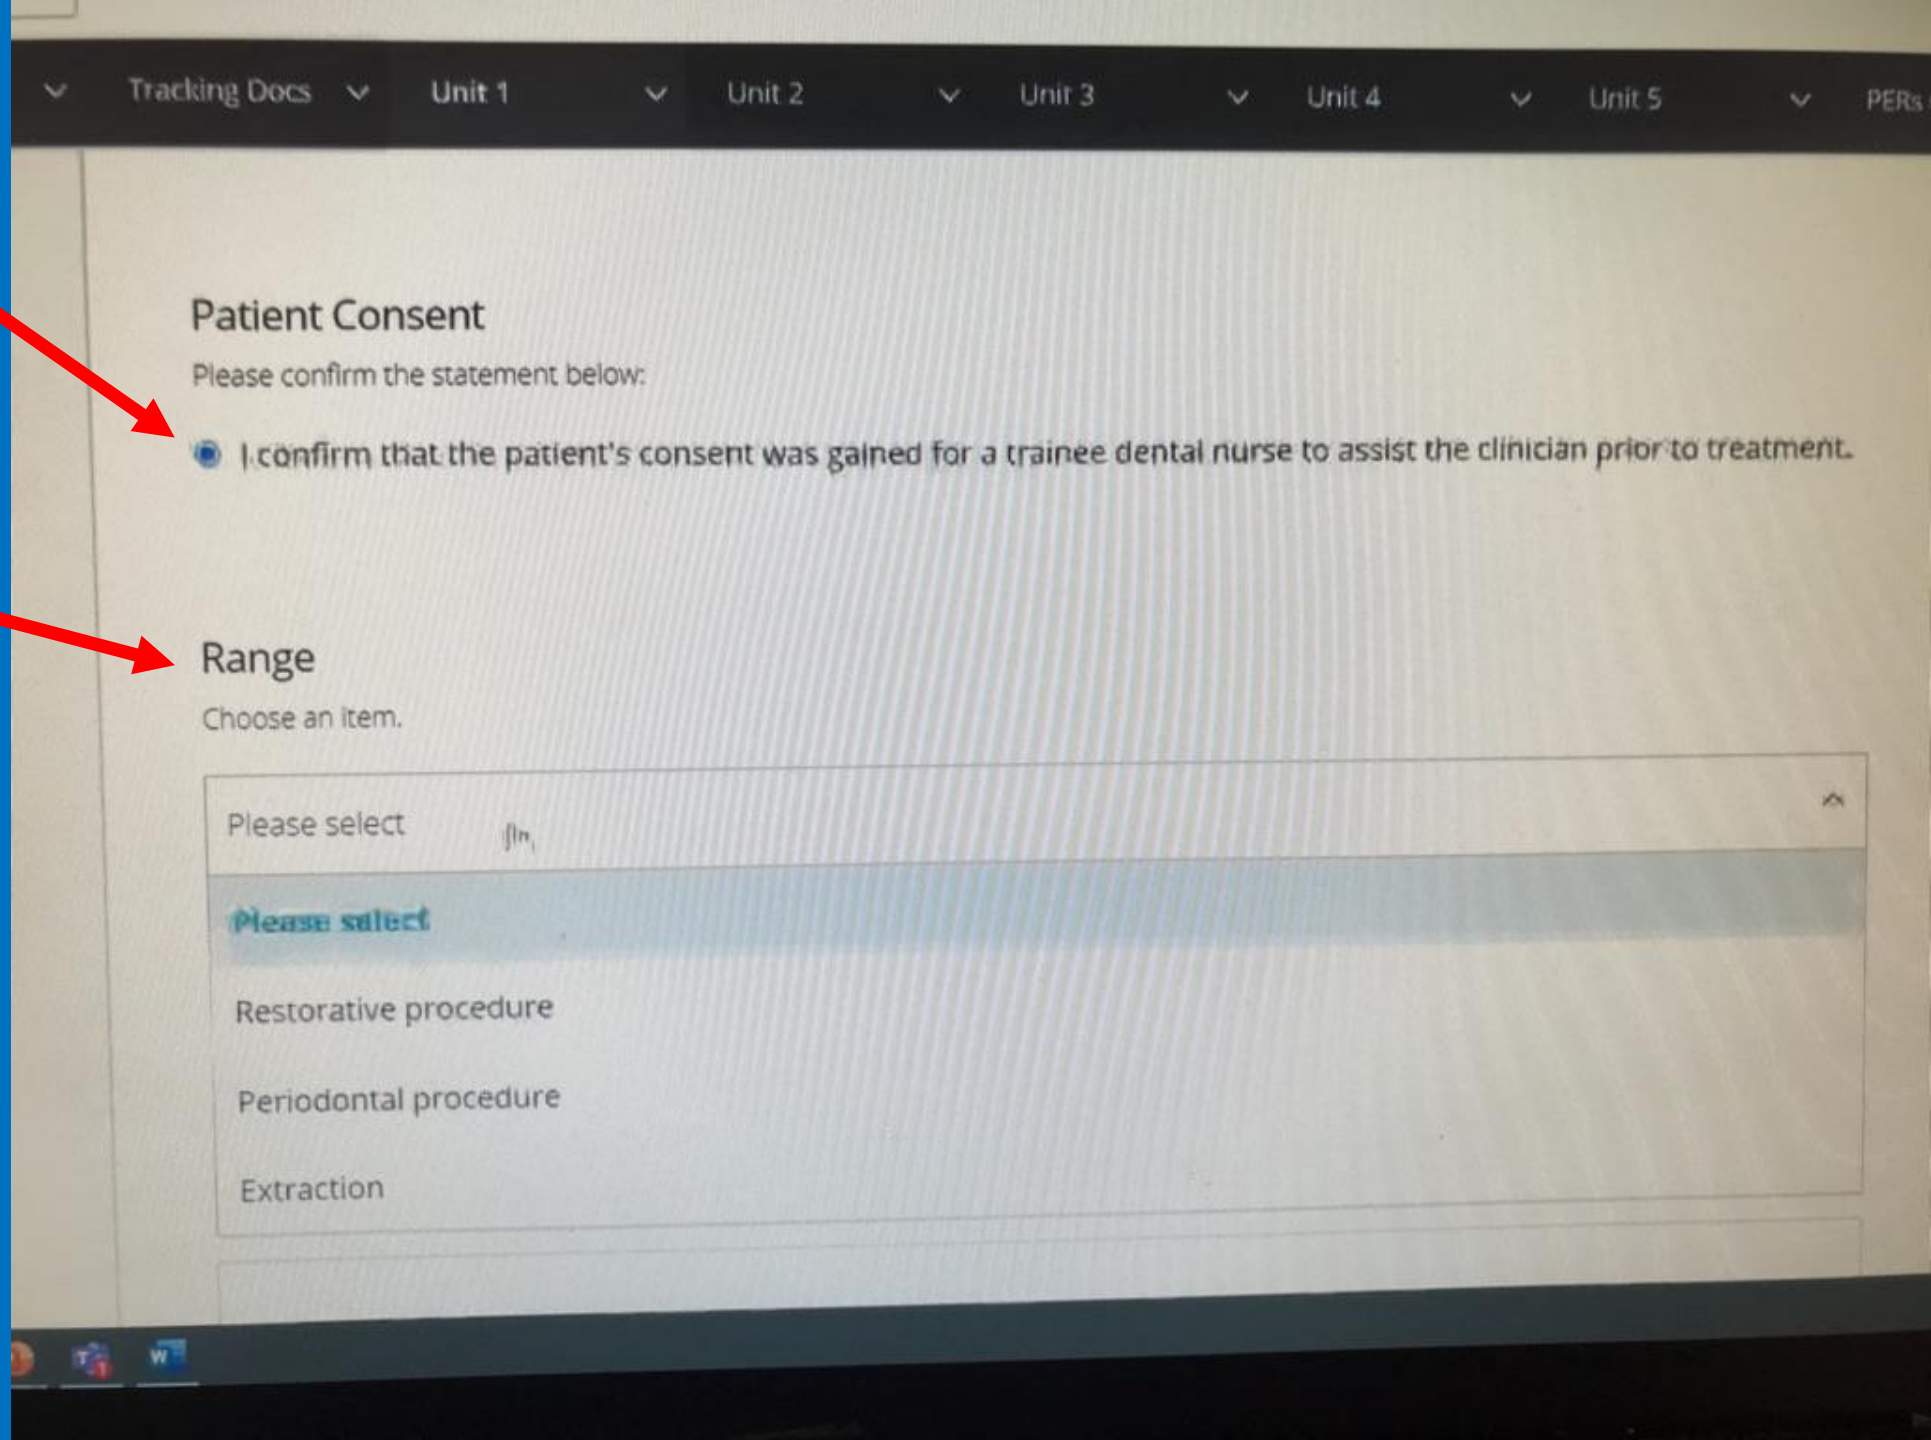
The date



London Waterloo Academy

Patient consent

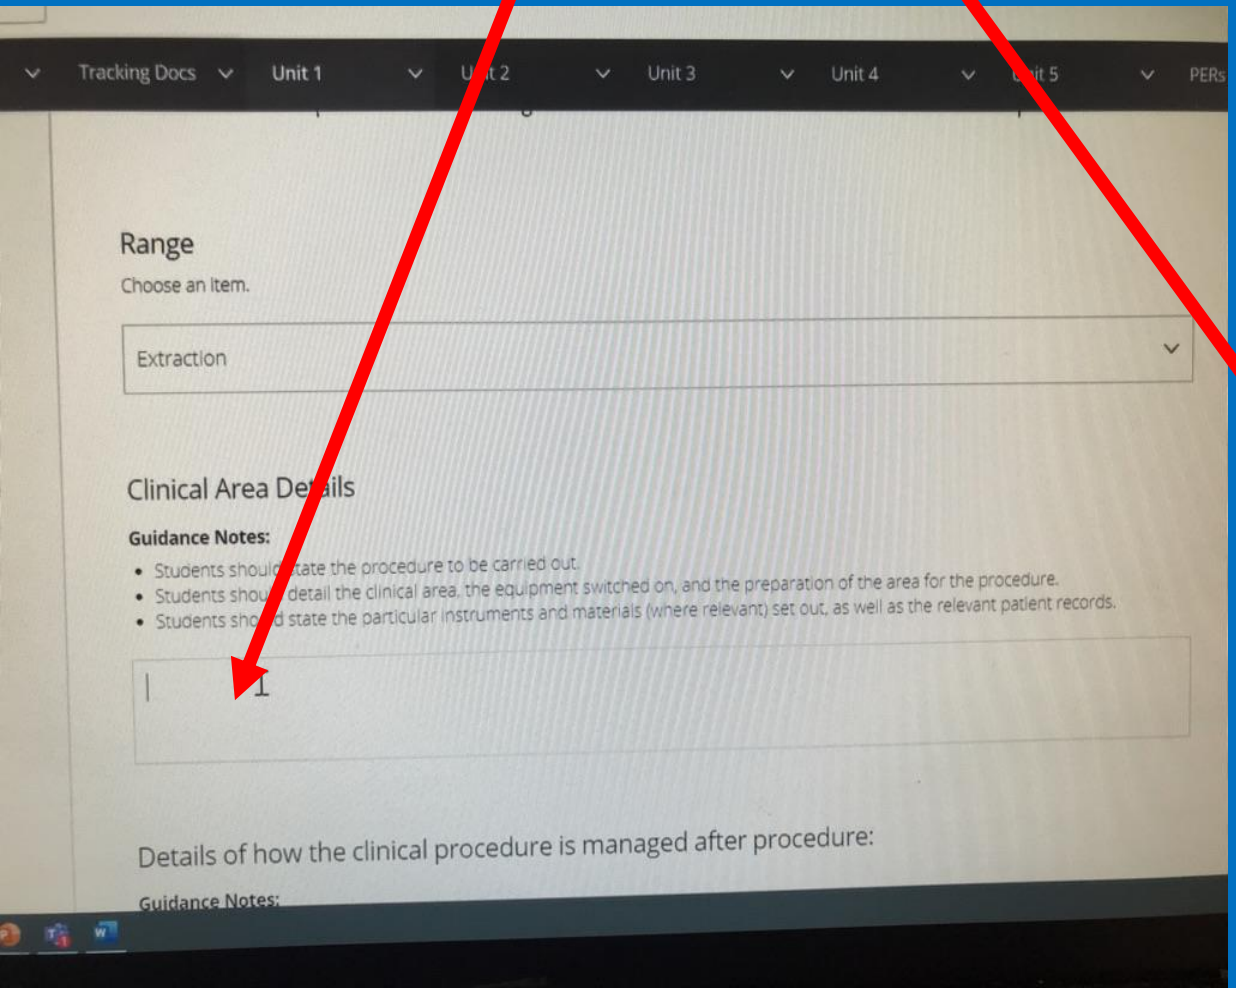
Range

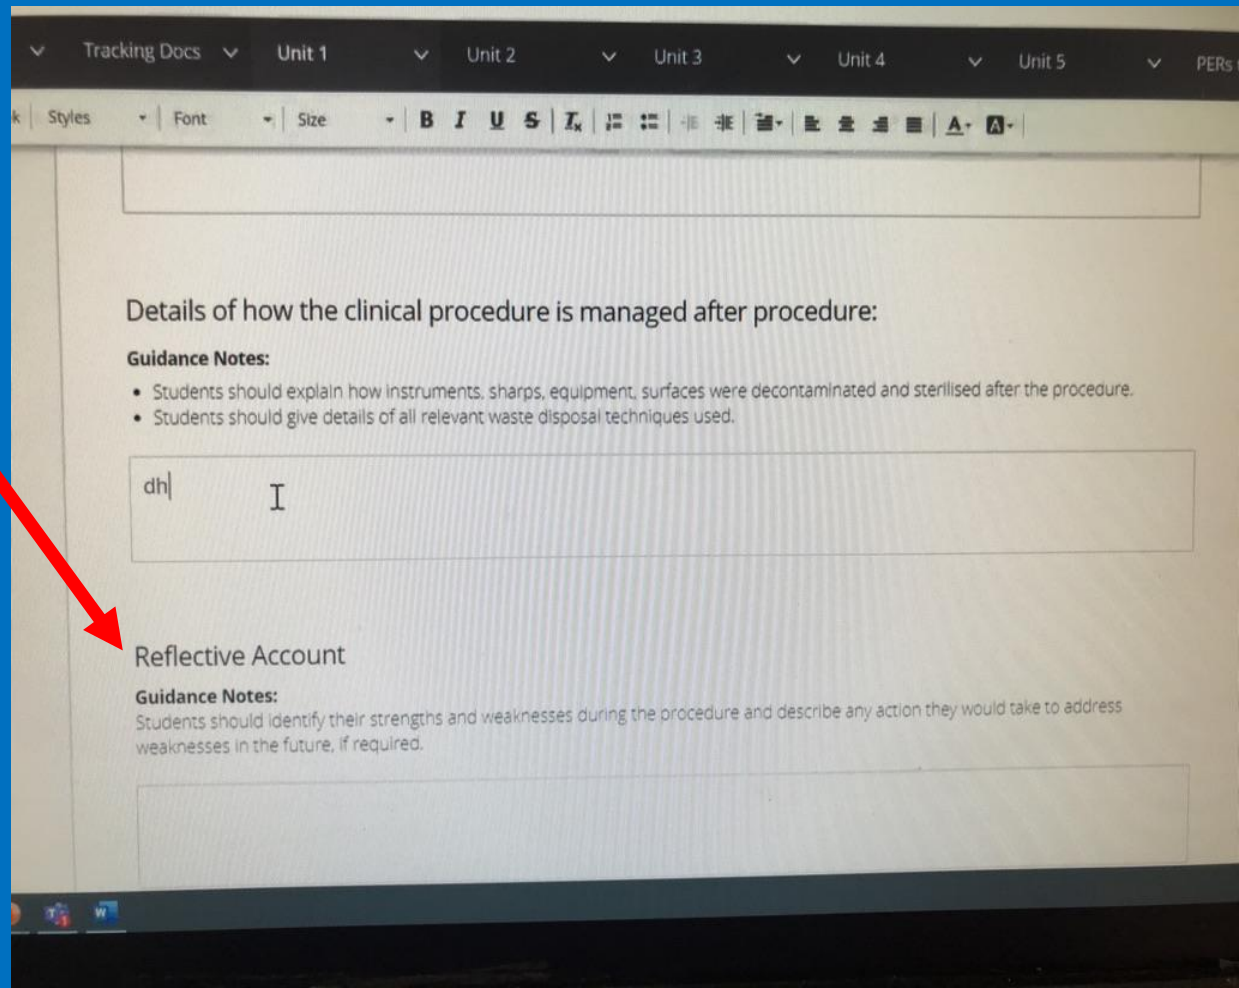


London Waterloo Academy

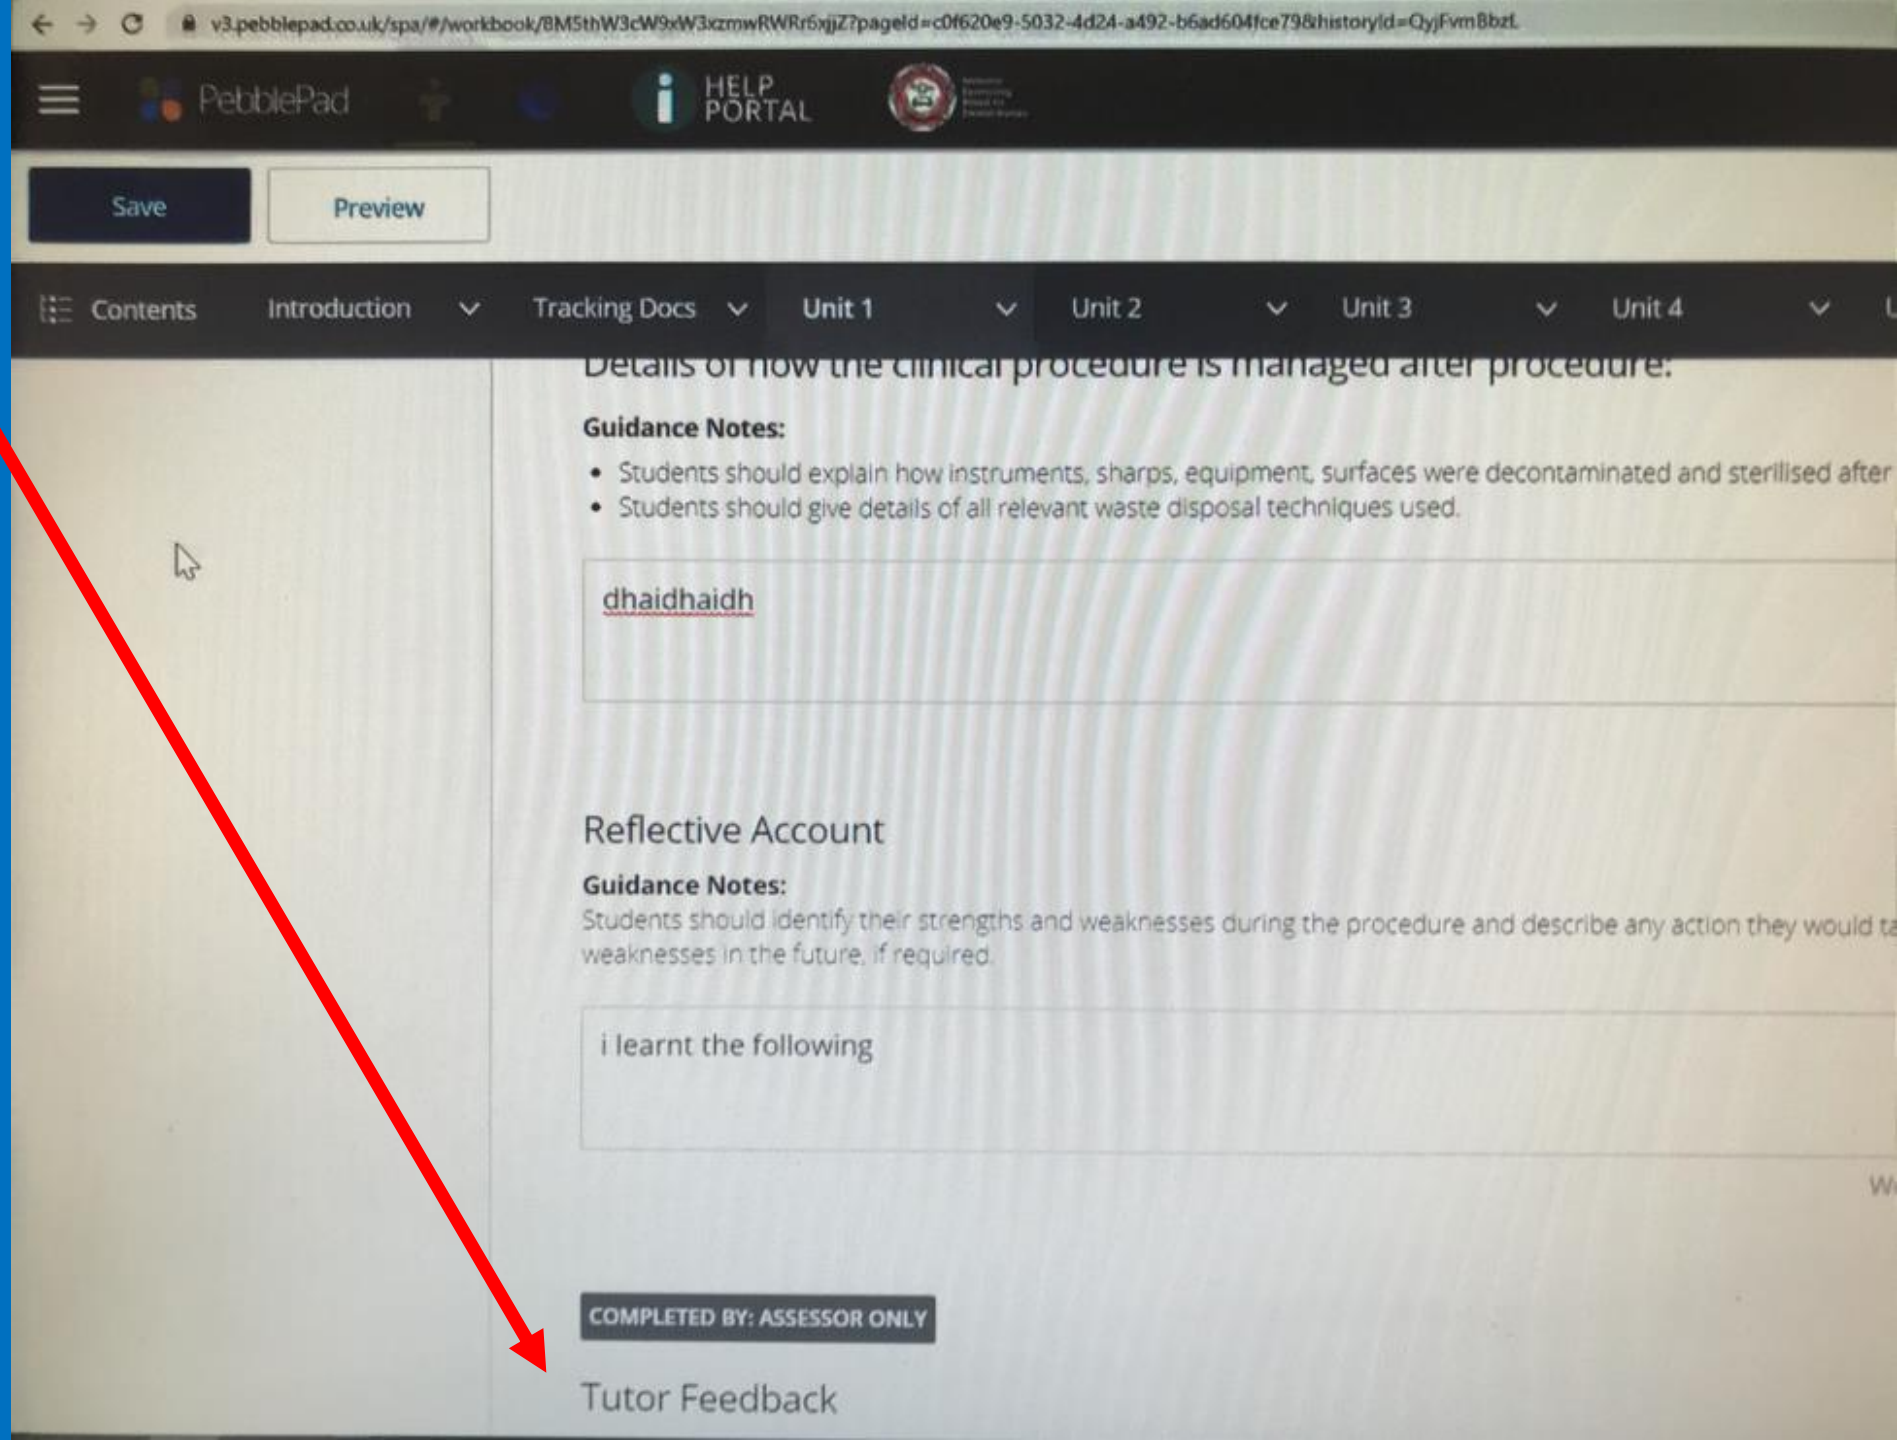
Fill in the rest

Reflective account





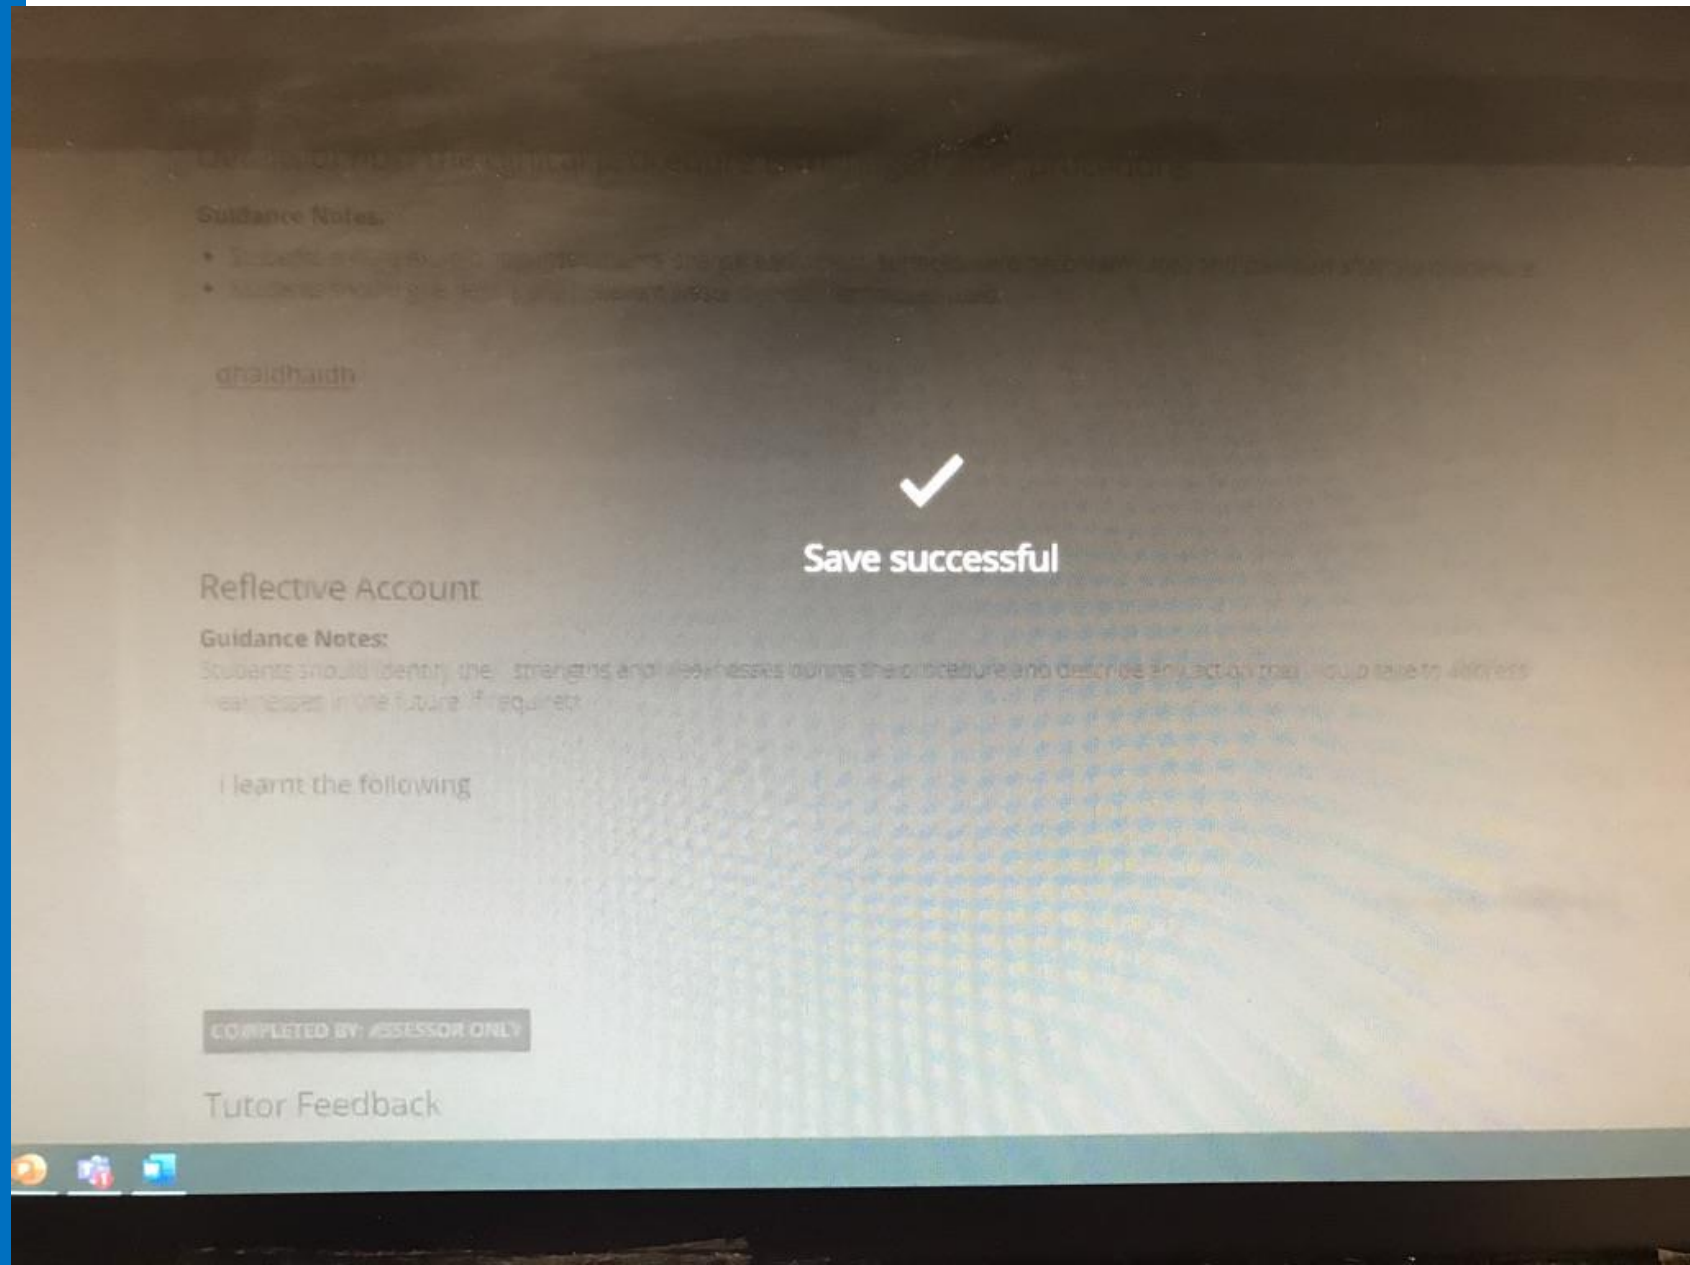
The rest of the page is for the assessor to complete once they access it from their side



London Waterloo Academy

www.waterlooacademy.co.uk

Then save it



London Waterloo Academy

www.waterlooacademy.co.uk

The Pebblepad is based on logging out

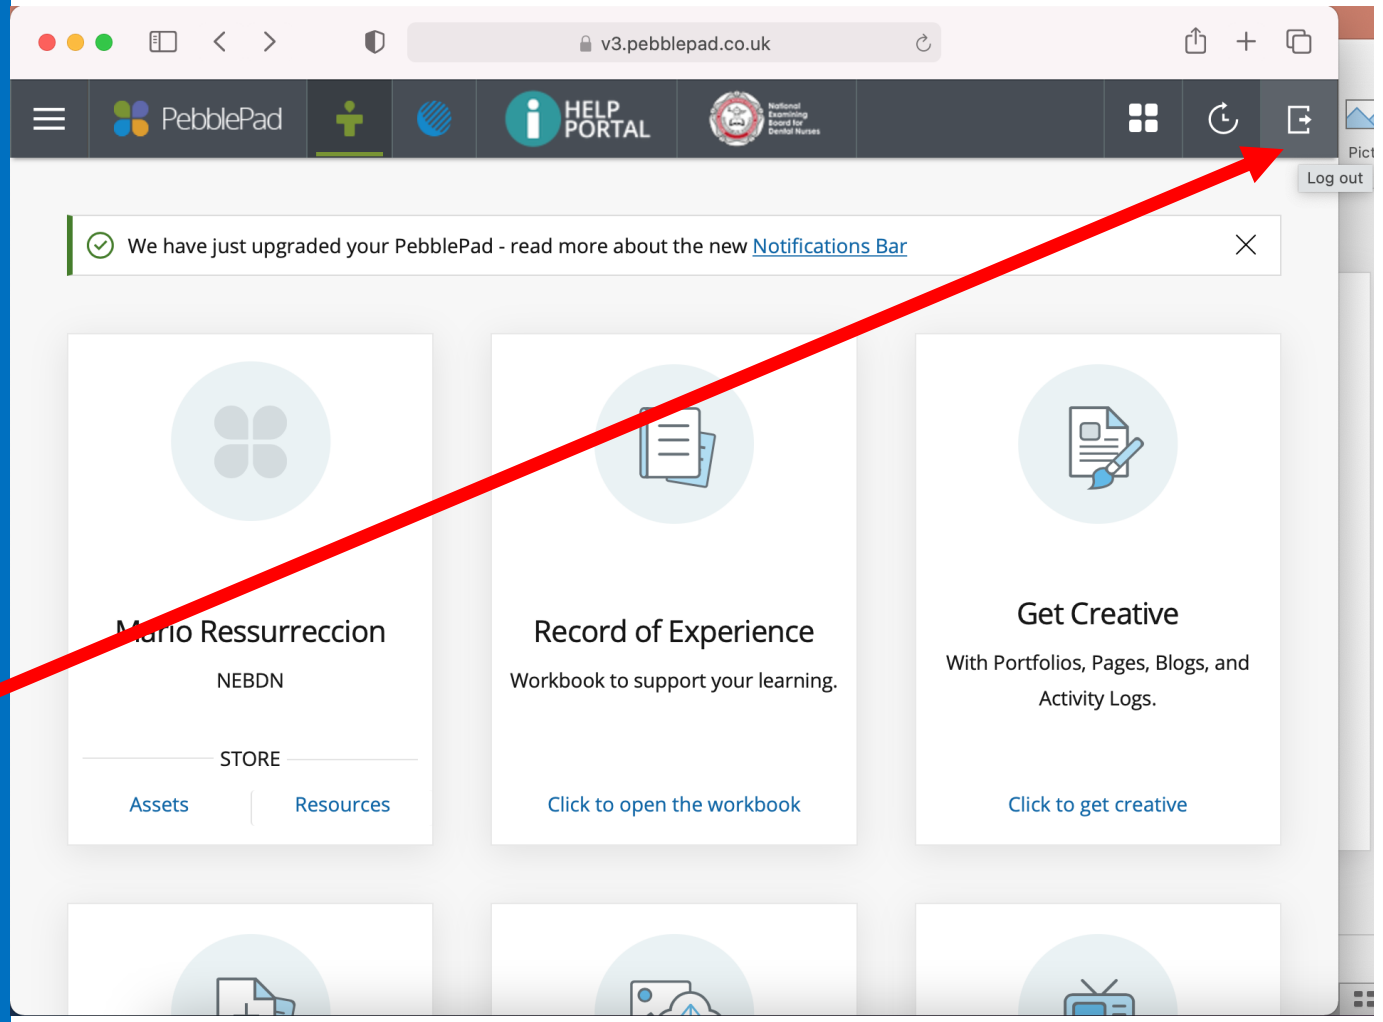
It does not auto-save

So you need to remember to save it

If you do try to come out of the screen, it will prompt the user to save

You can log out on the top right hand corner

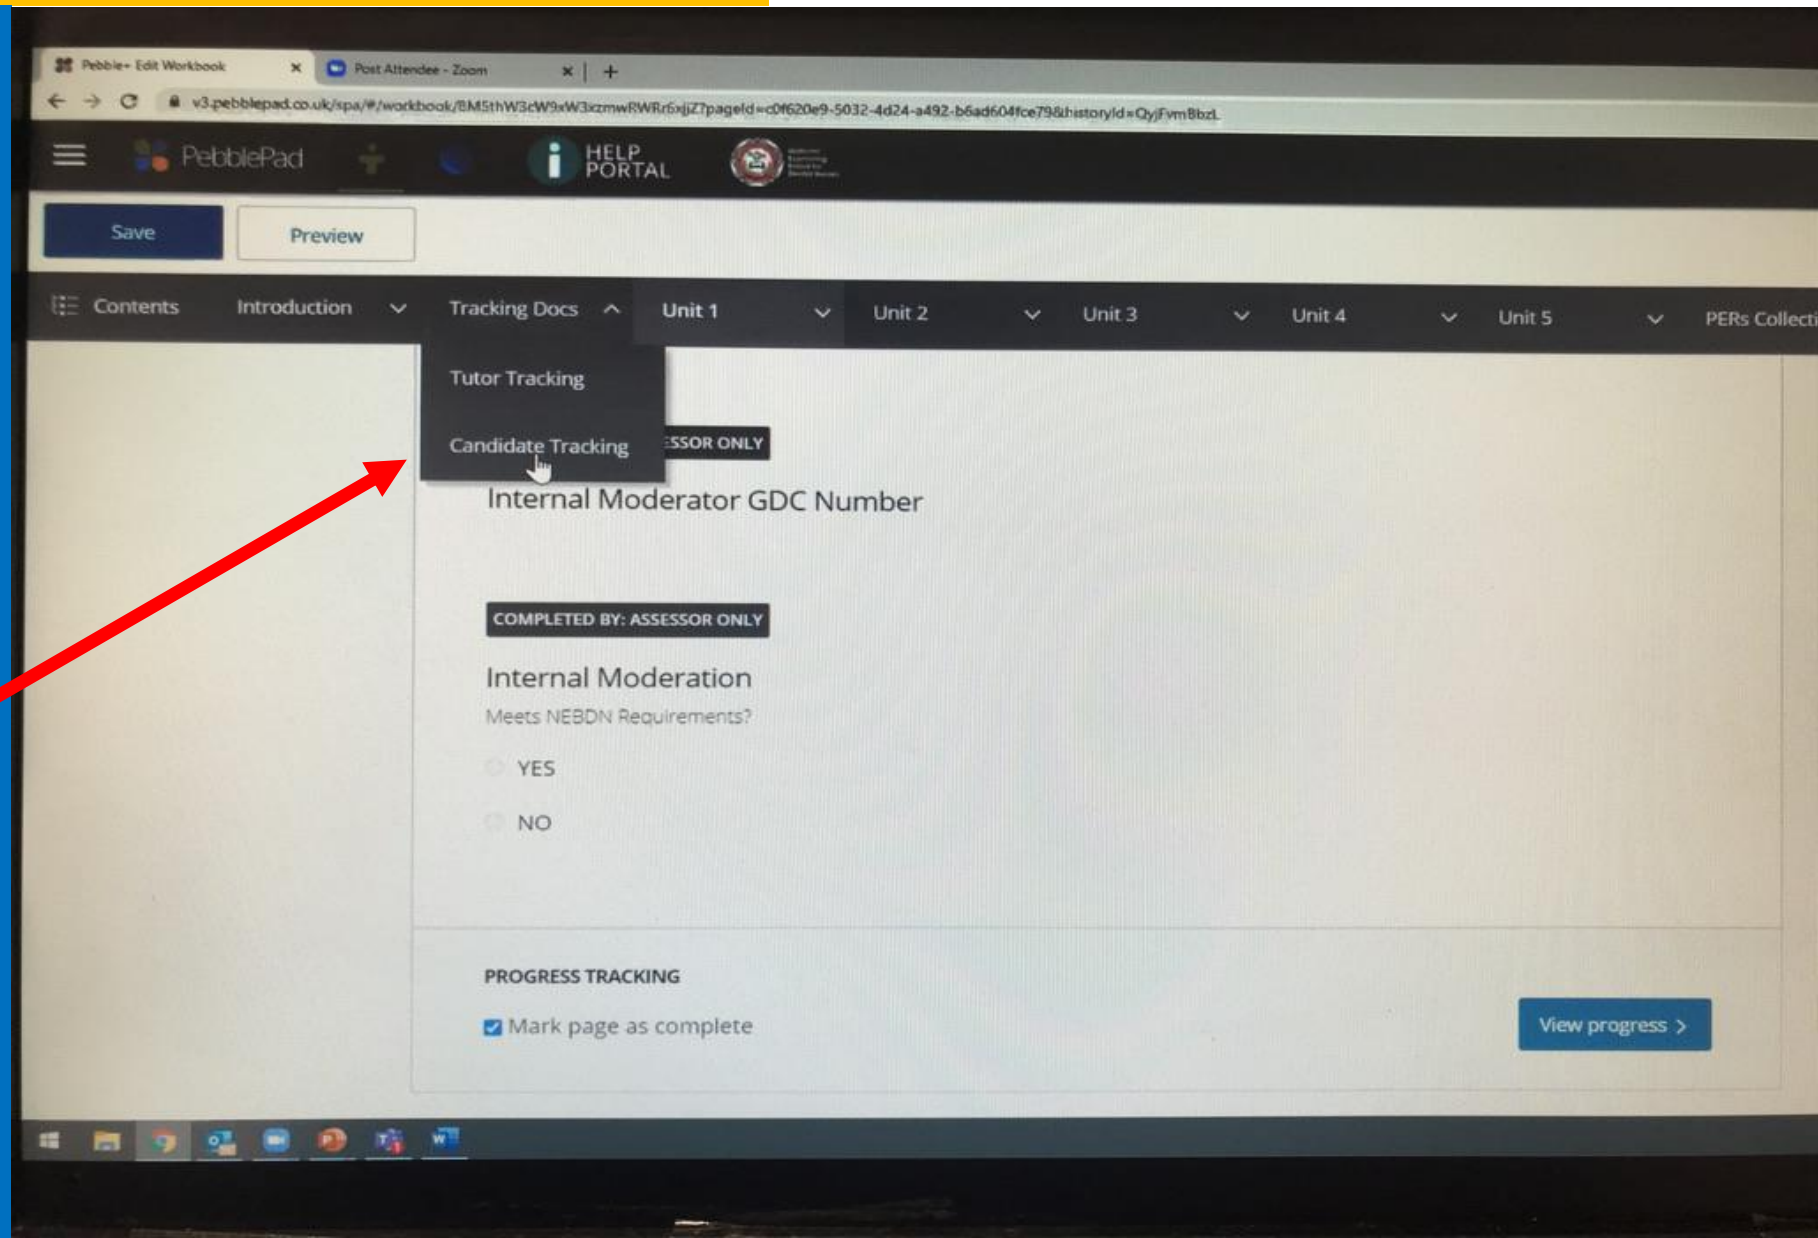
Make sure you are only logged in on one device at one time with the same account



London Waterloo Academy

Tracking progress

Once you've got new updates & made changes , a tracking section was created to keep track of your progress

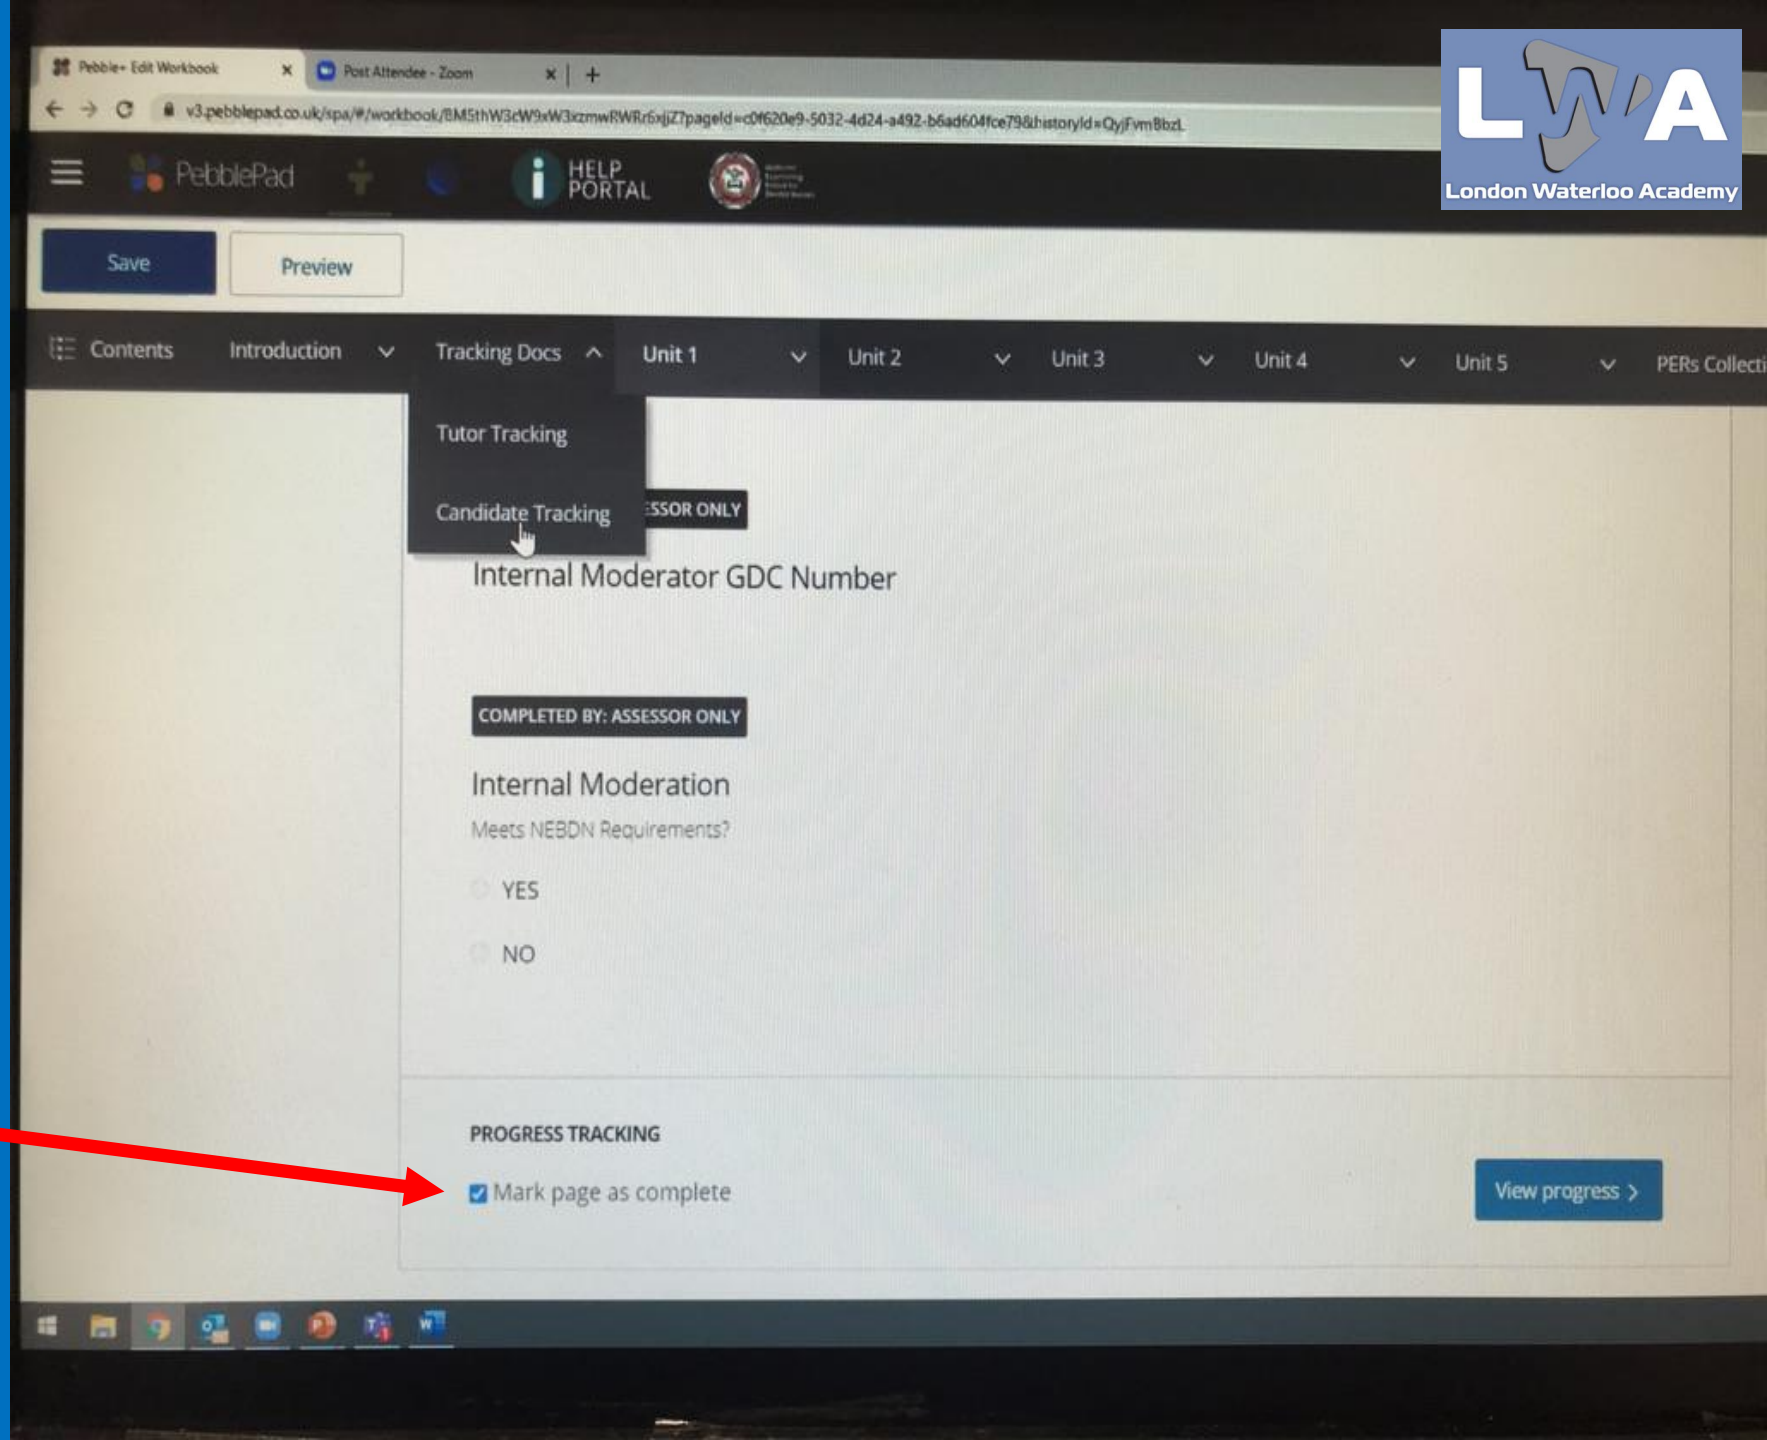


London Waterloo Academy

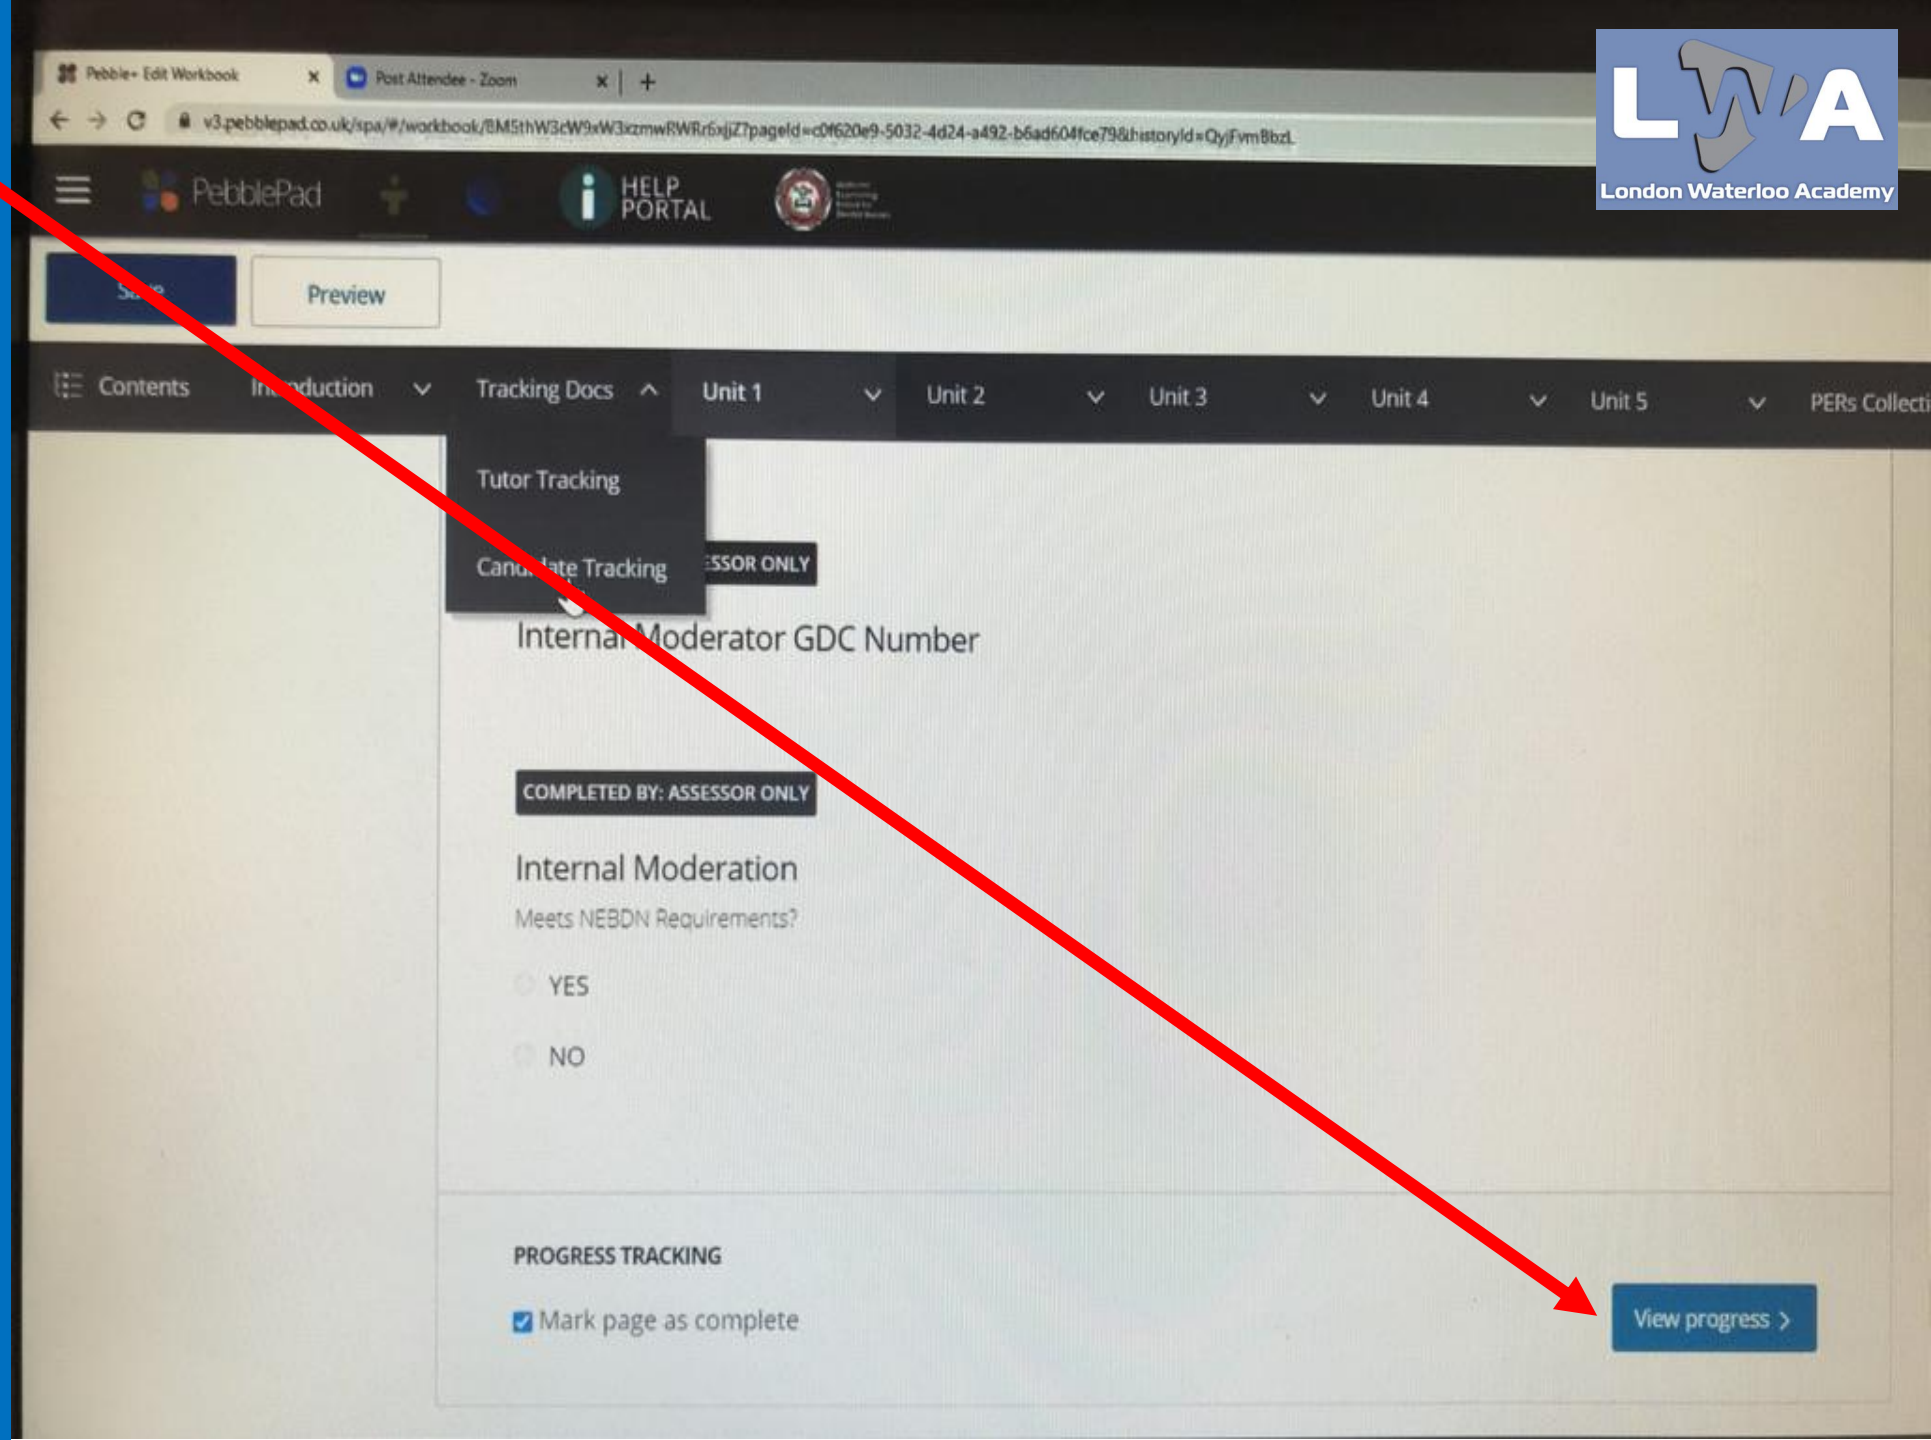
Different ways to keep track of your progress

1. At the bottom of the page, once you have completed. If you go to PER1.1.a, once you've got everything completed from your perspective as a candidate, you can mark a page as complete. (tick it)

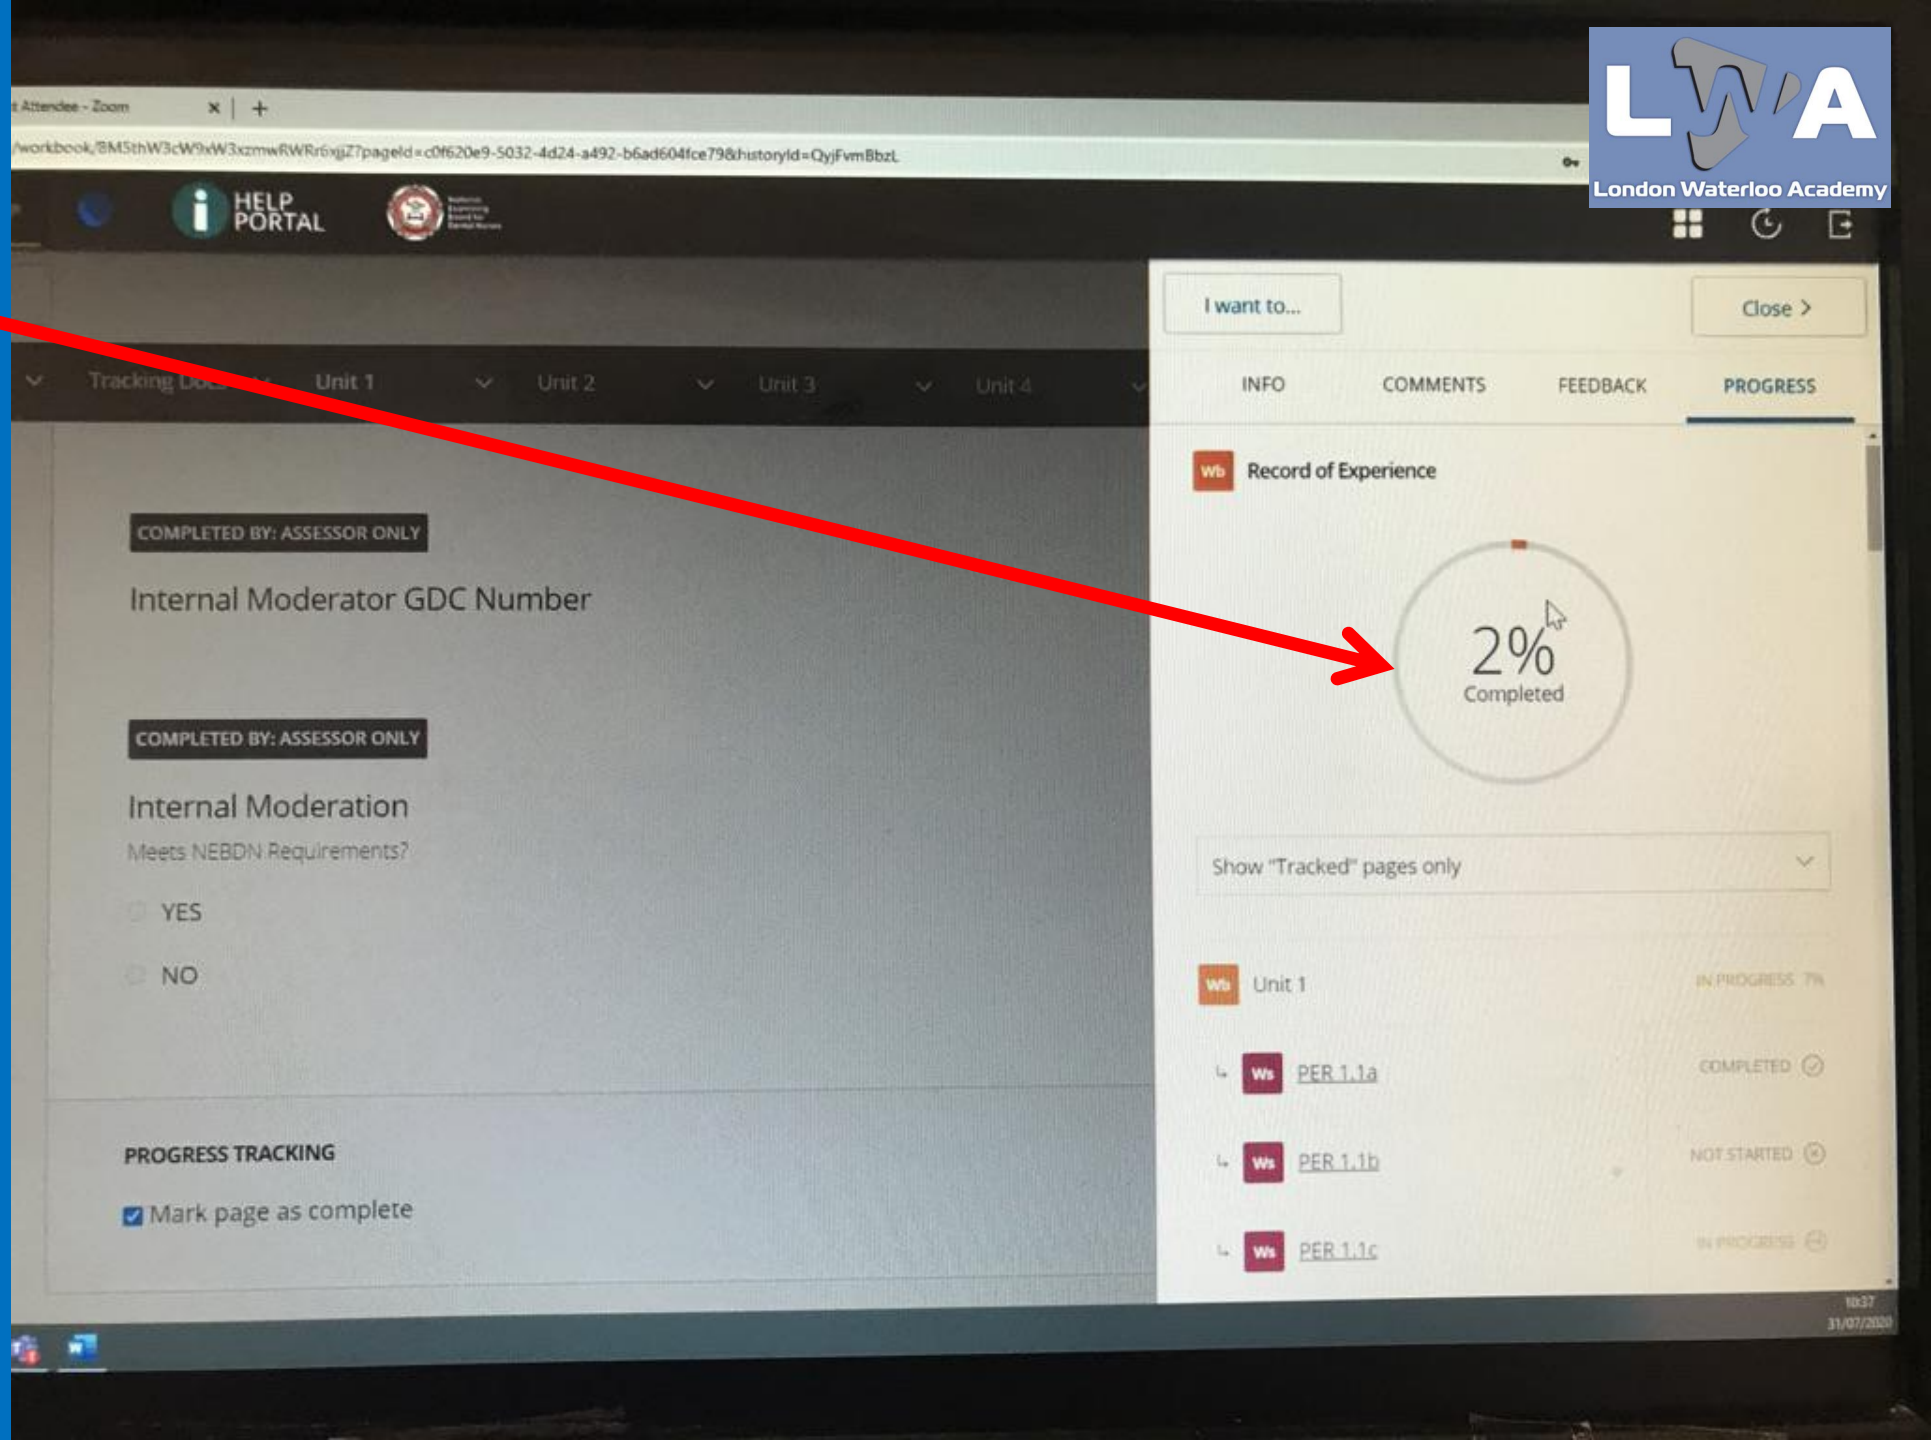
That should help you keep track as a candidate



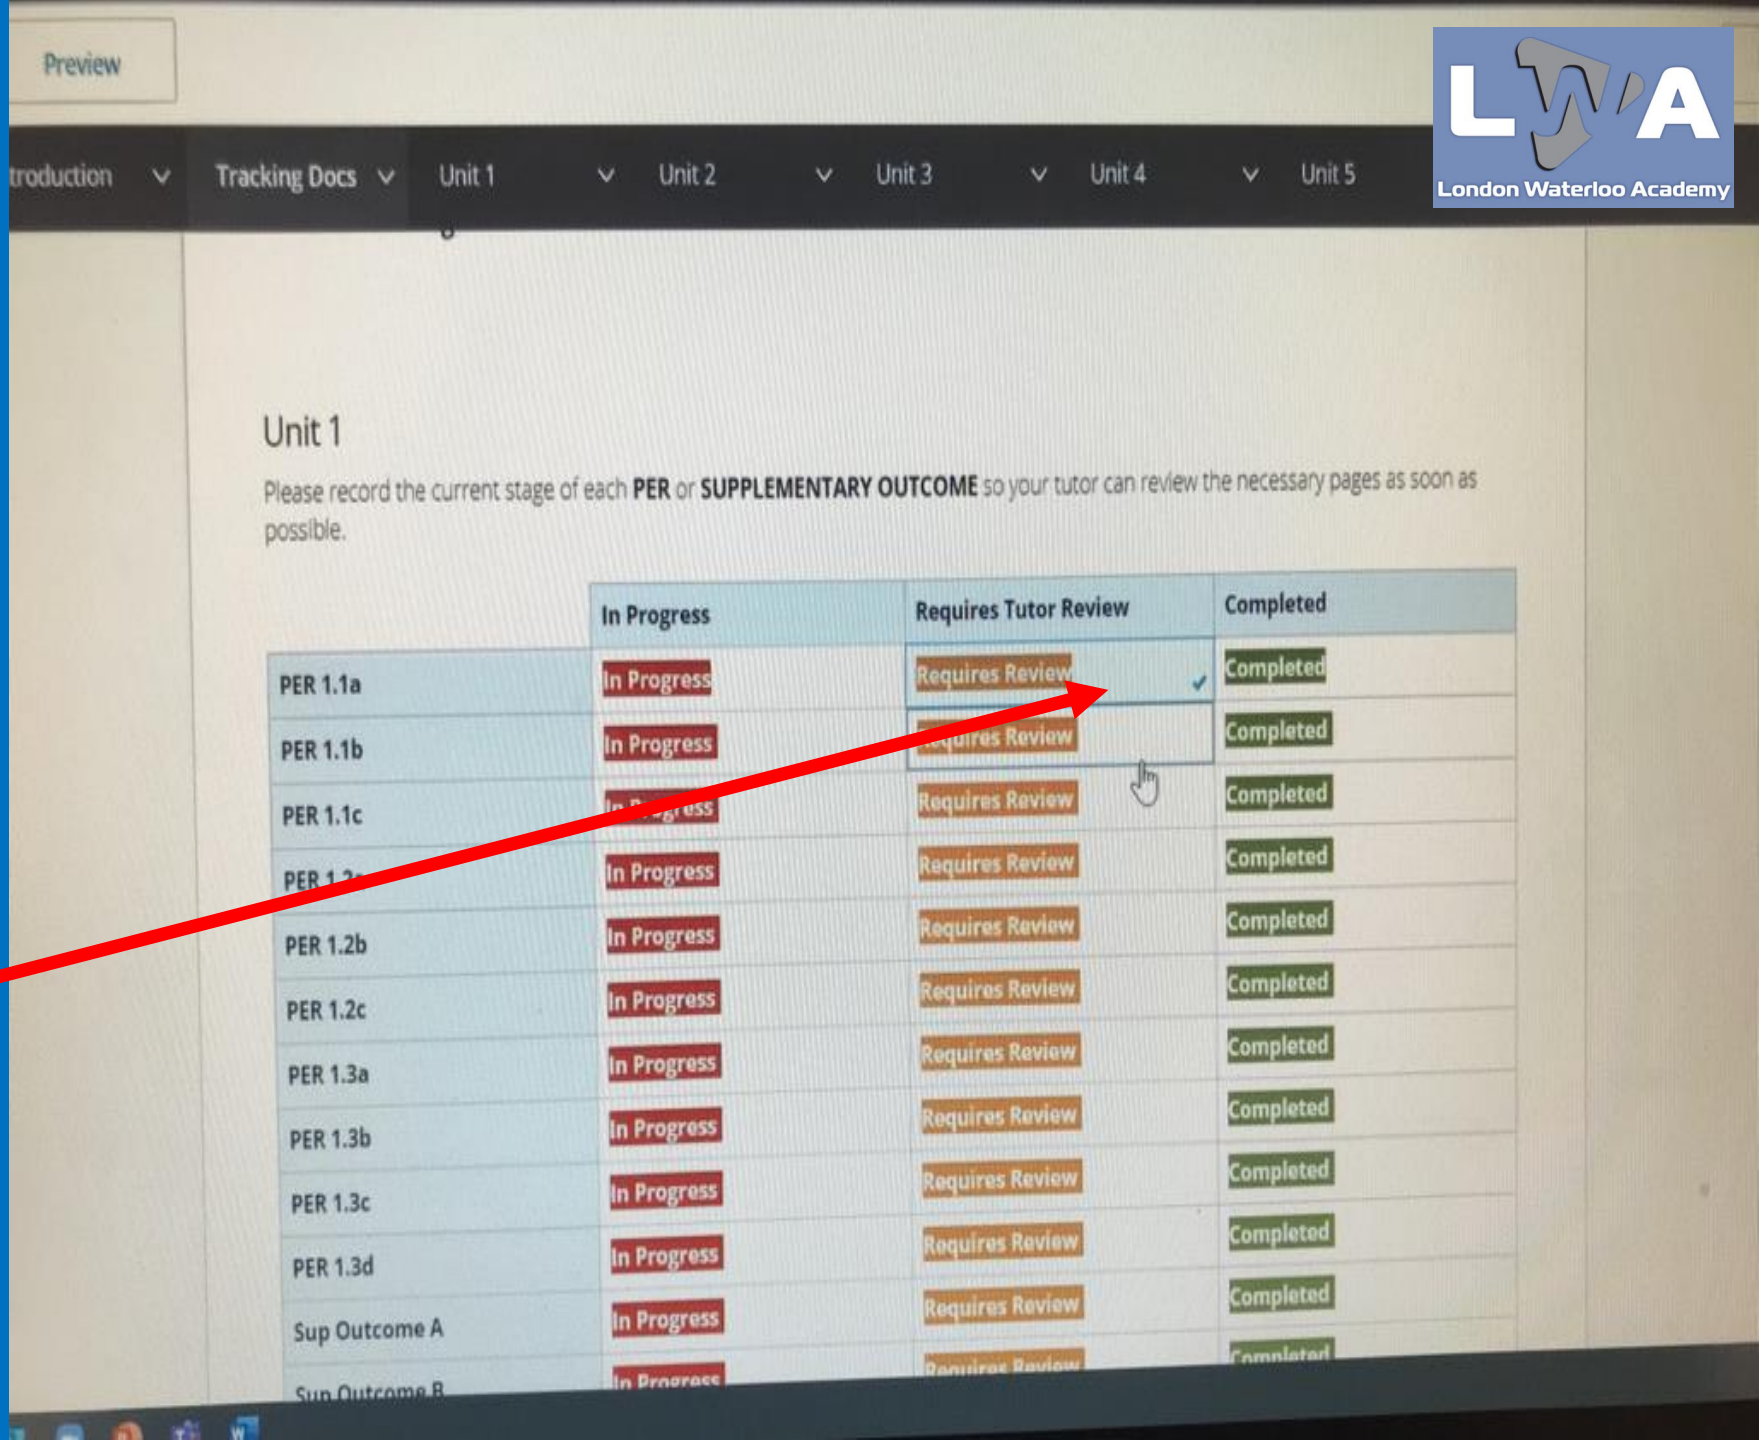
So you can view your progress, you can see the % completed across the workbook, you can see the pages you've have started and progressed, pages you have not started and pages that you have completed



So you can view your progress, you can see the % completed across the workbook, you can see the pages you've have started and progressed, pages you have not started and pages that you have completed



2. Go to tracking docs section as a candidate, you can then see which pages you can then mark as requiring review, I want my tutor to review by ticking the appropriate PERS, then save



THE END

ANY ??????????
